The strength of Tamura's AC and DC power conversion families lies in providing consistently dependable products. All Tamura power and magnetic devices are designed and manufactured to deliver lower AQL levels, guaranteeing you the lowest incoming rejection rates you've ever experienced. For example, last year we shipped over **100 million transformers**– most to customers using a **ship-to-stock** acceptance program.

At Tamura, we're already life testing (not just designing) tomorrow's products– today. Over 100 design engineers at our technology center are dedicated to this task, assuring you of having the most up-to-date technology in your products. Today we are already designing the robotics to build these quality products, in high volume and at low cost. Over 150 product support engineers at 16 Tamura factories see to it.

Satisfy your AC and DC requirements for today and tomorrow. Contact Tamura for your specific requirements.

Tamura quality circles the electron world.

24 PAGE PRODUCT INDEX BOOK LISTS 3,800 ITEMS

62 CROSS REFERENCE CARDS

300 FILE FOLDER LABELS

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with the System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,
645 stewart ave., garden city, ny 11530

eem SYMBOLS USED BY INTERNATIONAL REGULATORY AGENCIES

These symbols appear on many electrical/electronic components distributed in the world market. They indicate that a country's standard-setting agency has approved the design of the component and/or a testing agency has approved the performance of the component in meeting the standard. This page lists only those countries that have a *symbol* to represent their authority.

Argentina (IRAM) Instituto Argentino de Racionalization de Materiales

Australia (SAA) Standards Association of Australia

Austria (ÖVE) Öesterreichischer Verband für Elektrotechnik

Belgium (CEB) Comité Electrotechnique Belge

Brazil (ABNT) Associação Brasileira de Normas Teonicas

Canada (CSA) Canadian Standards Association

Czechoslovakia Urad pro Normalizaci a Mereni (Office for Standards and Measurements)

Denmark (DEK) Dansk Elektroteknisk Komite (Danish Electrotechnical Committee)

Egypt (EOS) Egyptian Organization for Standardization and Quality Control

Finland (SETI) Electrical Inspectorate

France (UTE) Union Technique de l'Électricité

Germany, Democratic Republic of (East) (ASMW) Amt für Standardi-sierung Messwesen und Warenprufung (Office for Standardization, Metrology and Quality Control)

Germany, Federal Republic of (West) (DKE) Deutsche Electrotechnische Kommission im DIN und VDE (German Electrotechnical Commission of DIN and VDE)

Greece (ELOT) The Hellenic Organization of Standardization

Hong Kong Hong Kong Standards & Testing Centre

Hungary (MSZH) Magyar Szabvanyugi Hivatal (Hungarian Office for Standardization)

High-	NA	S	2.1	685	1.8	200	[h]
temperature	Li	S	2.2	1,150	1.8	200	[i]
Solid electrolyte	Ag	Polyiodide	0.66	. . .	0.6	180	75[j]
Fuel cell:							
Hydrogen[c]	H_2	Air	1.23	26,000	0.7		[k]
Hydrazine[c]	N_2H_4	Air	1.5	2,100	0.7	800[b]	[l]
Methanol[c]	CH_2OH	Air	1.3	1,400	0.9	175[b]	185[m]

a Delivered capacity when discharged at normal temperatures (20°C) at normal discharge rates.
b Based on fuel consumption only.
c Weight of air not considered in computation of watt hours.
d Water-activated
e Automatically activated; high rate discharge; 2- to 10-min rate.
f Fused salt; heat-activated; high rate discharge; 2- to 10-min rate.
g Four-minute discharge rate.
h β-alumina electrolyte, 300°C operation.
i Fused salt; 350°C operation.
j Solid $RbAg_4I_5$ electrolyte.
k Several different cathode materials used.
l Fuel consumption is based on source of H_2.
m Based on methanol battery-fuel supply in situ.

eem MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

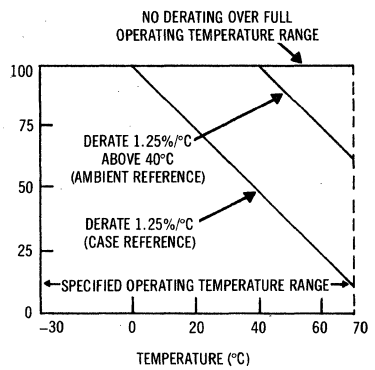

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

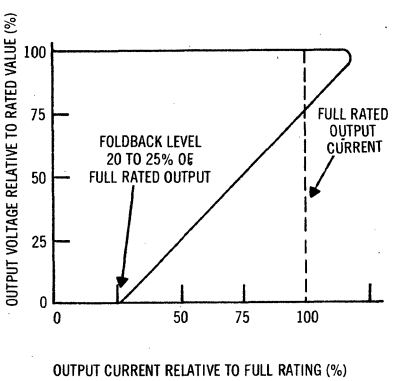

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

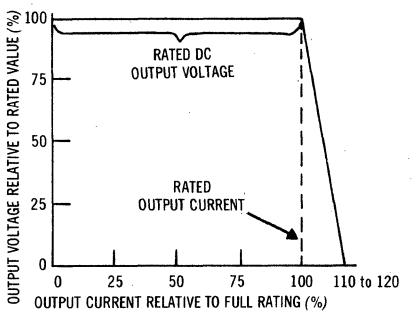

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

THERMAL CONDUCTIVITY OF DIELECTRICS AT ROOM TEMPERATURE

Material	Thermal Conductivity, J/ (m.K)
Diamond	658
BeO	167
Graphite	117-200

weight	W	newton	N	kg m s^{-2}or mg

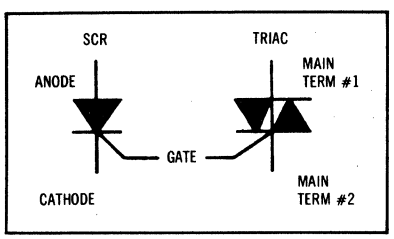
MINIGLOSSARY THYRISTORS/ HIGH POWER DIODES

THYRISTORS

A thyristor is a four-layer semiconductor (pnpn) that can be switched from an OFF to an ON state. This is usually done by a voltage or current pulse to the gate terminal. The device will then continue to conduct so long as the principal current of the device flows through the thyristor's two main terminals.

In many respects a thyristor is analogous to an electromechanical latching relay. In fact, thyristors have largely replaced these relays in newer equipment designs. But, misapplications and/or failure to fully understand the parameters of these and other solid state devices often leads to catastrophic field failures.

The terminology shown on this page has been condensed from common industry data books and is intended to be a guide for the engineer.



di/dt: *Critical rate of rise of ON state current* is the user's maximum design limit (Fig. 1).

di_R/dt: *Rate of decay of ON state current* (Fig. 1 & 2).

dv/dt (critical): *Rate of rise of OFF state voltage*. Lowest voltage rate of rise to cause a thyristor to turn ON.

dv/dt (reapplied) : *Rate of rise of reapplied OFF state voltage.*

I_{FSM}: *Nonrepetitive ON state surge current in diodes.* Maximum peak value of ½ cycles (60 Hz) a diode can withstand up to 100 times in its lifetime.

I_{TSM}: *Nonrepetitive ON state surge current in thyristors*. Maximum peak value of 60 Hz cycles a thyristor can withstand up to 100 times in its lifetime.

I_{DRM}/I_{RRM}: *Maximum peak forward/ reverse leakage current* at specified temperature and repetitive conditions.

I_{GDM}: *Continuous gate current not to trigger*. Highest dc gate current that will *not* cause thyristor to switch from OFF to ON at a specific temperature.

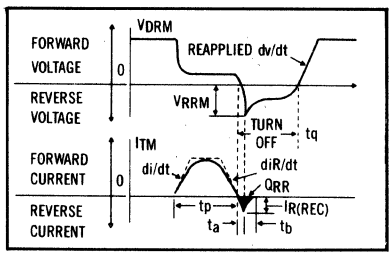


Fig. 1. Concurrent voltage and current waveforms

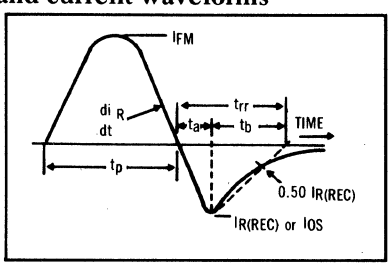

Fig. 2. Recovery current waveform

I_{GT}: *Continuous gate trigger current.* Absolute minimum gate current required to switch thyristor from OFF to ON.

I_H: *Holding Current*. Minimum current required to hold thyristor ON.

I_L: *Latching current*. Minimum current required to hold thyristor ON after removal of gate drive.

$I_{(REC)}$; *Recovery current*. Peak value of reverse current during recovery or turn OFF (Fig. 1 & 2).

I_{OS}: *Overshoot current*. See $I_{R(REC)}$.

I^2t: Maximum ON state, short time thermal capacity of the silicon element for operations less than ½ cycle of 180° conduction angle.

$I_{T(AV)}$: *Average ON state current* (max.)

Q_{RR}: *Reverse recovered charge* (Fig. 1).

$R_{\theta JC}$: *Junction-to-case thermal resistance* in degrees C per watt.

$T_{C(MAX)}$: *Max. allowable case temperature.*

$T_{J(MAX)}$: *Maximum allowable junction temp.*

t_d: *Delay time*. Interval between a specified point at beginning of gate pulse and the instant at which the principal voltage drops to a specified value. (OFF-ON) (Fig. 3)

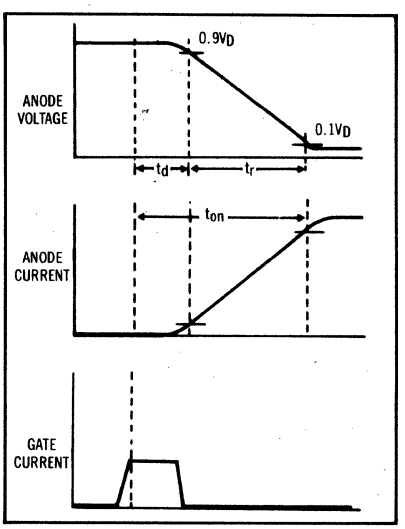

Fig. 3. Turn-on time waveforms

t_{on}: *Turn-on time*. The sum of delay time and rise time. (OFF-ON) (Fig. 3)

t_q: *Turn-off time.* Time between principal current reaching zero and the instant thyristor can block forward voltage without turning ON. (Fig. 1)

t_r: *Rise time*. Time between principal voltage dropping from one value to a second lower value when thyristor turns from OFF to ON. (Fig. 3)

t_{rr}: *Reverse recovery time*. (Fig. 2)

V_{DRM}/V_{RRM}: *Maximum repetitive peak OFF state/reverse voltage* excluding non-repetitive transients.

V_{DSM}/V_{RSM}: *Maximum nonrepetitive peak OFF state/reverse voltage*.

V_{FM}/V_{TM}: *Maximum forward voltage drop* at a specific forward current and case temp.

V_{GDM}: *Gate nontrigger voltage*. Highest dc voltage that will *not* cause thyristor to switch from OFF to ON.

V_{LATCH}: *Latching voltage*. Voltage required for thyristor to latch ON at a given gate current and junction temp.

$V_{TM(DYN)}$: *Dynamic ON state voltage*. Transient ON state voltage of thyristor when triggered into conduction for a given load and time.

eem MINIGLOSSARY ENCAPSULATION

MATERIALS/HANDLING

Catalyst: A substance which changes the *rate* of chemical reaction. Very small quantities can cause fast change.

Conformal coating Sprayed or dipped. A thin conformal jacket which protects an assembly from moisture or other degrading environments.

Curing agent: See catalyst.

Hardener: See catalyst.

Hermetic: A permanent gas-tight seal.

RTV: Room Temperature Vulcanizing. Associated with silicone rubber sealants which vulcanize at room temperature.

Thermoplastic: Plastic materials which can be made to flow *repeatedly* with the application of heat.

Thermosetting: Plastics which once cured cannot be made to flow again.

Thixotropy: The property of a coating compound which has low viscosity when agitated, but which thickens when the agitation ceases.

Viscosity: Measured in units of *poise* or *centipoise*. The property of a liquid which resists internal flow. Low viscosity equates with thin and vice-versa.

PROCESSING

Casting: Parts or assemblies are placed in a mold. Encapsulating material is added and cured. Part is then removed from the mold.

Dip coating: Part or assembly is dipped into the encapsulating material. Final thickness is determined by number of dips, viscosity, rate of withdrawal, and temperature.

Embedding: Wherein an encapsulant substantially fills all voids in and about an assembly.

Impregnation: A process of encapsulation involving evacuating all air and then allowing the encapsulating material to flow in and fill all voids.

Molding: Similar to casting except this process usually implies multicavity molds and costly machines.

Potting: Wherein the part or assembly is immersed in an encapsulating material contained in a shell which becomes a permanent outer surface after curing.

DIELECTRIC

Arc resistance: An encapsulant's resistance to the formation of a conductive path or track. Measured in time.

Breakdown voltage: The voltage at which an encapsulant fails electrically.

Capacitance: The property of conductors and dielectrics which allows the storage of an electrical charge when the voltage is applied.

Corona: A luminous discharge of electricity due to air ionization when a certain voltage is reached. Can be internal or external. The formation of ozone can cause rapid deterioration of certain materials.

Dielectric: Insulator (Nonconductor.)

Dielectric constant: The property of a material that determines its ability to store electrostatic energy.

Dielectric strength: The ratio of dielectric breakdown to the thickness of insulating material.

Dissipation factor: The ratio of a dielectric material's energy losses.

Flashover: Point at which an electric discharge occurs around an edge or across a surface. Can result in a carbon track and permanent degradation.

Insulation resistance: (IR) An insulating material's total DC leakage.

Surface resistivity: The resistance of the surface of an insulating material to the flow of direct current.

Voltage endurance: Sometimes called corona resistance. The ability of a material to withstand the application of sustained high voltage.

Volume resistivity: The resistance of a material to direct current flow as a measure of volume. Expressed as ohm-centimeters.

MINIGLOSSARY
RESISTOR COLOR CODES

MINIGLOSSARY TIMERS

Accuracy
The variation of unit performance, i.e., time delay, voltage trip point, etc., over the specified conditions of ambient temperature, input voltage range, and time between operations.

Adjustability
The changing of a unit set point, within the specified range of unit operation, by means of internal or external adjustment mechanism (i.e., changing time delay with potentiometer).

Contact Rating
The electrical power-handling capability of relay contacts under specified environmental conditions and for a prescribed number of operations.

Delayed Interval Timing Function
Input voltage is applied continuously. The timing cycle is started by momentarily actuating the control circuit. The functions of separate Delay-On-Operate and interval type timers are combined in one package providing a single OFF-ON-OFF output cycles

Also called: single shot.

Delay-On-Operate Timing Function
Application of the input voltage starts the time delay. At completion of the time delay, the relay contacts transfer.

Also called: Delay-On-Make, On-Delay, Delay Relay, Delay-On-Pickup.

Delay-On-Release Timing Function
Input voltage must be supplied continuously to timer. Actuation of control circuit causes relay contacts to transfer immediately. Time delay starts when control circuit is released. The relay remains energized for the duration of the time delay—then de-energizes.

Also called: Delay-On-Break, Off-Delay, Delay-On-Dropout, Delay-On-Energization.

Frequency Sensor
A device that monitors a predetermined overfrequency and/or underfrequecy condition, and changes output state when these conditions exist.

Hysteresis
The difference between the response of a unit or system to an increasing and a decreasing signal (example: a voltage sensor).

Interval Timer Timing Function
Application of input voltage causes relay contacts to transfer and time delay to begin. At completion of the time delay, the relay contacts return to de-energized state.

Also called: Delay Interval, One Shot.

Output Control
The switching device, either solid-state or electromechanical, used in the unit to control the load connected to the output terminal(s).

Phase Sensor
A device that monitors for proper phase rotation in 3-phase systems.

Programmability
Ability to modify function, time delay or input voltage of a timer.

Recovery Timer

(Delay-On-Operate/Interval Timer)
The minimum time that input voltage must be interrupted *prior* to time-out to insure a successive timing cycle within the specified limits.

(Delay-On-Release)
The minimum duration of time that control circuit must be re-actuated to insure a new timing cycle when the control circuit is released.

Recycle Time

(Delay-On-Operate or Interval Timer)
The minimum time that input voltage must be interrupted after the timing cycle is completed to assure a successive timing cycle within the repeatability specified.

(Delay-On-Release)
The minimum duration of time that control circuit must be actuated to insure a successive timing cycle within the repeatability specified when the control circuit is released.

Repeat Cycle Timer Timing Function
Application of power automatically initiates continuous off-on cycling of the output relay.
Also called: flasher, intervalometer

Reset Time
The time required for the contacts to return to normal position when power is removed.

Reverse Polarity Protection
Blocking circuitry arrangement within the timer to prevent damage or output actuation if reverse polarity input voltage is applied.

Tolerance
The difference between specified and actual timing or sense point (factory setup tolerance).

Transient Protection
Prevents damage to unit if positive or negative transients are applied to the unit. Insures proper operation of the unit during and after transient occurrence. Max. transients are usually specified as to amplitude and duration, i.e., 1000V for 1 second.

Trip Point
The predetermined point at which a sensing device is set to change the output state.

Voltage Sensor
A device that monitors for a predetermined overvoltage and/or undervoltage condition, and changes output state when these conditions exist.

eem MINIGLOSSARY ELECTROMECHANICAL RELAYS

RELAYS

Hybrid: Isolated input and output either with a solid-state input and an electromechanical output or vice versa. Typically a reed switch is used to trigger a solid-state output or a solid-state amplifier is used to trigger an electromechanical relay.

Differential: Have multiple windings to function when voltage, current and/or power difference reaches a specific level or value.

Close-differential: The dropout value is specified close to the pickup value.

Frequency sensitive: Operates at a set frequency or within specific frequency bands. A resonant reed, for example.

Hermetically sealed: Totally sealed by glass-to-metal or metal-to-metal seals to ensure very low rates of gas leakage over long time periods.

Encapsulated: Imbedded in a suitable potting compound.

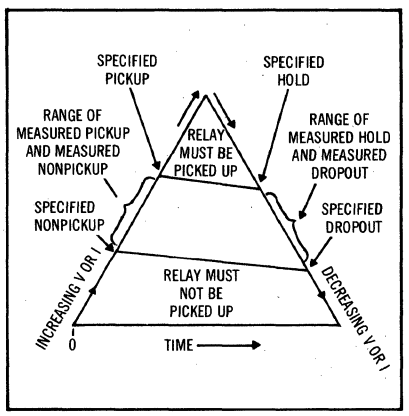
Sealed: Enclosed in a relatively airtight cover. (Not the same as hermetically sealed.)

Covered: Unsealed metal or plastic enclosure or housing.

CONTACTS

Dry circuit: contacts that carry current but do not open or close during energizing of the load circuit. Often wrongly used in reference to low level contacts.

Low Level: Contacts controlling relatively low voltages and low currents. Generally below 5 Vdc and 10mA.



OPERATING CHARACTERISTICS

Measured dropout: The value at which all contacts restore to their unoperated position as current or voltage decreases.

Specified dropout: The value at or *above* which all contacts *must* restore to their unoperated position as voltage or current is decreased.

Specified hold: The value that *must* be reached before any contact change occurs as voltage or current is decreased on an operated relay.

Specified nonpickup: The value that *must* be reached before any contact change occurs as voltage or current decreases on an unoperated relay.

Measured pickup: The value at which all contacts function as voltage or current increases on an unoperated relay.

Specified pickup. The value at or *below* which all contacts *must* function as voltage or current increases on an unoperated relay.

Sensitivity: Specified pickup expressed in watts.

Normal bridging: The make-before-break action between adjacent contacts on relays designed for this purpose.

Abnormal bridging: The undesired closing of contacts caused by a metal bridge or protrusion developed by arcing.

Magnetic freezing: Sticking of the armature to the core as a result of residual magnetism.

TIME

Actuation: The interval from coil energization or de-energization to the functioning of a specified contact.

Initial actuation: The interval from coil energization or de-energization to the *first* closing or opening of a previously open or closed contact.

Final actuation: Sum of initial actuation *and* bounce intervals following an actuation.

Contact bounce: The interval from close or opening of a contact to the end of the bounce of "chatter."

Chatter: See bounce.

Operate: Normally taken as the interval between energization and the opening or closing of the last contact to function not including bounce.

Release: Normally taken as the interval between de-energization and the opening or closing of the last contact to function excluding bounce.

Transfer: The interval between opening a closed contact and closing an open contact of a break-before-make relay.

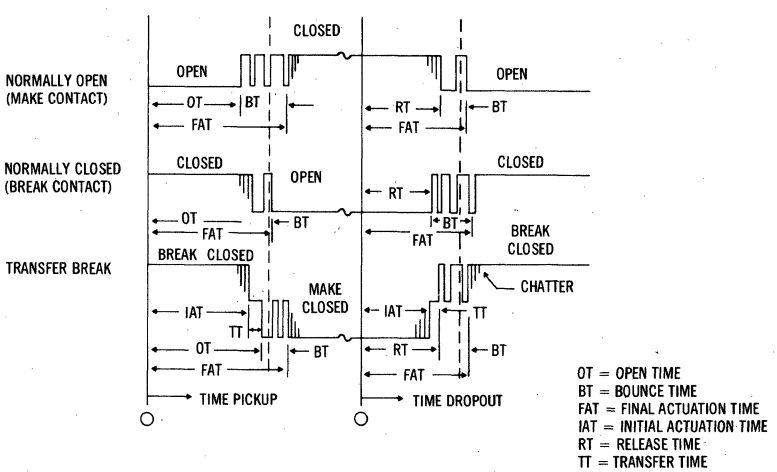


Fig. 2. Typical time vs. current (non-inductive load)

MINIGLOSSARY OPTO SEMICONDUCTORS

Avalanche Photodiode: A photodiode that takes advantage of avalanche multiplication of photocurrent. It is particularly suited to low noise and/or high speed applications.

Contrast: A noticeable difference in color, brightness, or other characteristics in a side-by-side comparison.

Chrominance Contrast: The color contrast between two adjacent surfaces of identical area, shape, texture, and luminance. The human eye is more sensitive to differences in color than it is to differences in brightness.

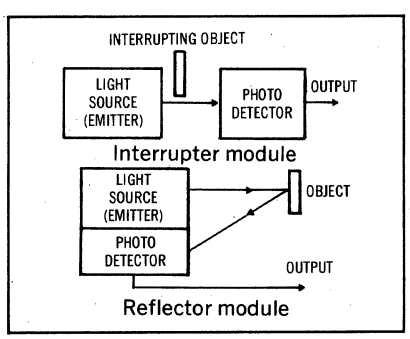
Current Transfer Ratio: The ratio of an optocoupler's output current to input current at a specified bias.

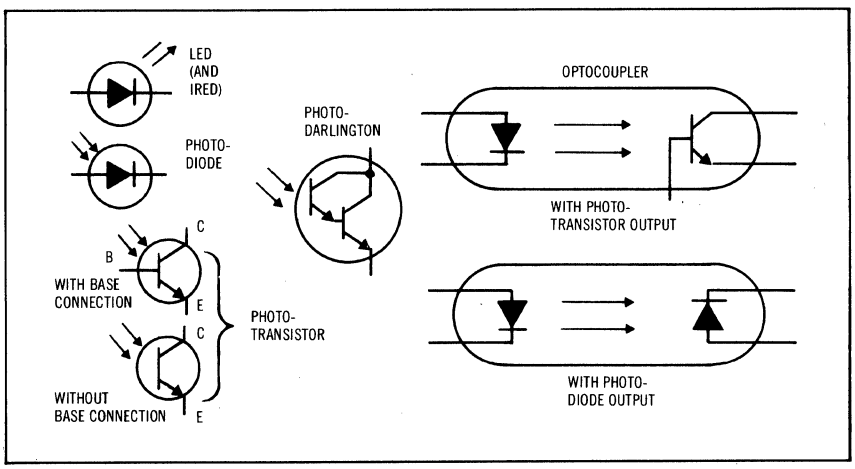
Dark Current: The leakage current of a photodetector with no incident light.

Dominant Wavelength: The wavelength that is a quantitative measure of apparent color of light as perceived by the human eye.

Infrared Radiation: The electromagnetic wavelength region between approximately 0.75 and 100 micrometers longer than the wavelength of visible light.

Interrupter (module): A device that produces an electrical output signal when an object breaks the light (visible or invisible) between a light source and a photodetector.





IRED: An infrared-emitting diode. See light-emitting diode.

Light Current: The current that flows through a photodetector when it is exposed to radiant energy.

Light-Emitting Diode (LED): A semiconductor diode that emits incoherent light at its PN junction when forward biased. The light can be in the visible or invisible (infrared) wavelength region.

Luminance Contrast: The observed brightness of a light-emitting element compared to the brightness of the "surround," an integral part of the device and inseparable from it.

Optocoupler: A device that transmits electrical signals, without electrical connection, between a light source (input) and the receiver (output). The input is generally an LED; the output might be a photodiode, phototransistor, a photo–Darlington, etc. Sometimes referred to as optoisolator.

Peak Wavelength: The wavelength at the peak of the radiated spectrum of an emitter.

Photo–Darlington: A light-sensitive Darlington-connected transistor pair. The photo–Darlington has a very high sensitivity to illumination or radiation.

Photodetector: A device that provides an electrical output signal when subjected to radiation in the visible, infrared, or ultraviolet regions of the electromagnetic spectrum. Photodiodes, phototransistors, and photo–Darlingtons are the most common type of photodetectors.

Photodiode: A junction diode that is responsive to radiant energy. Photodiodes have a high degree of linearity between the input radiation and the output current, and faster switching speeds than phototransistors.

Photothyristor: A thyristor whose switching action is controlled by light applied to the thyristor gate.

Phototransistor: A light-sensitive transister that delivers an electrical output proportional to the light intensity at its input. The low-level photocurrent that is generated is amplified by the current gain of the transistor. The base region (or gate in a FET) may or may not be brought out as an external terminal.

Point Source: A source with a maximum dimension less than one-tenth the distance between sources and detector.

Reflector (module): A device containing a light source and a photodetector that detects any object that reflects light produced by the source back to the detector.

Are you getting all you want from eem?

EEM/Electronic Engineers Master is **user**-named, **user**-driven, and **user**-sensitive.

You, the electronic engineer, are the individual the thousands of manufacturers represented in EEM are trying to reach. **You** are the reason hundreds of manufacturers place their data pages in EEM—so that **you can specify their product in your project.**

EEM wants to know:

- what's new
- what products you are looking for
- what you call them
- what are their basic parameters
- where do they belong in the EEM Product Sections

What kind of reference material/engineering aids will help you make your electronic component choices:

- glossaries
- nomographs
- charts
- product selection guides

Write to the editor: The Editor
EEM/Electronic Engineers Master

MINIGLOSSARY CAPACITORS

Anode: One of two plates or conductors. In polarized capacitors, the anode should be connected to the positive conductor in the circuit.

Capacitive Reactance: The opposition (in ohms) of capacitance to the flow of alternating current, equal to the reciprocal of the product of the angular frequency (2π times frequency in Hertz) of the current times the capacitance in farads.

Cathode: One of two plates or conductors. In electrostatic capacitors the cathode is metallic. In electrolytic capacitors the cathode is a liquid, gel or other conductive material which is in intimate contact with a metallic cathodic connection.

Dielectric Constant: The ratio of the capacitance of a capacitor with some material other than air between the capacitor plates to the capacitance of the same capacitor with air between the plates. For example, the dielectric constants of air, Teflon®, polystyrene and ruby mica are 1, 2.1, 2.6 and 5.4, respectively.

Electrolytic: A capacitor with one metallic conductor (generally the anode) and with a liquid or semiconductor cathode. Nonpolarized electrolytic capacitors generally have two equal anodes as well as the liquid cathode. These anodes operate alternately as anode and cathodic connection as alternating current is applied.

Electrostatic: One of two general classes of capacitors in which two or more discrete metallic conductors are present and separated by an insulating dielectric material. Examples include: mica, ceramic, film, and paper types.

Farad: The basic unit of measure in capacitors. A capacitor charged to one volt with a charge of one coulomb (one ampere flowing for one second) has a capacitance of one farad. Capacitors are generally rated at portions of a farad (microfarads or picofarads).

1 farad (F) = 1,000,000 microfarads (μF) 1 microfarad (μF) = 1,000,000 picofarads (pF)

Impedance: All capacitors exhibit impedance. It is a function of capacitor type and internal construction. This can be particularly important in certain applications such as filters for switching power supplies. Capacitors used in these applications often have special multiple tab construction to shorten current paths and to reduce internal resistance.

Leakage Current: Expressed as dcl for electrolytic capacitors, a measure of the intrinsic losses in a charged capacitor. Generally speaking, the lower the dcl, the higher quality the capacitor.

Power Factor: A measure of the overall efficiency of a capacitor. Power factor ratings take all internal losses into consideration in a complex formula. This parameter of certain capacitors is often very important in AC applications such as motor-start and/or motor-run capacitors

Rated Voltage: The rated working voltage of a capacitor. Generally expressed in DC Volts (Vdcw). This is the voltage at which a capacitor may be safely operated at 25°C continuously within its overall parameters.

Ripple Current: The total amount of alternating and direct current that may be applied to an electrolytic capacitor under stated conditions. In general, the higher the ripple current applied, the shorter the operating life of the capacitor will be. Application of significantly higher than rated ripple currents can shorten the capacitor life dramatically and may even cause catastrophic failure (explosion).

Surge Voltage: The momentary surge voltage which may be applied for a stated length of time without doing permanent damage to the unit.

Temperature: Capacitors are generally rated at 25°C at sea level under specific humidity conditions. Operating temperature ranges are also given, along with derating (reliability) curves for operation at temperatures other than 25°C.

Temperature Coefficient: Expressed as TC in ppm (parts per million) or in percent (%) from the norm of 25°C. This is seldom a straight line and may vary widely for certain types. Most capacitors have positive TC in that the capacitance increases as temperature increases. Some types, however, have negative TC in that the capacitance decreases as temperature increases.

Ceramic Capacitor Codes
(Capacitance Given In pF)

92 Trademark and Logofinder Directories

These Directories are presented as a service to EEM users in order to quickly identify the manufacturers of products commonly referred to by their trademark names and those who show graphic symbols as identifiers on their products. EEM assumes no liability as to the legality or ownerships of such trademarks nor to the proper use thereof. All information shown herein is based on correspondence with the various manufacturers of the products shown.

In the interests of conserving space, only the trademarks and symbols themselves are shown along with the manufacturer which claims their ownership. No attempt has been made here to use trademarks in their proper formats wherein the trademark name is followed by the common name of the product, inasmuch as these Directories are intended as a service to EEM users only.

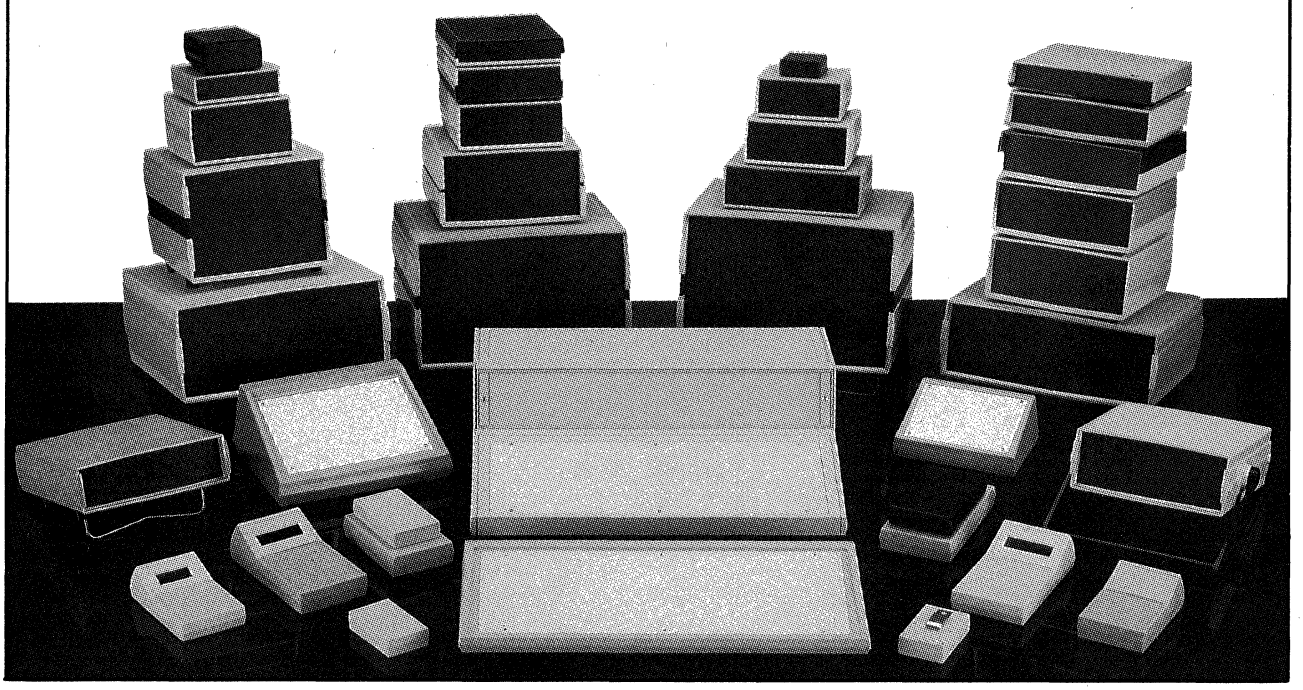
PACTEC®
Division of LaFrance Corp.

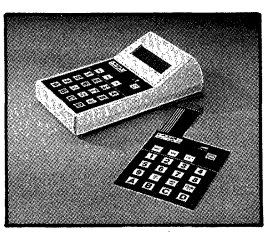
Electronic Enclosures

designed to work for you.



Standard Enclosures • Modified Standard Enclosures • Customization • Design Support

- **Standard Enclosures** - More than 118 models are currently in production. In stock at electronic distributors throughout the U.S.A. and worldwide. Standard Enclosures may be ordered as Prototype Kits (with all components necessary to assemble one enclosure) or as Production units (supplied without panels, card guides or mounting rails in certain models).
- **Machine Modified Standard Enclosures** - Modifications are made by CNC machining of standard models.
- **Custom Modified Enclosures** - In-mold modifications are made using unique, low cost tooling for specified "insert" areas of the enclosure. May be combined with CNC machining.
- **Custom Enclosures** - Contact factory for design support and quotations.
- **Prototype Kits** - Contain all components needed to assemble one unit. Certain C and CL Models are available in Kits which can be easily assembled into a choice of pre-selected heights; see page C•1073
- **Design Support** - With more than forty years experience in design and production of quality products the PacTec engineering staff can collaborate in every phase of your product design cycle; from pre-production prototype to totally custom original designs. Modifications can be made to top and bottom covers, front and rear panels and includes provisions for positioning PCB's and LCD's, controls and access points for Input/Output devices.
- **Other Available Literature** - Representative/ Distributor List, Price List, EMI/RFI Shielding & Material Properties, Engineering Drawings.



- **Custom and standard Membrane Switches** see page C•1075
- **Custom Printed Overlays** see page C•1076

see pages C•1070 thru C•1076

ENCLOSURES THAT PROTECT AND LOOK GOOD TOO!

Altech/Spelsberg enclosures provide needed protection in a functional and creative way while enhancing the value of your product with their appealing designs. Innovative housing for electrical/electronic/pneumatic components; terminal blocks and assemblies; meters, switches, sensors; and DIN rail mount circuit breakers and devices. Choose from our wide selection of sizes and styles.

- Dust and Moisture Proof
- Non-Corroding, Chemical and Impact Resistant
- International Approvals
- Fully Gasketed with Polyurethane Seals
- Precision Molded Polystyrene, Polycarbonate, or Glass Reinforced Polycarbonate
- Available with Transparent or Gray Covers
- NEMA 4X
- Smooth or Knockout Sidewalls
- Selection of Cover Heights and Styles
- Special Colors Upon Request
- Easily Customized
- Complete Line of Accessories Available

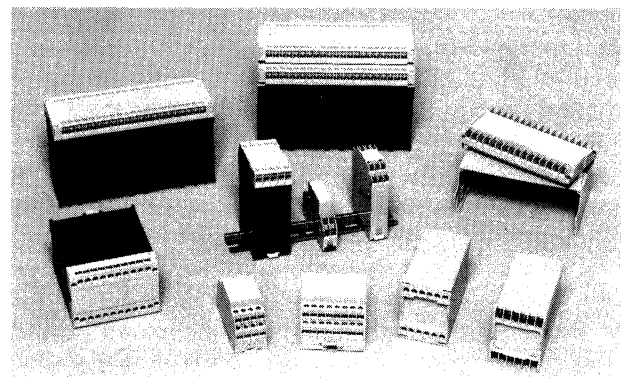
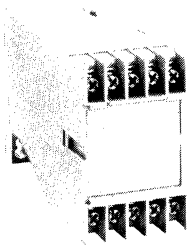
ELECTRONIC HOUSINGS DIN RAIL MOUNT

Advances in electronic and electrical technology have put increased demands on housings. Altech's contemporary, nonmetallic electronic enclosures are designed to help you package your devices for the world market. Compace in size, they are ideal for housing electrical, electronic, electromechanical devices including relays, timers, interfaces, controllers, printed circuit boards and more! Quick and easy front wiring. Snap onto standard DIN rail or panel mount.

- Complete With Terminals
- Touch Protection
- Copper/Tin Plated Solder Tabs
- Verrilium Copper Contacts
- UL94 VO Materials
- Up to 25A, 18-12 AWG
- Easily Customized, Imprinted
- International Acceptance
- Panel Mount Adapters Available





K70

Removable front panel for easy insertion and removal of printed circuit boards; integral printed circuit board guides. Some versions available with pluggable terminals, pressure plate connection. Available in 7 sizes.

- Material: Polycarbonate
- Standard Color: Gray
- Up to 25A (Pluggable - 10A)
- Terminal Covers Optional

AMCOBILITY

AMCOBILITY Wraps It Up Beautifully

If it's electronic, AMCO can package it. That's a big claim, but we've got big experience in every kind of enclosure you can imagine. From single frames to multi-bay consoles in every size and shape. We've got colors, trim, and styling options for every decor and application.

Our new Monitoring Consoles for broadcast and security applications exemplify AMCObility at it's best – versatile, flexible, technically elegant, and built with AMCO's fanatical attention to quality.

If you're on a budget, but still demand the best, check out our new Frugal Frame line. It's the same famous AMCO quality simplified and standardized. Ask for Catalog #100.

That wraps it up. When you've get our full line catalog #800A, you've got AMCObility in your hands, for all your electronic packaging needs.

AMCOBILITY

AMCOBILITY Can Do It In 5 or 10 Days.

In a pinch? Can you live with a selection that's merely *vast* instead of *humongous*?

All you need is a phone in one hand and our stock-item catalog in the other. There's 44 pages of consoles, computer desks, workbench and portable cabinets, cooling devices and accessories, that we can ship to you in five working days! Even if you're particular about colors, we can ship in only ten working days.

If you're working calmly and well ahead of deadlines, great! But maybe you should call for Catalog #500B today, just in case there's an emergency tomorrow.

AMCOBILITY

AMCOBILITY Means Innovative Solutions for the Toughest Shielding Problems

When a system needs protection, you need AMCObility. We created the first modular shielded enclosure system for NASA's Saturn Booster Program, with quality requirements that were out of this world

AMCO builds shielded cabinetry for the most demanding industrial and military applications. Our commercial cabinets meet all FCC regulations on radiated emissions.

The new AMCO E^3 **Omega** line is a result of an engineering breakthrough in protection against electromagnetic environmental effects. E^3 Omega qualifies for a multitude of Tempest type applications and exceeds MIL-STD requirements for shock and vibration.

Any shielding problem you can imagine, AMCO can help with.

Ask for Commercial Catalog #650, Heavy Duty Catalog #204, and the new E^3 Omega literature.

AMCOBILITY

AMCOBILITY Provides Simple Solutions For Complex Problems.

Not just simple: It's also incredibly strong and extremely versatile.

This is Amco's heavy duty aluminum framing system. All you need is a mallet and a few wrenches and you've got enclosures built precisely to your needs.

You decide the shapes and sizes.

You can build enclosures from eight inches to twenty feet in any 90-degree plane. Use non-locking or locking clips for prototyping or permanent assemblies. For extra strength, just add bolted corner gussets.

The Optimum weight-strength ratio.

Pound for pound, Amco's aluminum framing is stronger than steel, and our corner locking method actually surpasses welding. This system has withstood some of the world's toughest applications, like NASA installations and missile launch systems.

Anticipating some tough enclosure problems? Get all the details on Amco's high-strength aluminum framing system in Catalog #203.

GREAT VARIETY OF RACK-MOUNT CHASSIS FOR YOUR SELECTION

from

STANDARD ENCLOSURES

Series 10 and 11, have steel top, bottom and side covers all .045" thick and grilled for excellent heat dissipation, aluminum front (.125", anodized) and back (.06", painted) covers that facilitate making of holes.

series 12 and 13 are all aluminum with .06" panel thickness and standard with black or clear anodized finish. An additional second front panel for mounting meters or switches is included for improving the flexibility and strength of the chassis.

The series 14 and 16 are semicustom all aluminum with standard ilodine finish, and available in any size and material thickness with optional custom hole punching, EMI/RFI shielding, anodization, color painting, and silk screening. Series 14 is extra heavy duty construction (.188" front and .09" side panels) with EMI/RFI shielding. Most semicustom enclosures will be delivered from 2 to 10 days.

Series 15 is specially made rack-mount cases solely for PC-XT and PC-AT computers. Stock models include front slotted and rear slotted with 1 to 3 disk driver spaces. Custom modifications are available with reasonable prices. High quality UL listed power supply and 2nd fan are installed as options. Other rack-mount chassis for disk drivers and monitors can be altered to meet your specifications.

Other accessories include: Support rail/plate, 2nd front panels for meters or switches, aluminum blank panels with sizes from 1U to 6U high with all types of finish, and vent panels are also available from stock.

Call for free catalog, quantity discount or other products. Specs, and prices are subject to change without prior notice.

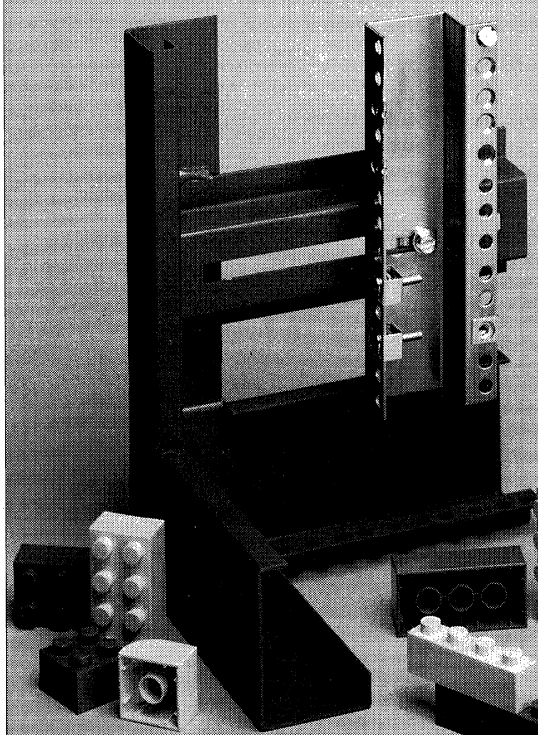
SOLID FOUNDATION



14 Gauge CRS Welded Interchangeable Components

At the very base of an Atlas/Soundolier enclosure is a structurally engineered framework of 14 gauge CRS welded steel with 11 gauge corner caster gussets and 14 gauge mounting rails. It is a multi-formed channel system offering superior interlocking support, convenience, and durability. Best of all, our system is interchangeable which allows you to build with logic and creativity.

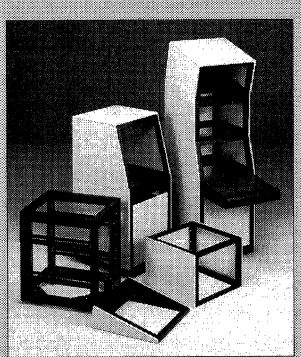
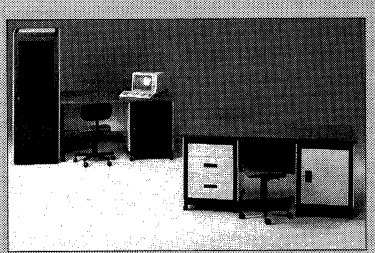
Series V Vertical Cabinets
Steel cabinets are available in seven heights (22-7/8" to 77-1/8"); two depths (25-1/2" and 30"); and three widths (19", 24", and 30"). Order frames and components separately or as assembled units.



Series VI Modular Consoles
Mix, match, or stack welded frame modules on a 22-7/8"H base adding panels, wedges, and other accessories. Order individually or as one of many standard factory-assembled configurations.



Series VII Modular Desks
Stations are available in "table-style" design or with one or two electronic base units. Desks have a 29-7/8"H work surface, 30"D base, and 19"W x 22-7/8"H panel opening.

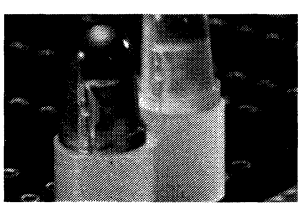
Bivar Hardware for Electronic Components and PCB Assembly

OVER 5000 LOW-COST STANDARD PRODUCTS ARE NOW AVAILABLE FROM STOCK THROUGH YOUR AUTHORIZED BIVAR DISTRIBUTOR.

Now, Bivar's complete family of low cost time saving aids for electronic component assembly and printed circuit board packaging is available through direct distribution.

- A complete selection of mounts/spacers for industry's most popular components.
- Standard designs that answer real application problems.
- Eliminate costly rework/rejects in assembly.
- Printed circuit board packaging aids: Guides/ejectors/handles.
- Immediately available from stock.

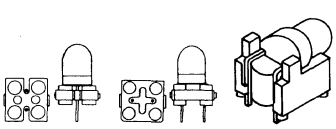
A simple call to your Authorized Bivar Distributor can mean immediate response and delivery, just the kind of service and assistance you need. You can ask for Bivar's complete, 38-page catalog too, including all specifications and prices.



LIGHTED DISPLAY MOUNTS

- ☐ Vertical L.E.D. Mounts
- ☐ T-1 and T-1 3/4 90° L.E.D. Mounts
- ☐ T-1 3/4 L.E.D. Mounts
- ☐ L.E.D. Strip Mounts
- ☐ T-1 L.E.D. Mounts

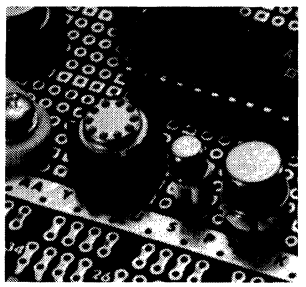
984 standards in heights from .030" through 1.250" in .005" increments.



Across In-line

12 (T-1 3/4) and 15 (T-1) STATION STRIP.

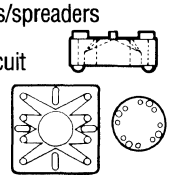
T-1 RIGHT ANGLE MOUNTS.



PERMANENT MOUNTS/ SPACERS

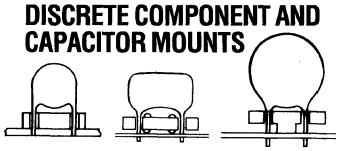
Over 3400 standard low cost styles and sizes from stock...

TO-18 mounts/spreaders
TO-5 mounts
Integrated circuit Mounts Spreaders Converters

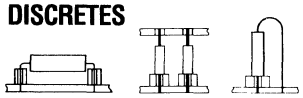


Many BIVAR parts meet MIL-M-38527C

DISCRETE COMPONENT AND CAPACITOR MOUNTS

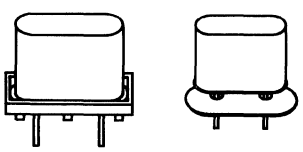


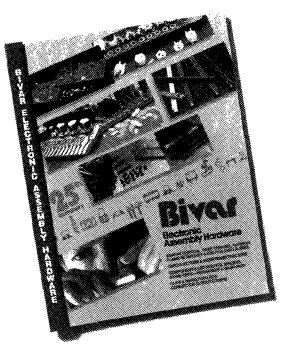
UNIVERSAL SPACERS FOR DISCRETES



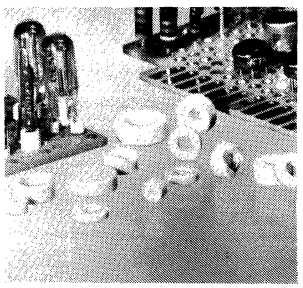
Dual in-line mounts
TO-5/TO-18 covers and shields

CRYSTAL MOUNTS AND INSULATORS



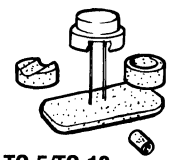


ASK FOR YOUR FREE COPY OF OUR NEW CATALOG! OVER 5000 GREAT IDEAS!



WASH-AWAY SPACERS

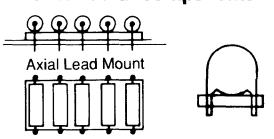
Over 500 standard sizes...
To improve positioning, protect leads during assembly, and reduce rework & rejects.

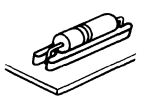


For DIPs, TO-5/TO-18 Transistors & Semiconductors...

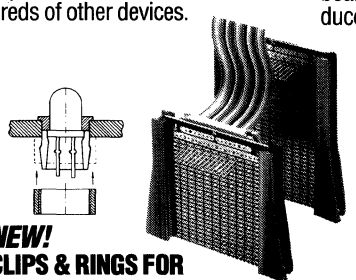
DIP Mount Transistors

Axial & Radial Components...

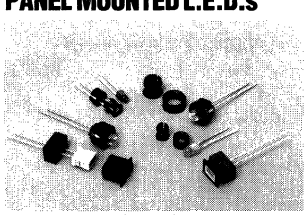




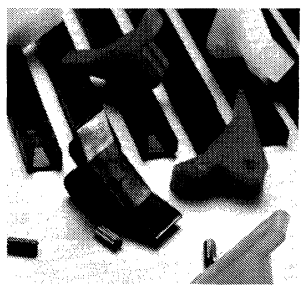
And a complete selection of general purpose & solid spacers for capacitors, cordwood & hundreds of other devices.



NEW!
CLIPS & RINGS FOR PANEL MOUNTED L.E.D.s

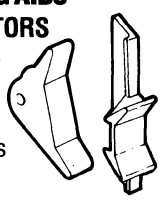


Ideal for T-1, T-1 3/4 & Rectangular L.E.Ds.
All available from stock.



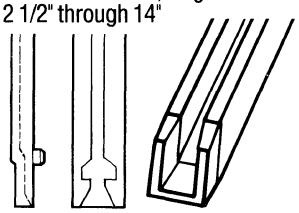
PRINTED CIRCUIT BOARD PACKAGING AIDS

CARD EJECTORS
18 standard & locking styles

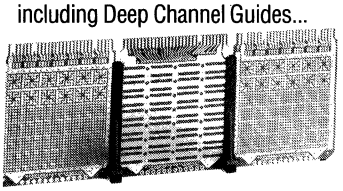


4 PCB Handles

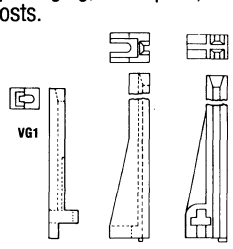
SNAP-IN CARD GUIDES
52 standard sizes; lengths from 2 1/2" through 14"



including Deep Channel Guides...



VERTICAL CARD GUIDES
for individual, paired, or tandem board packaging; save space, reduce costs.



CONNECTOR CUT-OUT COVERS

20 standard sizes & styles for "D" subminiature, microribbon & "D" hole cutouts. Made from black ABS, UL rated 94V-0.

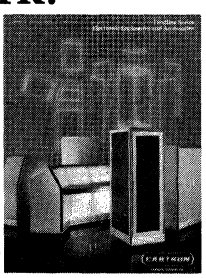
Standard or Modified— Cabtron has the enclosures to make *your* designs work.

Cabtron's electronic enclosures are designed for maximum efficiency—whether used for automatic test equipment, communications, military, security, video, medical, industrial, or other applications. Our large selection of standard sizes, coupled with distinctive styling and a fully integrated, modular parts system, offer you the ultimate design flexibility required in today's market.

Cabtron also offers one of the largest selections of accessories in the industry, while attractive trim packages help you finish your enclosures in style. In addition, our skilled technicians will match any color, punch any size hole, or assemble any cabinet configuration to meet your specifications.

Put Cabtron's more than 20 years' experience in electronic enclosures to work for you. For the name of your local representative and your FREE Firstline catalog, contact Cabtron at:



1-708-498-6090

Standard Features

- 12, 14, or 16 gauge steel frame.
- 11 gauge corner gussets for added strength on vertical rack and console models.
- Horizontal cowlings, vertical frame channel, horizontal top channel, and bottom caster plates all seam welded together for extra strength and rigidity.
- 11 gauge mounting angles have tapped holes on EIA patterns.
- Removable bottom panel for computer floor access.
- Front and rear grills with cleanable air filters engineered to accept exclusive Cabtron blower system.
- Frame provided with knock-outs for easy mounting of casters.
- Casters purchased at time of order installed at no additional charge.
- Free hardware kit includes four 10-32 panel screws for every 8¾" of front panel space and joining hardware for multi-bay configurations.
- Choose from 10 standard textured finishes. Combinations of standard colors available at no additional cost.

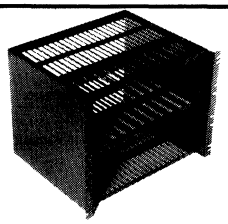
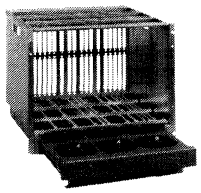
CALMARK® . . . A Leader in Packaging Hardware

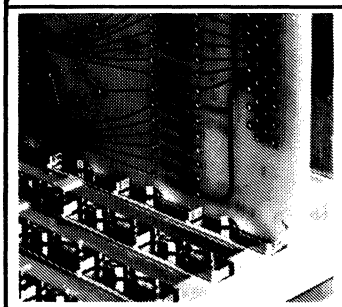
Compare our range of products



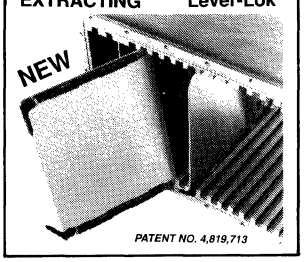


CARD CAGES

Custom designed and fabricated to meet customer requirements.
Also, Eurocages-VMEbus & MULTIBUS II compatible.

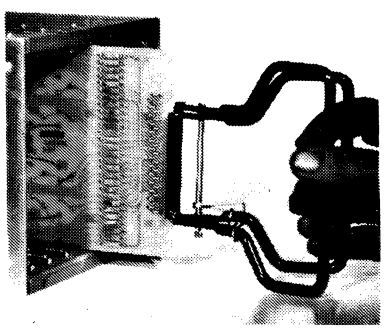


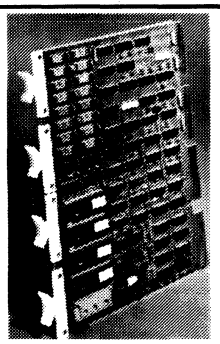
Series LE260
"EXTRACTING" Lever-Lok



CARD RETAINERS CARD-LOKS

Excellent thermal and electrical conductivity, plus protection against shock and vibration.



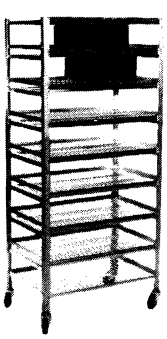


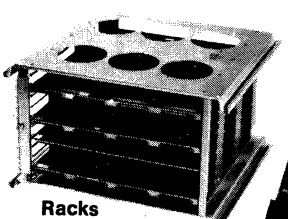
CARD PULLERS

For easy PC card extraction.

PCB HANDLING PRODUCTS

Trays, Racks and Carts for safe and efficient handling, transport, and storage of PC boards during all stages of production. Available with static resistant or conductive material.

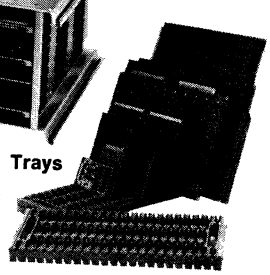


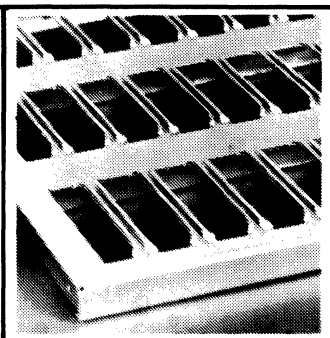


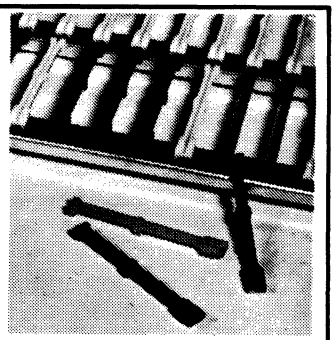
Racks

Carts

Trays



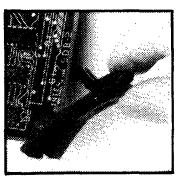


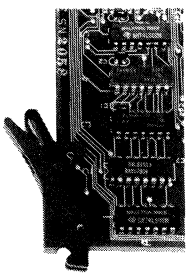


CARD GUIDES

Metal louver and nylon snap-in.

NEW





Series 107-70
Positive Locking
PC Inserter-Extractor

Patent No. 4,975,073

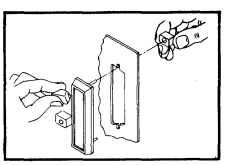
CARD INSERTERS & EXTRACTORS

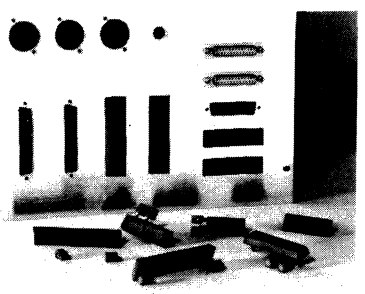
For easy insertion and extraction of cards.

- Available in colors for coding • Generous area for hot stamp marking.
- U.L. Approved • Available with pre-started assembly pins.

CONNECTOR ACCESSORIES

For "D"-subminiature rectangular connectors.





Cutout Covers

ELECTRONIC COOLING PRODUCTS

Fan Tray Assemblies offer standard mounting with multiple and adjustable fan locations. Cabinet Blowers for cooling of electronic rack equipment. For Special Applications Calmark will design an airmover to meet specific requirements.

MINIGLOSSARY ENCAPSULATION

MATERIALS/HANDLING

Catalyst: A substance which changes the *rate* of chemical reaction. Very small quantities can cause fast change.

Conformal coating Sprayed or dipped. A thin conformal jacket which protects an assembly from moisture or other degrading environments.

Curing agent: See catalyst.

Hardener: See catalyst.

Hermetic: A permanent gas-tight seal.

RTV: Room Temperature Vulcanizing. Associated with silicone rubber sealants which vulcanize at room temperature.

Thermoplastic: Plastic materials which can be made to flow *repeatedly* with the application of heat.

Thermosetting: Plastics which once cured cannot be made to flow again.

Thixotropy: The property of a coating compound which has low viscosity when agitated, but which thickens when the agitation ceases.

Viscosity: Measured in units of *poise* or *centipoise*. The property of a liquid which resists internal flow. Low viscosity equates with thin and vice-versa.

PROCESSING

Casting: Parts or assemblies are placed in a mold. Encapsulating material is added and cured. Part is then removed from the mold.

Dip coating: Part or assembly is dipped into the encapsulating material. Final thickness is determined by number of dips, viscosity, rate of withdrawal, and temperature.

Embedding: Wherein an encapsulant substantially fills all voids in and about an assembly.

Impregnation: A process of encapsulation involving evacuating all air and then allowing the encapsulating material to flow in and fill all voids.

Molding: Similar to casting except this process usually implies multicavity molds and costly machines.

Potting: Wherein the part or assembly is immersed in an encapsulating material contained in a shell which becomes a permanent outer surface after curing.

DIELECTRIC

Arc resistance: An encapsulant's resistance to the formation of a conductive path or track. Measured in time.

Breakdown voltage: The voltage at which an encapsulant fails electrically.

Capacitance: The property of conductors and dielectrics which allows the storage of an electrical charge when the voltage is applied.

Corona: A luminous discharge of electricity due to air ionization when a certain voltage is reached. Can be internal or external. The formation of ozone can cause rapid deterioration of certain materials.

Dielectric: Insulator (Nonconductor.)

Dielectric constant: The property of a material that determines its ability to store electrostatic energy.

Dielectric strength: The ratio of dielectric breakdown to the thickness of insulating material.

Dissipation factor: The ratio of a dielectric material's energy losses.

Flashover: Point at which an electric discharge occurs around an edge or across a surface. Can result in a carbon track and permanent degradation.

Insulation resistance: (IR) An insulating material's total DC leakage.

Surface resistivity: The resistance of the surface of an insulating material to the flow of direct current.

Voltage endurance: Sometimes called corona resistance. The ability of a material to withstand the application of sustained high voltage.

Volume resistivity: The resistance of a material to direct current flow as a measure of volume. Expressed as ohm-centimeters.

COMPAC™

NEW PRODUCT!

SRF SERIES

Compac's "New" SRF Series yields greatest shielding effectiveness thru 20GHz of ANY standard product on the market today

SRF Series Enclosures

- ☐ Sheilding at or above 80 dB
- ☐ Enclosures tested to 20GHz
- ☐ Provides atmospheric seals, gas tight seals attainable with higher clamping forces
- ☐ Independent access from either side
- ☐ Greater Interior Acreage

Construction Specs: Case—AL 6063T52 Covers—AL 5052-H32 finish chemical film per MIL C 5541 Class 1 A
Conformance to MIL 45208A

CUSTOM
FROM COMPAC'S RFT SERIES

Compac will modify our RFT Series Enclosures to meet your needs.

- Drilling
- Tapping
- Milling
- "D" Punching
- Cut Outs for Subminiature Connections
- Silk Screening, Painting

Work is done from your prints or to your specifications.

For your convenience Compac has included on page 7 a request for quote with a rendering of a Compac Case to depict your modifications.

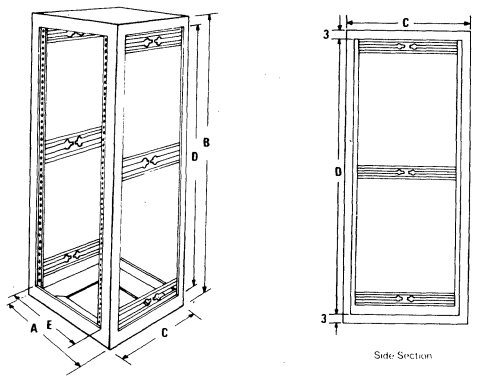
Electronic Enclosure Systems... By D.L. Custom

VERTICAL ENCLOSURES

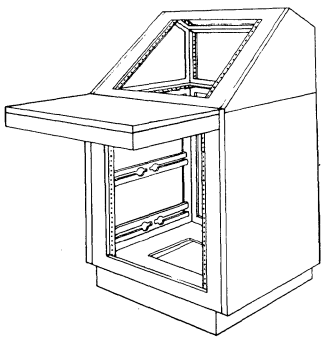


• 14 ga. CRS frame • 12 ga. CRS mounting angles • Fully seam welded • Corner posts recessed 1/2" to panel mounting angle • 10" x 10" cutout with cover plate in bottom • One pair of mounting angles • Four levellers mounted on frame • Open tops available—please specify

D.L. Vertical Enclosures offer modern, streamline styling, standard panel openings, accessibility, for multi-bay systems and a distinctive looking dress trim.

Our enclosures compliment our customer's product and offers protection while in transit and particularly while in use. Our high-strength-to-weight design is a unique feature we recommend you consider.

CONSOLES



MATERIALS:
- 14 ga. CRS turret
- 14 ga. pedestal
- Formica writing tops (pressure bonded to particle board)

CONSTRUCTION
- Seam welded (all welds ground smooth)

FINISH
- Textured or smooth baked on enamel.

The D.L. line of consoles may be used in a variety of arrangements. Standard door and panel options, either plain or louvered, are available; as well as a complete selection of standard or special colours, plus two-tone combinations.

Our engineering facilities are well staffed to service your problem areas and assist in standard assemblies. We welcome your inquiries.

Consider these features:
- Any turret shape can be designed to suit your individual packaging requirements.
- Multiple, semi-circular or special configurations are available.
- Ease of access to turret top and base.
- Turret top or base may be ordered separately.
- Choose from five standard D.L. Console face openings. Any opening can easily be standardized, based on the D.L. Console style.
- Each opening comes with mounting angles.

EMI-RFI SHIELD ENCLOSURES

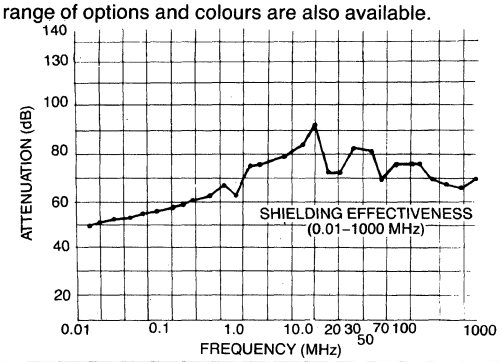
D.L. CUSTOMS E.M.I. R.F.I. Shielded Enclosures

Frame Construction:
- 14 ga. Frame fully seam welded
- Zinc plated for E.M.I. R.F.I. Shielding
- Locking front & rear door
- Sealed top & bottom panel
- 12 ga. Zinc plated mtg. rails (tapped 10/32)
- 16 ga. Doors & Side panels
- Recessed base

Also available 23" and 24" Rack mtg. Shielded Enclosures.

Shielding tests were conducted to Mil. standard 285.
A Nominal 65 D.B. Shielding effectiveness through the frequency range of 20MHz to 1000MHz with results as high as 85 D.B. at some levels. Full test results available.

A full range of options and colours are also available.



DATA DESK

Data desks are designed for computer room environment, where modern styling and functional requirements are a must. These desks are built rugged to take heavy electronic equipment placed on the work surface and the pedestal section allows for rack mounting of electronic equipment. Pedestals have the same capabilities as a vertical enclosure. Also drawer files may be added to enable the desk to be used as a conventional desk.

INNOVATIVE SOLUTIONS FOR YOUR TRANSPORTATION AND OPERATIONAL REQUIREMENTS

ECS Composites manufactures comprehensive families of enclosures, transit cases, EMI/RFI shielded products, conductive thermoplastic moldings, Thermo-stamped (TSC) Composite moldings, and proprietary end-user products.

In addition to standard designs, ECS offers a wide variety of options and custom product capabilities...meeting design challenges with innovative engineering solutions and sophisticated production techniques.

Proven in over 25 years of service, ECS' products meet or exceed the most demanding commercial and military requirements.

Write, call, or Fax for our new catalogue detailing Custom Molding Capabilities, 19" Enclosures, and Transit Cases.

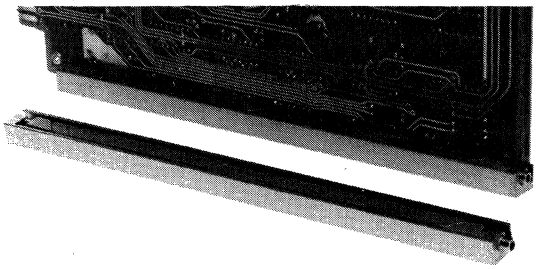
EG&G BIRTCHER

- *Electronic Packaging Products*
- *Custom Metal Fabrication*
- *Printed Circuit Board Hardware*

LEADERSHIP IN PC BOARD RETAINER TECHNOLOGY

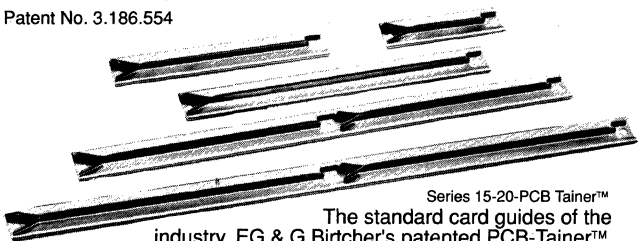
SERIES 340-WEDGE-TAINER™



EG&G BIRTCHER'S Series 340 Wedge-Tainer™ locking retainers are designed for heavy shock, vibration, and heat dissipation, in cold plate/heat sinking applications.

PCB-TAINER™ CARD GUIDES

Patent No. 3.186.554

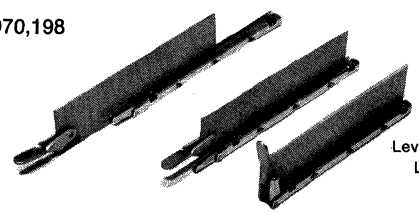


Series 15-20-PCB Tainer™

The standard card guides of the industry, EG & G Birtcher's patented PCB-Tainer™ card guides provide an economical way of securely fastening PC boards. EG & G Birtcher PCB-Tainer™ card guides come in standard or made-to-spec versions. They are made of cold rolled steel or beryllium copper for rivet, weld or adhesive bonding installation. They provide heat dissipation, electrical grounding, retention in shock and vibration applications.

LOK-TAINER® RETAINERS

Pat. No. 3,970,198



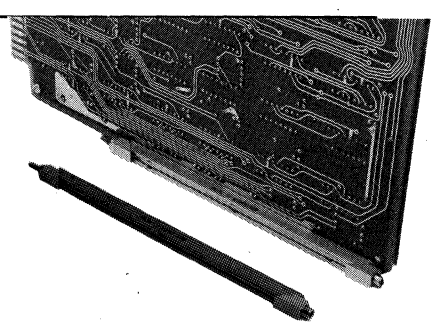
Series 24
Lever Actuated
Lok-Tainer®

Series 127
Screw Actuated Lok-Tainer ®

EG&G Birtcher patented screw and lever actuated Lok-Tainer® locking retainers are designed to provide high resistance to heavy shock and vibration while maintaining maximum contact for heat dissipation.

SERIES 40 WEDGE LOK™

Meets or exceeds the performance requirements of drawing 84103 Rev. E, Defense Electronics Supply Center, Dayton, OH 45444.

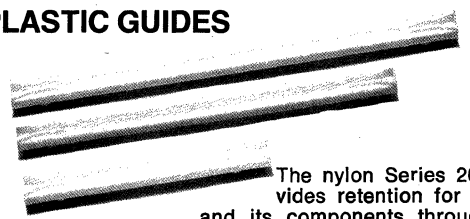


EXTRACTORS CARD HANDLES, AND INJECTOR/EXTRACTORS FOR PC BOARDS

Injectors/Extractors

Extractors provide for quick, damage free, removal of PC card. Injector/Extractors function in two different directions allowing the card to be easily inserted into the connector as well as providing quick removal.

PLASTIC GUIDES

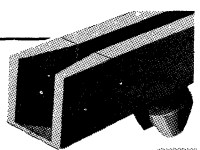


Series 26
Plastic Guides

The nylon Series 26 Guide provides retention for the PC card and its components through a unique gripping action. It is self-lubricating, non conductive with superior strength and durability.

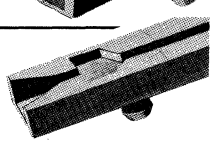
DEEP CHANNEL GUIDES

Nylon Type 6/6
For 1/16" and 1/8" P.C.B.'s



SPACE SAVER GUIDES

Nylon Type 6/6
For 1/16" P.C.B.'s



WEDGE-LOK™ LOCKING RETAINERS

For high-rel performance in commercial, industrial or military applications, secure PC boards with Wedge-Lok™ locking card retainers. LOW COST STANDARD VERSIONS ARE AVAILABLE FROM STOCK.

SERIES 41 WEDGE-LOK™ RETAINERS

LOW PROFILE VERSION OF 40 SERIES

SELF-ALIGNING FIVE-PIECE WEDGE-LOK™ RETAINERS

Pat. No. 4,823,951

EG&G Birtcher offers self-aligning Wedge-Lok™ Series, 40-5 and 42-5 designed for heavy shock, vibration and heat dissipation, in cold plate/heat sinking applications. Features zero entry force for insertion and removal of PC boards. Other standard and custom styles available. Visual indicator for locked and unlocked position available as an option.

LEADERSHIP IN DESIGN SOLUTIONS TO YOUR PCB SHOCK, VIBRATION AND THERMAL PROBLEMS

EG&G BIRTCHER 4505 NORTH ARDEN DRIVE • P.O.BOX 5268,EL MONTE,CALIFORNIA 91734-1268 • (818) 142-2572 • FAX(818)442-8127

EG&G BIRTCHER

- *Electronic Packaging Products*
- *Custom Metal Fabrication*
- *Printed Circuit Board Hardware*

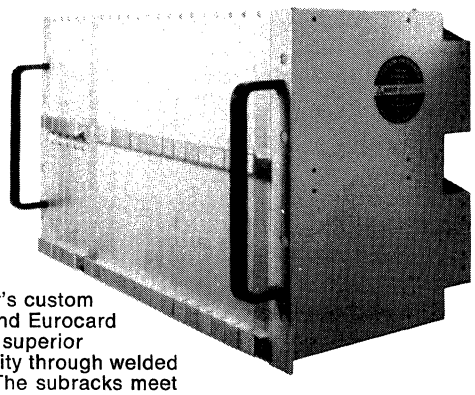
LEADERSHIP IN PC BOARD RETAINER TECHNOLOGY

EG&G Birtcher is a manufacturer of high quality custom and standard products for the electronics industry. We are the leading manufacturer of precision retentive and locking card guides and custom sheet metal racks, chassis and enclosures. We fabricate custom extruded aluminum heat sinks and thermally conductive mil grade enclosures.

QUALITY ASSURANCE

The EG&G Birtcher quality assurance program is in compliance with MIL-I-45208A and MIL-STD-45662. Inspection personnel are trained in Statistical Process Control (SPC). Expertly trained personnel inspect all phases of work to maintain EG&G Birtcher's high quality standards. Receiving, in-process and final inspection are all part of our rigorous quality assurance program.

CUSTOM 6U VME SUBRACK



EG&G Birtcher's custom rugged VME and Eurocard subracks offer superior structural rigidity through welded construction. The subracks meet documented VME Product Specifications per the VMEbus Manual, Revisions C.1. Euro-subracks meet specifications per IEC 297-3/3A and DIN 41494, Parts 1 and 5.

SHEET METAL CAPABILITIES

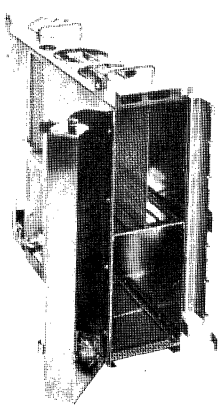
Available to all EG&G Birtcher customers are the combined resources of the Birtcher facilities and broad spectrum of technical and manufacturing knowledge.

Our fully equipped 60,000 square-foot plant with its top-of-the-line equipment enables us to fill almost any customer requirement including design, shearing, piercing, bending, milling, welding, chemical finishing and painting, silk screening and assembly of hardware.

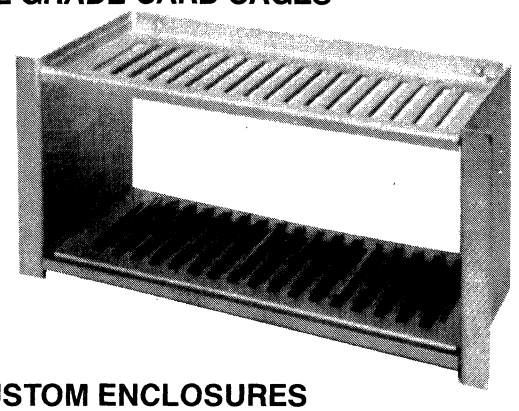
CUSTOM FABRICATION

POWER SUPPLY CHASSIS

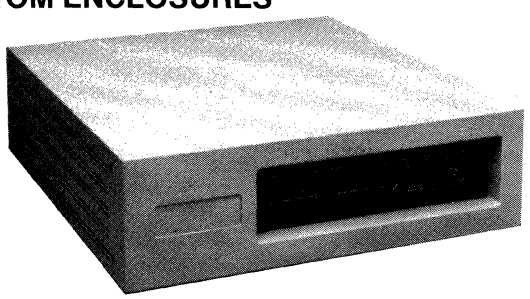
This custom power supply chassis is fabricated from cold rolled steel and perforated sheet metal, complete with formed metal guides, weld studs, self clinching fasteners, grommets, spring clips, hinges and a zinc-plated finish. The chassis is manufactured at a rate of 400 per week utilizing sophisticated numerically controlled punch presses and forming machinery plus welding, stamping, machining and plating.

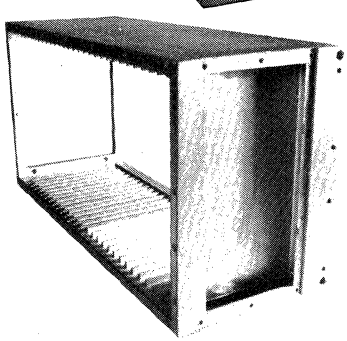


MIL-GRADE CARD CAGES



CUSTOM ENCLOSURES

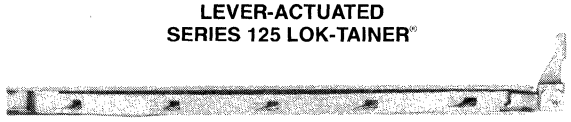




This custom milled and brazed aluminum chassis with five-piece, self-aligning Wedge-Lok™ retainers is an example of the type of Hi-Rel products produced by EG&G Birtcher.

LEVER-ACTUATED HIGH PERFORMANCE SERIES 125 LOK-TAINER®

LEVER-ACTUATED SERIES 125 LOK-TAINER®



PATENT PENDING **RIGHT HAND MODEL SHOWN**

FEATURES

- No Tools Required To Lock Or Unlock PC Board
- Unique Cam Detent Prevents Unlocking During Shock and Vibration
- Visual Locking Indicator With Failsafe Design
- Constant Pressure Insures Uniform Heat Transfer
- Field Repairable
- Low Thermal Resistance (<2°C/Watt/In)

APPLICATIONS

- Shipboard-Airborne-Space
- Designed To Meet Requirements Of MIL-STD-901 And MIL-STD-810
- SEM-D&E
- 1/4, 1/2, 3/4, And Full ATR Modules
- Line Replaceable Modules (LRM)

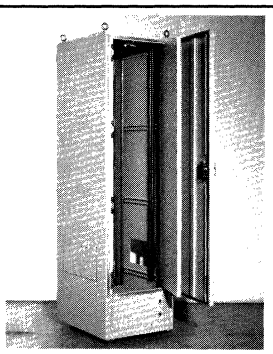
Electronic Enclosures Quality Now Available in a Bolt-Together

RFI/EMI Shielded Cabinets

- Commercial Level "50"
  Suitable for most FCC and VDE requirements
- Military Level "70"
  Cost effective solution to all but most rigorous requirements.
- High Security Level "90"
- Tempest Level "105"
  State of the Art Performance



The Leader in Shielded Enclosure Technology for over 30 Years

48 HOUR QUICK-SHIP

The most common sizes available when you need them:

NOW

STANDARD FEATURES

- *Quality steel welded construction*
- *Full height vented rear door with key lock*
- *Textured baked enamel finish*
- *2 pair EIA standard adjustable tapped mounting angles*
- *Available with closed or open sides*
- *16" square cable cut-out in base*
- *Top panel has fan cut-out*
- *115v. 15 amp, outlet strip, 6' cord*
- *Decorative aluminum trim*

Aluminum Fabrication

- Quality Control per MIL-I-45208A and FED-STD. 368-A
- Welding Certified to MILSTD 1595A
- Shipboard Applications
- EMI/RFI Shielding
- Shock and Vibration analysis and certification

Custom design value for off-the-shelf prices.

For thirty years Wyle Laboratories Electronic Enclosures has been designing electronic cabinetry specifically for the needs of each customer. And the cost has always been about the same as the off-the-shelf products other companies offer.

Today this kind of special attention is called "value engineering." For years we've just called it "giving the customer more for his money."

At Wyle Laboratories Electronic Enclosures, we still make the highest quality electronic equipment enclosures available. We provide more customized applications than any other manufacturer. Our standard product line is the industry standard. And we're known for quick response to customer requirements.

We also lead the industry in RFI/EMI shielding technology. We provide levels of shielding for FCC compliance to military and high security TEMPEST applications to give our customers cost effective solutions.

We've been putting value engineering into practice for 30 years. Let Wyle Laboratories Electronic Enclosures value engineer your next electronic enclosures solution.

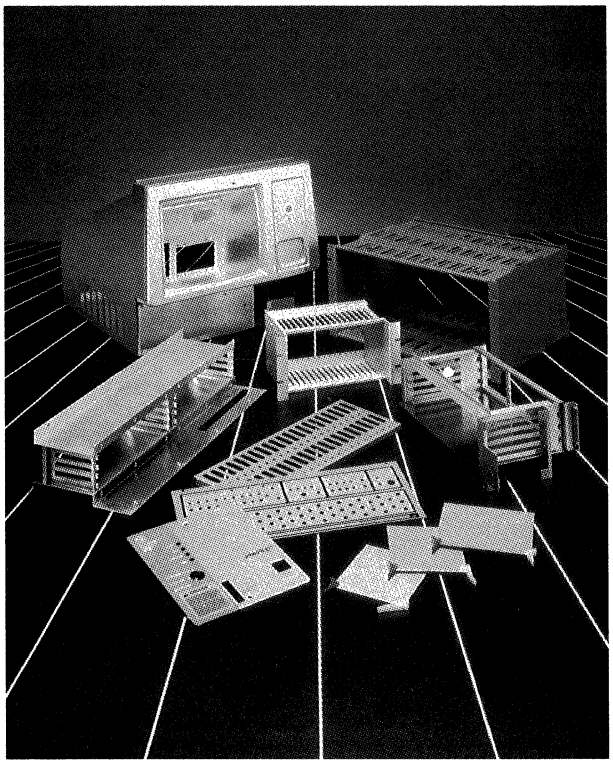
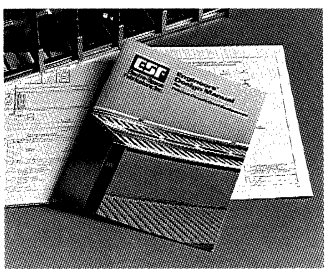
Free Value Analysis of Your Card Enclosure



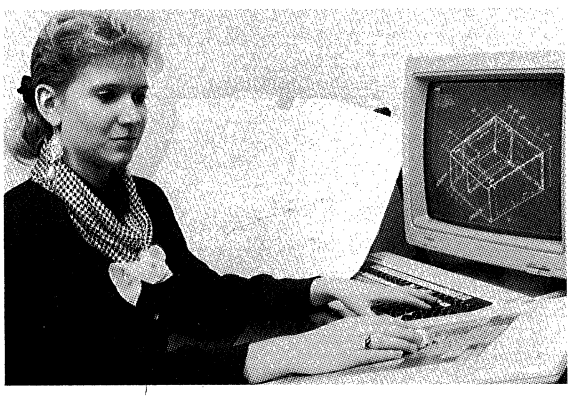
Improved card rack design begins with in-depth value analysis. And that's a free service of the Electro-Space design group ... aimed at delivering greater strength and better tolerances at lower unit cost. Our packaging techniques place no limitations on size, card spacing, special holes and hardware, connector or backplane mounting.

If your rack requirements are 50 or 100, 500 or 5000, why not draw upon our expertise? Our present customers have done so and enjoyed significant savings, both in unit cost and on their production lines. Send us your sketches, prints or sample rack at no obligation. Or call and ask for one of our qualified design engineers.



The Engineer's Design Manual is a compilation of the latest technology and most commonly asked questions concerning card enclosure design. Send for your free copy today.

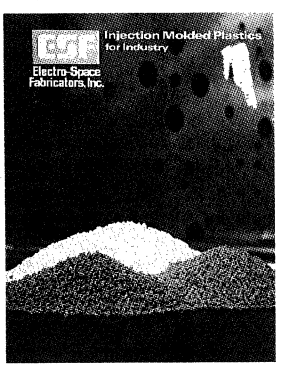
Custom Design Service



- Complete computer-aided design and manufacturing for customized needs
- Latest design technologies
- Quick turnaround on drawings
- Advanced CAD/CAM system shortens lead times in design, speeds up manufacturing schedules
- NC programming
- Efficient file exchange system
- Results in greater structural integrity at lower unit costs

Plastic Injection Molding

ESF's high-tech, high performance injection-molding machines are computer-controlled for fast-cycle molding capabilities and close dimensional tolerances necessary for the highest part-to-part reproducibility. Our plastic technology extends into machining, ultrasonic welding and hardware insertion, EMI/RFI shielding, painting, hot stamping and silkscreening.



- **Statistical Process Control**
  Quality programs can be implemented to your specific requirements
- **UL approved.**
  Recognized under the Component Program of Underwriters Laboratories Inc.

Electro-Space Fabricators, Inc.

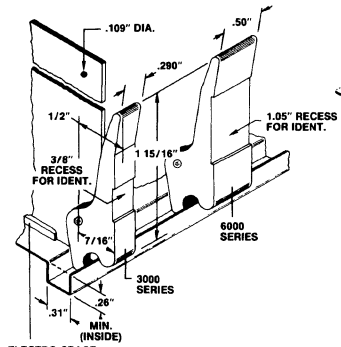
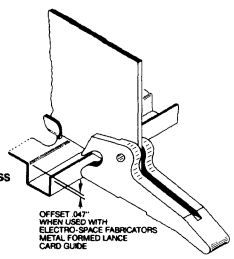
Card Enclosure Accessories

Injector/Ejectors

Unique devices function in two directions ... utilizing both surfaces of a single blade. Design eliminates the need for very close tolerances. The front of PC card should be flush with front of guide plate to insure proper insertion and extraction of card.





Part No.	Card Size	Color	Material
NE-3001-W NE-3001-B	1/16" 1/16"	White Black	Type 6/6 Nylon ASTM D4066 PA111/131 UL94V-2
NE-3003-W NE-3003-B	1/8" 1/8"	White Black	
NE-3001-NGV NE-3001-BGV	1/16" 1/16"	Natural (Tan) Black	30% Glass Filled Type 6/6 Nylon ASTM D4066
NE-6001-NGV NE-6001-BGV	1/16" 1/16"	Natural (Tan) Black	PA 100 G32 F24 UL94V-0

6000 series also features

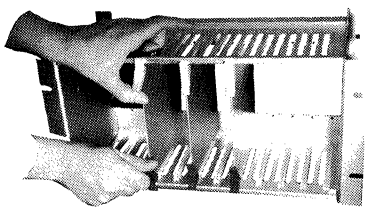
- Bar code recessed identification area for industry standard labeling
- Extra width delivers extra strength for large cards requiring greater insertion/ extraction forces
- Flame-retardant applications ... molded of 30% glass-filled nylon UL 94V-0 material.

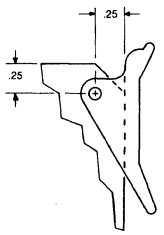
Notes:

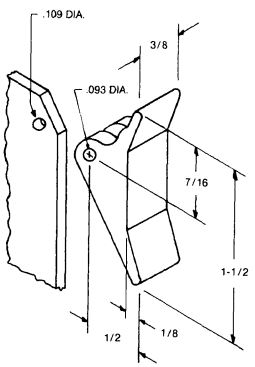
1. Includes stainless steel press-fit mounting pin
2. Special colors available

Ejectors

Improved lever action and greater strength for quick, damage-free extraction. The front of PC card should be flush with front of guide plate to insure proper extraction of card.







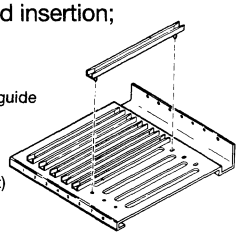
Part No.	Card	Slot	Color
EJ-2001-W	1/16"	.072	White
EJ-2001-R			Red
EJ-2003-W	1/8"	.135	White
EJ-2003-R			Red

Notes:

1. Includes stainless steel mounting pin
2. Type 6/6 Nylon ASTM D4066 PA 111 UL94V-2
3. Special colors available

Nylon Guides

Smooth, effortless slide for board insertion; unique bow feature.



NOTE:

1. 1/64 Radius — All edges except bottom of guide and inside of .070 slot.
2. Molded of Type 6/6 nylon (UL94V-2) and flame-retardant nylon (UL94V-0)
3. Color — White (Special colors upon request)

MOUNTING HOLES:

.125 dia. hole (front)
.120 x .218 slot (rear)
material range .048 to .080

INSTALLATION:

Sharp impact, snap-in.
No special tools or hardware required.

A-42870	A	B	C	D	Material

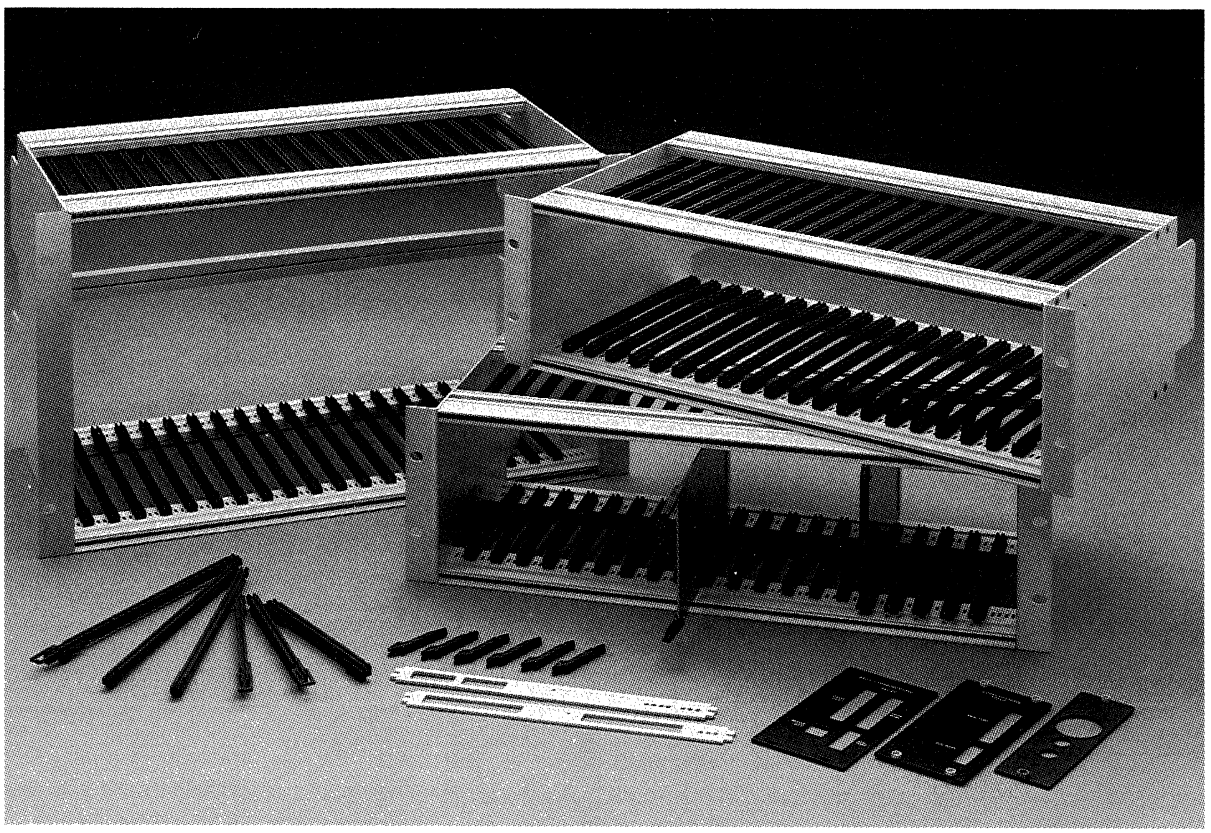
Electro-Space Fabricators, Inc.

EURO Packaging Systems



Get higher quality, lower cost and faster turnaround... ESF, the nation's leading card enclosure manufacturer, now offers improved EURO Packaging Systems.

Expect rugged, reliable sub-racks... for demanding environments, either completely assembled or unassembled.

Select from a large inventory... standard EURO sub-racks and accessories for 3U, 6U, 9U and 12U sizes.

Order quickly and efficiently... six easy steps on our new order form help you determine card depths, backplane insulator needs, mounting bar and card guide styles, card positions and assembly requirements.

Specify your own design... complete customizing capability without unnecessary expense or loss of time. Full computer-aided design service available.

Free Eurocard brochure ... includes easy-to-order form.

Specifications
ESF's standard Eurocard racks are made of rugged aluminum extrusions for vibration resistance. The following materials and finishes meet the highest specifications requirements for electronic equipment:

Aluminum Extrusions		**Finish**	
Sub-Rack Rails	6105 T5	Aluminum	Clear iridite MIL-C-5541C
Mounting Ears	6061 T6	Steel	Zinc Plate QQ-Z-325
Side Plates	5052 H32	**Plastic Parts**	Flame-Retardant Material UL94V-0
Front Panels	6061 T6	**Hardware**	Stainless Steel (unless otherwise specified)

Specifications subject to change without notice.

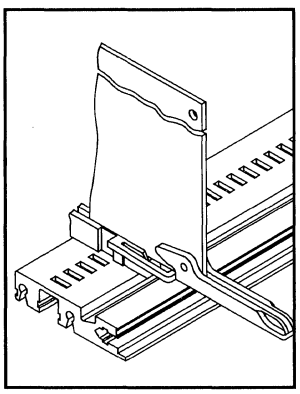
Electro-Space Fabricators, Inc.

Electro-Space Fabricators, Inc. ESF

Eurocard Accessories

400 Injector/Ejector

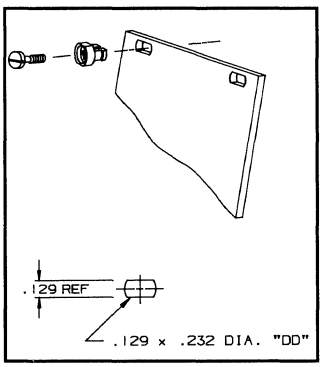
- Assure easy, damage-free insertion and extraction of 1/16" thick Eurocards.
- Used in conjunction with ESF 510 series guide which allows device to function in two directions for insertion and card removal.
- Unique locking dimple in handle grips card firmly in locked position.
- Functionally compatible with most other Eurocard enclosures.
- Molded of flame-retardant 30% glass-filled Type 6/6 black nylon (UL94V-0) to assure maximum rigidity and minimum deflection during operation.
- Includes .093 diameter stainless steel mounting pin.
- Two injector/ejectors recommended for larger boards to ensure straight-line removal.
- Part # 400-062BGV

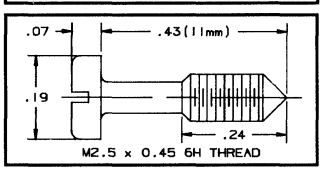


Eject Position

700 Collar Screw

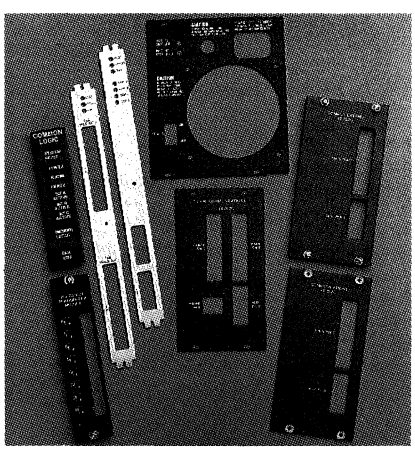
- M2.5 x 11mm
- Polished 302 stainless steel ensures non-stripping of threads.
- Used for fastening front panels to EURO sub-racks.
- Works in combination with ESF's 725 plastic retainer sleeve or 750 metal retainer sleeve.





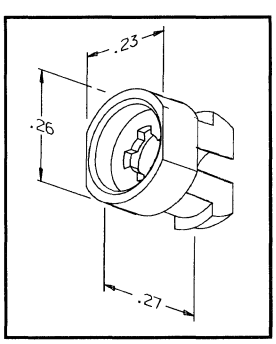
Front Panels

- Fully customized panels, complete for immediate use.
- Rapid turnaround and competitive pricing.
- Add special cut-outs, holes and hardware as needed.
- Specify desired finish — anodize, iridite or paint.
- Silkscreened — single or multi-colored
- Material — .100 aluminum 6061-T6 or customer specified.

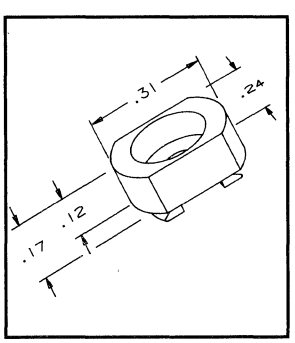


725 Plastic Sleeve and 750 Metal Sleeve

- Used with 700 panel screw for fastening front panels to EURO sub-rack horizontal rails.
- Metal sleeve is pressed into prepunched holes in panel for positive grounding to chassis.
- Plastic sleeve snaps into prepunched holes in front panel.
- Captivate 2.5mm screw.
- Metal sleeve finish — nickel-plated.
- Plastic sleeve material — tan ABS (UL94V-0); self-extinguishing.



725 Plastic Sleeve



750 Metal Sleeve

OR a logical operator
OSI open systems interconnection

P
PAL programmable array logic
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
PCS plastic clad silica
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon-controlled switch
SDA source & detector assemblies
SGMP simple gateway monitoring protocol
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SNMP simpole network management protocol
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid-state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAN value-added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

ELMA

ELMA Electronic Inc.

25 JAHRE ANNÉE YEARS ELMA Electronic

Elma's Modular Enclosures

A Member Of The Sulzer Group, 41440 Christy Street, Fremont, CA 94538 • (415) 656-3400

All ELMA products are available off-the-shelf and REASONABLY PRICED

General Information

ELMA enclosures are designed for ease of assembly, versatility, and durability. Their modular design offers virtually unlimited electronic packaging flexibility. Standard Eurocard (100 x 160 mm, 3.94 x 6.30 in.) and card sizes derived therefrom are easily accommodated. Compatible to VMEbus and MULTIBUS II board formats. With internal subdivisions, any card size can be used. In addition, all edge connectors currently in use can be fitted using supplementary assembly sections.

Material

Aluminum extrusions form the framework of all these **ELMA** cabinets. Front and rear panels are 2½ mm clear anodized aluminium sheets. Cover panels are either 1.5 mm colored, vinyl coated aluminum sheet (models 14, 32, 36) or 3 mm colored, vinyl coated alucobond (two sheets of aluminum separated by a polyethylene core).

Accessories and Colors

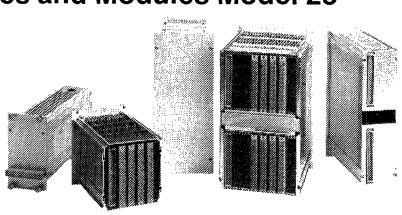
Front and rear panels are accessories on all models except 36, for which rear panels are included. Hinged and folding front panels may also be obtained in a variety of sizes for some models. Extruded front panels in various heights and widths can be used for plug-in modules. Aluminum handles are also available.

Cover panels are included on models 32 and 36. Standard colors are gray and blue (model 36.) Graphite black, and brilliant blue cover panels are available on special order. Perforated top and bottom panels may also be obtained.

Dimensional Units
1U = 1.75", 1T (HP) = 0.20"

The overall height of modules, card frames and plug-in cases and the acceptance height of cabinets is based on height units (U) per DIN Standard 41494. One U equals 1¾" or 44.45 mm. The 5.08 mm (2/10") horizontal pitch unit T is used for the acceptance width.

Cassettes and Modules Model 23



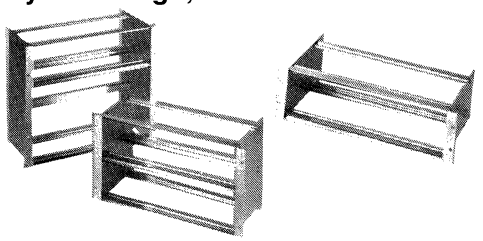
Application: Cassettes and Modules are designed to accept single or double Eurocards/VME cards with depths of 160 mm or 220 mm. These modules are also designed to house VXI C or D size cards in addition these modules can be used to house any components. Both cassettes and modules are plug in units. The PC board carrying the plug connector is firmly attached to the side extrusions.

Heights: 5.25″, 10.50″ (3U,6U)

Widths: 1.4" (7T), 2" (10T), 2.8" (14T), 4.2" (21T), 5.6" (28T), 8.4" (42T)

For card depths: 6.30″, 8.66″ (16 mm, 220 mm).

Economy Card Cage, Model 11



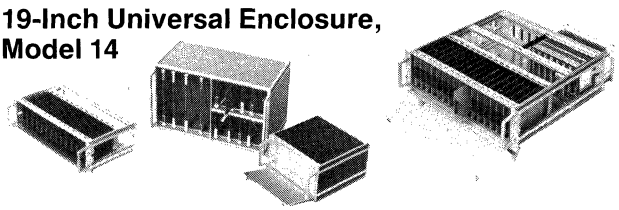
Application: The Model 11 is designed to accommodate single (3u), double (6u), and triple high (9u) Eurocards with depths of 160 mm, 220 mm, 280 mm, 340 mm and 400 mm. It can also accept card heights of 4.4″, 4.5″ and 9.65″. It is fully compatible to VMEbus, MULTIBUS II and Sun Systems.

Height: 5.25" (3u), 10.50 (6u), 12.25" (7u), 14.00" (8u), 15.75" (9u)

Widths: 8.4″, 16.8″.

Depths: 8.50″, 10.87″, 13.23″, 15.61″, 17.98″.

19-Inch Universal Enclosure, Model 14



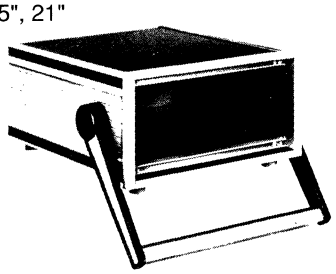
Application: Model 14 Enclosures feature extrusion construction with scratch resistant top and bottom cover plates. The are available in rack-mount ad desktop configurations from 1.75" (1u) to 21" (12u) in height and from 9" to 26" deep. These enclosures can be used to house any electronic components as well as VME Systems. Accepts card sizes of 3u, 6u, 9u, 4.4″, 4.5″, 9.65″ and card depths of up to 400 mm.

Heights: 3.50″, 5.25″, 7.00″, 8.75″, 10.50″, 15.75″.

Widths: 8.4" (42T), 12.6" (63T), 16.2" (81T), 16.8" (84T)

Depths: 9.17", 11.53", 16.25", 21"

DIN Instrument Case, Model 36
(also panel-mount)



Features: front panel recessed by 10.5 mm (.41″)

Application: for control and regulating instruments, switches, etc. Panel mounting and tabletop case, available with angled feet: case dimensions and recess in accordance with standard governing built-in switchboard appliances (DIN standard 43 700).

Heights: 2.84″, 3.78″, 5.59″.

Widths: 3.78″, 5.67″, 7.56″, 11.34″, 15.12″, 17.01″.

Depths: 4.62″, 5.27″, 6.98″, 7.63″, 9.34″, 9.99″, 11.70″, 12.35″.

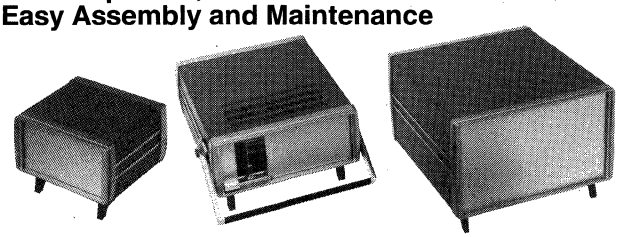
See Section 2400 (Panel Hardware-Bezels, Dials, Knobs, etc.), see section 5100 (Switches) for additional products!

Packaging Enclosure Systems

ELMA Electronic Inc.
A Member Of The Sulzer Group, 41440 Christy Street, Fremont, CA 94538 • (415) 656-3400

All ELMA products are available off-the-shelf and REASONABLY PRICED

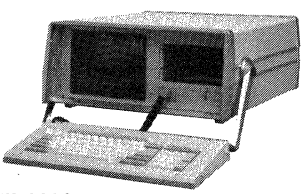
Desk Top Case, Model 32
Easy Assembly and Maintenance



Two sectional supports running full depth carry all inserts. These special supports permit versatile mounting with only simple assembly gear. The actual enclosure, which consists of front and rear frames and a top and base plate, has no supporting function. These parts are mounted on the mentioned supports using only four screws after the components have been inserted, wired-up and functional tests carried out. Therefore, no damage can be done to the cover plates during assembly. The cover plates are of scratch-resistant Sinaplast and are available in neutral umbra-brown. Unfinished aluminum plates for customer painting can also be furnished.

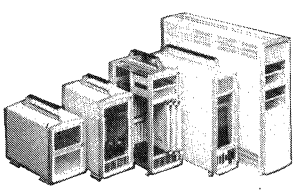
Heights: 5.25", 10.50", 3.50", 7.00".
Widths: 8.43", 12.62", 16.82".
Depths: 9.02", 12.17", 15.31", 18.46".

Portable Detached Keyboard Unit Model 32



Features:
- Optimal flexibility
- Easy removal of keyboard from case
- Designed for numerous applications
- Sturdy construction for rugged field service use
- Accepts mountings per DIN 41494
- Mounting kits for 9″ CRT monitors available
- Standard or custom front panel design
- Accepts standard PC, PC-XT, PC-AT keyboards

Tower Type 32 Modular



Application: The construction of these towers are identical to that of basic model 32. The special feet that are attached to the depth section allow the case to be used in the vertical tower position. The tower handle makes it convenient for portable application.

These towers have the heights of 8.4", 12.6" and 17" which makes them easily portable like an attache case. Typical applications include VMEbus (3-12 slots), VXI, MULTIbus II, etc.

Heights: 8.4", 12.6", 17"
Widths: 3.5" (2U), 5.25 (3U), 7" (4U), 10.5" (6U)
Depths: 10.23", 13.38", 16.53", 19.68"

Cabinets Model 47, 48

Various models and colors available

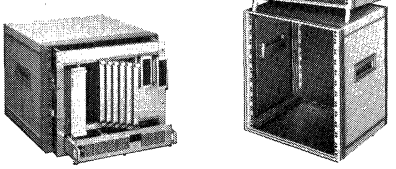
Height: 3, 4, 5, 6, 9, 10, 12, 14, 15, 20, 26, 32, 36, 39, 41, 46 U.

Acceptance Depth: 235, 289, 355, 379, 469, 470, 475, 495, 600, 670, 800 mm.

Widths: 19"

Accessories: Telescoping rails, castors, bases, leveling feet, lifting eyes, grounding sets, slide/guide rails, coupling sets, drawers, pull-out trays, top covers with fan, slide-in fan trays, sealing kits, etc.

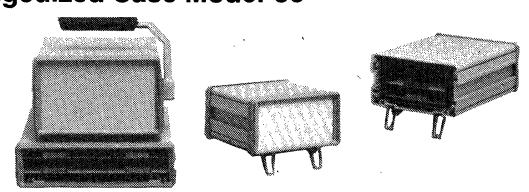
Type 38 - 19" Enclosure



The Enclosure accommodates 19" subracks, card cages as well as accepts 19" Plug-in units designed according to DIN 41494. It can be used as a table top model or as a stand-alone cabinet.

Heights: 3u, 4u, 7u, 8u, 9u, 10u, 12u and 15u
Widths: 19"
Depths: 12.59", 16.53", 20.47", 24.40"

Ruggedized Case Model 33



This all aluminum instrument case consists of U-shaped extrusion which defines the width and height of the case. As the whole case is an extrusion, this compact case is highly stable and rugged. Mounting grooves in the bottom and on the sides allow parts to be mounted directly, without any extra hardware. The sealed aluminum construction guarantees good screening, shielding and meets class IP54/NEMA standards.

Heights: 2.72″, 3.37″, 4.06″
Widths: 6.12″, 8.27″, 10.10″
Depths: 5.67″, 8.03″, 10.39″, 12.76″

See Section 2400 (Panel Hardware-Bezels, Dials, Knobs, etc.), see section 5100 (Switches) for additional products!

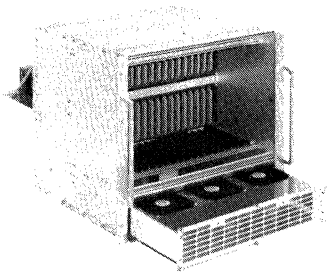
MODULAR VMEbus SYSTEM ENCLOSURES

Consistent High Quality For Over 25 Years

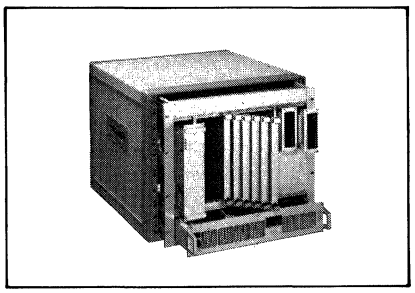
ELMA Electronic, founded in 1962 near Zurich, Switzerland, has become a world wide leader in electronic enclosures and components, with facilities or representation in 22 countries. ELMA is a member of the Sulzer Group which has annual sales of over 4 billion dollars and over 33,000 employees. ELMA systems are designed to meet the highest standards of precision and dependability. This product line offers both standard and custom solutions for a wide variety of bus standards including **VME, VXI, SUNbus, Multibus II, PC, AMS, SMP, Future bus** and many more. In addition, ELMA system enclosures are designed to meet most of the international standards including UL, CSA, TUV, FCC, VDE and IEC. ELMA's unique modular approach satisfies a wide range of applications with off-the-shelf parts, eliminating expensive and time consuming custom work. ELMA covers your requirements, starting from individual components up to fully wired and tested 'ready-to-run' systems.

SYSTEM 12



ELMA System 12 enclosures are fully shielded and designed to be in compliance with UL, FCC and other International standards. Products include both rackmount and desktop enclosures in sizes from 2U to 15U. A full range of depths and slot capacity are available. Designed to accept VME, VXI, Multibus II, SUN and PCbus boards.

Shown at the right is a 21 slot, 9U system which features a removable fan tray and hinged power supply for easy access. A 1U clearance on top accommodates any cable requirements.

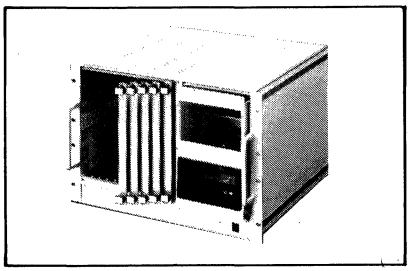


For an aesthetically pleasing appearance, our Type 38/12 enclosure is an excellent choice. Available in 3U to 15U heights and depths to 620mm.

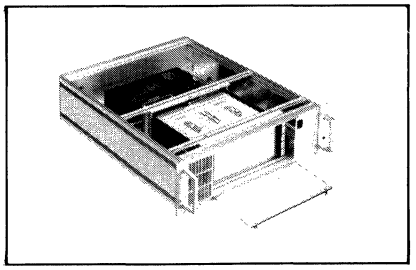
SYSTEM 14

System 14 (Universal) enclosures feature extrusion construction with scratch-resistant top and bottom cover plates. They are available in rack-mount and desktop configurations from 1U to 12U in height and from 9 to 26″ deep. Boards can easily be recessed in this model. Designed to accept VME, VXI, Multibus II, SUN and PCbus boards.

Suitable for desktop or rack mount applications, the system is completely wired and tested with 7 slot P1 and P2 backplanes. Includes 250 watt switching power supply. Accommodates two 5¼″ drives.



7U × up to 21-slot VME compatible system features 1U fan tray with three fans to insure proper cooling. Suitable for desktop and rack mount applications. Accommodates various drive module combinations. Includes power supply from 300 to 1000 watts.

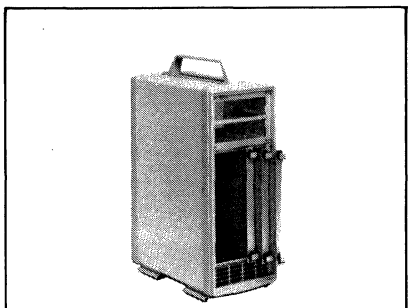


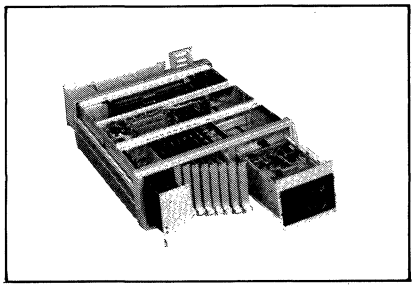
3U × 5-slot enclosure features recessed cards for clean front, better shielding and hidden routing of cables back to I/O. For rack mount or desktop applications. Front can be a panel or a hinged door. Also available in 2U × 3-slot and 4U × 7-slot systems.

SYSTEM 32

The Type 32 ELMA system enclosures are designed for desktop, portable or tower use. This lightweight all-aluminum construction comes in 2U, 3U, 4U, 6U and 13U heights/widths (1U = 1.75″). Depths are from 10 inches to 26 inches. Cover panels are scratch-resistant vinyl clad with a choice of several colors. This system can accept VME, Multibus II, PCbus and SUN boards up to 12 slots.

Shown at the right is a 4U × 7-slot Tower/desktop VME system. It includes a fan module and 250 watt switching power supply. The system is wired and tested with 7-slot J1 and J2 backplanes.





With a depth of 20 inches, this system can handle a variety of configurations. It is suitable for mounting boards and drives from front or rear. It is available in 5 or 7 slot configuration.

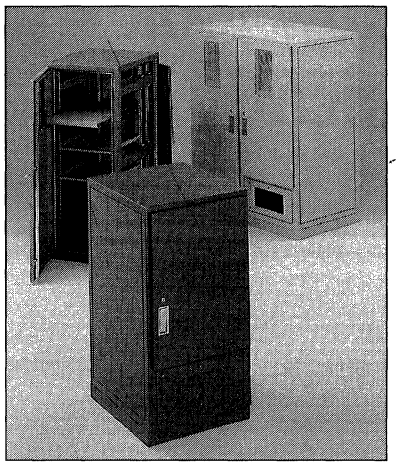
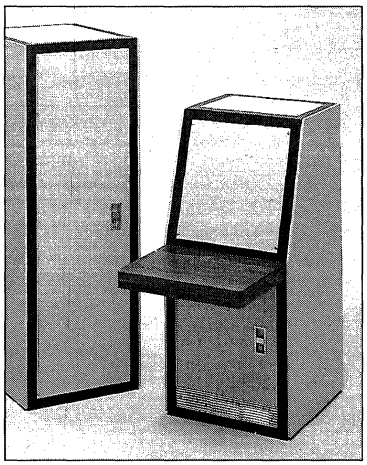
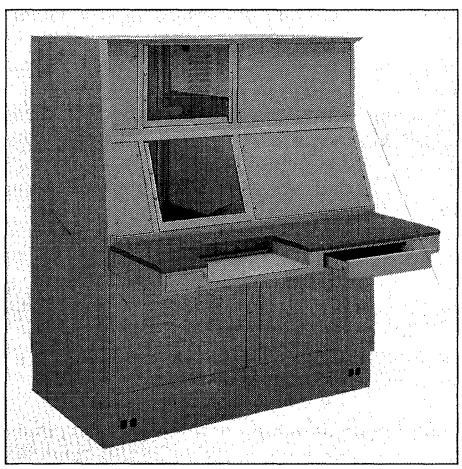
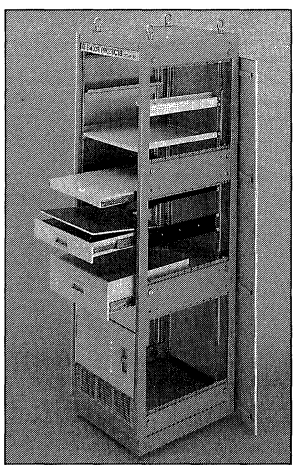
Be selective with Emcor Enclosures

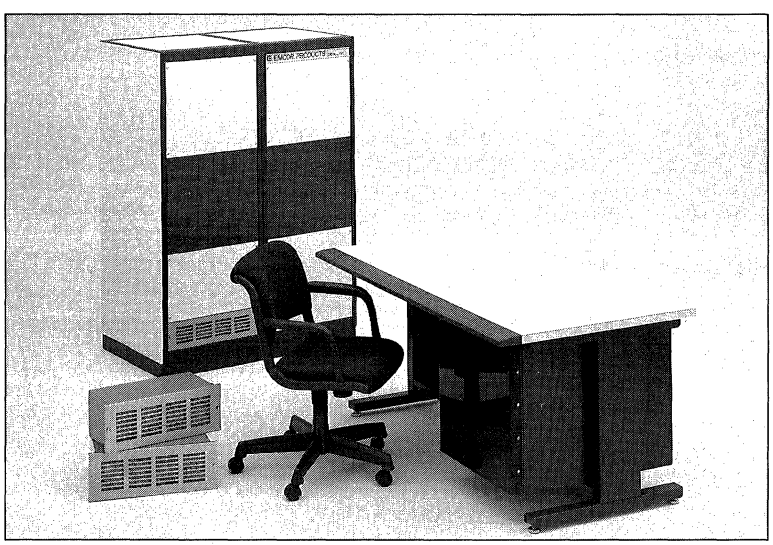
It's your choice of sizes, configurations, colors, shielding and accessories.











Modular Enclosure Systems

Create the right impression for your product with an Emcor enclosure. Choose from 6 distinct product lines and more than 9,000 items. Emcor is committed to giving you the best enclosure for your requirements, supplied just the way you want it and delivered when you need it. For those in a hurry, Instant Emcor offers a 5-day shipment program.

Shielded Enclosures: FCC & Military

Emcor offers two levels of shielding solutions: the FCC level EMI/RFI enclosures are designed for commercial applications and our Tempest-style enclosures meet the more demanding attenuation levels often required by the military. Both levels are tested to MIL STD 285.

Computer Support Furniture

Our Compudesk® line of computer support furniture offers two distinctive desk styles totaling over 500 different configurations and is compatible with our standard enclosure line. Also available are stand-alone auxiliary electronic pedestals and printer stands.

Custom Enclosures

No one is better suited to provide enclosures and consoles exactly to your specifications than EMCOR. From holes, cutouts and knockouts to special configurations, sizes and shapes—get just what you want with EMCOR.

EMCOR®

After years of putting your electronics in our cabinets, you can now look at our cabinets electronically

Now you can get the Equipto Electronics catalog on a free floppy diskette. It includes all the modular electronic cabinets and computer furniture featured in our 304-page print version. And it runs on any IBM© compatible PC.

That makes it easier than ever to use Equipto Electronics as a design resource. With the help of on-screen prompts you can, in effect, design your enclosure from thousands of options. You can even select enclosures especially engineered to provide maximum shielding effectiveness in meeting EMI/RFI, FCC, Military, TEMPEST and EMP requirements. Then, just print out the data and Fax it to us. We'll respond with your quote, usually within 48 hours.

Of course, all the extra services that Equipto customers count on—including customer service reps, engineering consultation or Express Line 5-Day Shipping—are readily available to computer catalog users. In fact, about the only thing that has changed about the Equipto Electronics catalog is that now you can thumb through it electronically.

It all adds up to commitment. A commitment by Equipto Electronics Corporation to provide the combination of quality products and quality service that helps you create the right enclosure for your project.

For your FREE copy of the Equipto Electronics diskette catalog—phone, FAX or write us today.

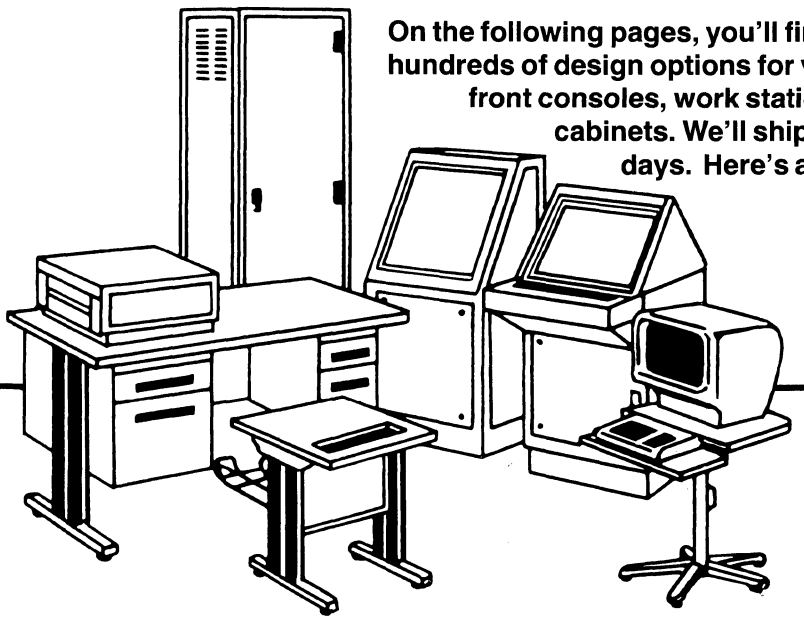
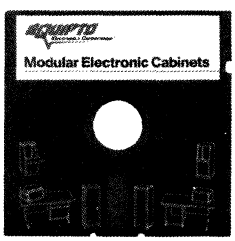
Modular Electronic Cabinets and Computer Furniture

Choose any cabinet or work station from the following 4 pages and we'll ship it in 5 working days!

EXPRESS LINE
5 Day Service



On the following pages, you'll find choices that give you hundreds of design options for vertical cabinets, slope front consoles, work stations and instrument cabinets. We'll ship any of them in five working days. Here's all you need to do.



Phone for FREE IBM PC compatible Electronic Enclosure Design Program

1. Select the product you want
- ☐ Vertical Rack
- ☐ Slope Front Console
- ☐ Work Station
- ☐ Instrument Cabinet

2. Select the size and configuration desired. Diagrams and specification charts are provided with each product offered as guides.

3. Select accessories.

4. Select your colors. The following standard colors are available on any of our products. Custom colors are also available at no extra charge.

Standard colors are available in textured only. Two-tone color combinations available at no extra charge.

Antique White	Light Blue
Dove Grey	Sky Blue
Light Grey	Royal Blue
Charcoal Grey	Dark Blue
Satin Black	Beige
Russet	Dark Brown

Standard colors for laminated tops:
Eggshell Walnut
Teak

5. Call, FAX or mail your order to Equipto Electronics Corporation.

6. Need assistance? Call us and an

experienced customer service representative will answer your questions. Or, if needed, one of our design engineers can consult with you by phone or FAX, at no charge, on any size order.

7. Custom designs and special modifications are available upon request. Call for quotations and lead times.

As extensive as the selection is, it's only a representation of the thousands of choices to be found on a single page of our full line 304-page Equipto Electronics catalog. If you would like a copy, simply phone or FAX and we will be happy to provide it. We can also send our Engineering Design Kit that includes our catalog, an Easy Order/Quote Form, technical and pricing information and actual samples of corner assemblies and hardware for construction comparison.

Have questions about EMI/RFI FCC, Military, TEMPEST or EMP requirements? Our EMI/RFI Technical Guide answers the most common ones. Or telephone one of our design engineers for FREE consultation.

Heavy Duty Vertical Racks

EXPRESS LINE 5 Day Service

Committed to Excellence Since 1960
EQUIPTO Electronics Corporation®

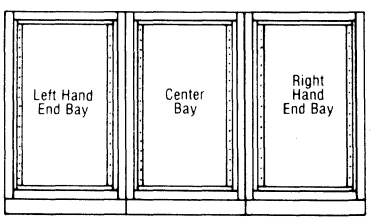
19" Wide Panels 24", 29" & 36" Deep

Heavy Duty Vertical Racks may be purchased in single or multi-bay combinations. Each bay is shipped assembled and comes complete with a frame with four panel mounting angles, frame base, side panels (as required), full length rear left hand door with lock and a top panel.

You may order your unit with ventilating louvers in which case it comes standard with louvered top and bottom side panels and rear left hand doors and fully louvered top panel.

The standard finish is textured baking enamel in a color of your choice from page **C**•1041.

Multi-bay assemblies are shipped in individual cartons and include all necessary joining hardware.



This is a typical assembly of three cabinets

Challenger® Vertical Racks

EXPRESS LINE 5 Day Service

Committed to Excellence Since 1960
EQUIPTO Electronics Corporation®

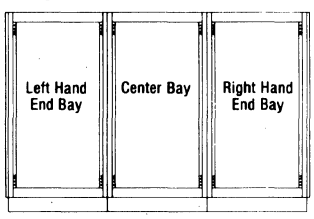
19" Wide Panels 25½" & 30¾" Deep

Challenger Vertical Racks may be purchased in single or multi-bay combinations. Each bay is shipped assembled and comes complete with a frame with four panel mounting angles, frame base, universal side panels (as required), full length face mounted left hand rear door and top panel.

You may order your unit with ventilating louvers in which case it comes standard with louvered top and bottom side panels and left hand rear door and top panel.

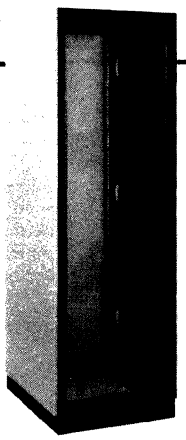
The standard finish is textured baking enamel in a color of your choice from those stated on page **C•1045**

Multi-bay assemblies are shipped in individual cartons and include all necessary joining hardware.



This is a typical assembly of three cabinets

*If casters are required add the suffix -C to the assembly number.
Example: XV-S221-3P-C



NOTE:
Universal side panels are externally removable with a slide-lift motion with provisions for fastening internally. Two side panels add 1¼" to overall width of cabinet.

POSITIVE DOOR LATCHING IS STANDARD. *There are no rubber, plastic or magnetic parts used which could prevent U.L. or OSHA acceptance. Also, metal-to-metal provides grounding that other methods do not.*

Challenger®
15° Sloped Front Consoles

EXPRESS LINE 5 Day Service

Committed to Excellence Since 1960
EQUIPTO Electronics Corporation®

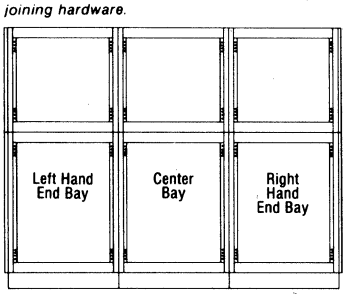
25½" & 30¾" Deep

Challenger Slope Front Consoles may be purchased in single or multi-bay combinations. The slope of the front panel is 15° from the vertical. Each bay is shipped assembled and comes complete with a frame with six panel mounting angles, frame base, universal side panels (as required), full length face mounted left hand rear door, and top panel.

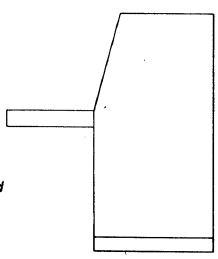
You may order your unit with ventilating louvers in which case it comes standard with louvers at bottom of the side panels, louvered top and bottom left hand rear door, and louvered top panel.

The standard finish is textured baking enamel in a color of your choice from those stated on page **C•1045**

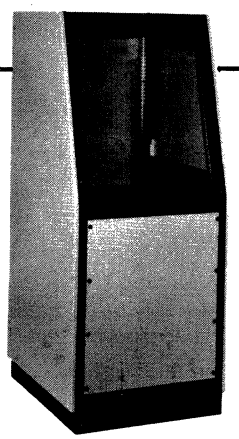
Multi-bay assemblies are shipped in individual cartons and include all necessary joining hardware.

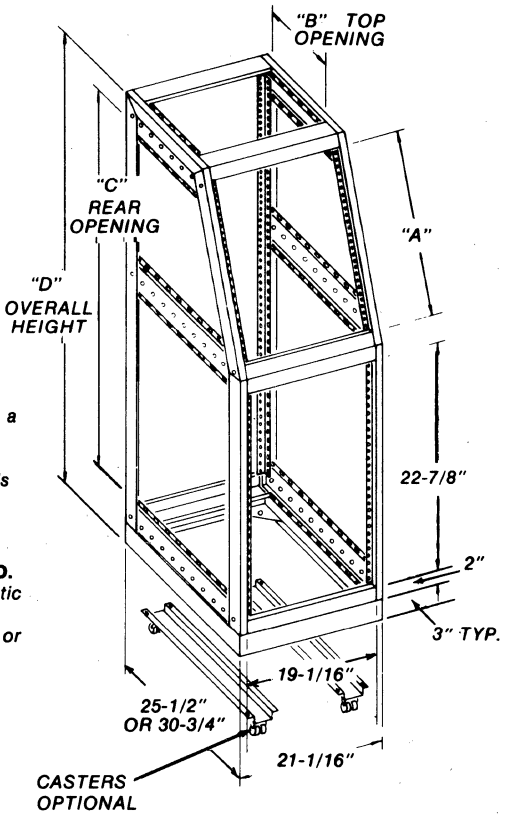


This is a typical assembly of three cabinets



To order laminated console shelves see page C•1049





NOTE:
Universal side panels are externally removable with a slide-lift motion with provisions for fastening internally. Two side panels add 1¼" to overall width of cabinet.

POSITIVE DOOR LATCHING IS STANDARD. *There are no rubber, plastic or magnetic parts used which could prevent U.L. or OSHA acceptance. Also, metal-to-metal provides grounding that other methods do not.*

Laminated Shelves/ Instrument Cabinets

EXPRESS LINE 5 Day Service

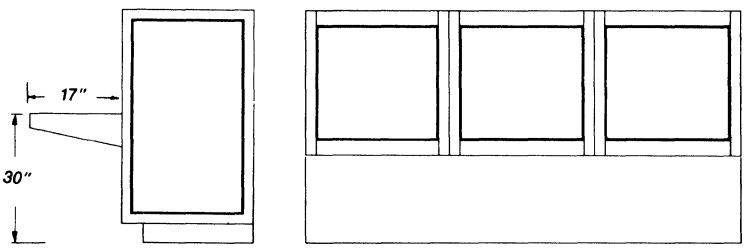
Committed to Excellence Since 1960
EQUIPTO Electronics Corporation®

Laminated Shelves for Heavy Duty Racks

Laminated Plastic Console Shelves are available in single, double or triple width units, for single or multiple cabinet assemblies. The support arms, frame adaptor panels, and lower front knee space panel are painted to match cabinet colors.

Laminated Plastic Shelves are constructed of ¾" thick particle board with a solid eggshell laminated plastic sheet bonded to the top, front and sides. These Console Shelves are attached to the cabinet frame with rugged 14 gauge steel support arms. They are bolted directly to the 3/16" thick Panel Mounting Angles for positive support. The support arms do not project into the interior of the cabinet frame to interfere with equipment location or installation. The assembly includes knee space panel to enclose panel opening under the shelf. The Laminated Plastic Shelves and mounting arms are shipped with all mounting hardware included.

Can be assembled to all H.D. Vertical Racks shown on page **C•1042**



Vertical Rack Cabinets

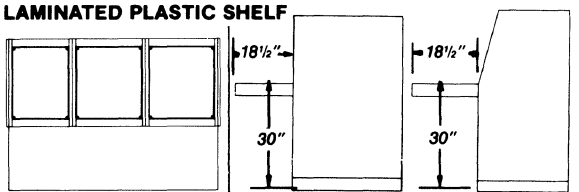
Laminated Shelves for Challenger Racks & Consoles

Challenger Console Shelves constructed of white Laminated Plastic are supported with a mounting arm and bracket system. The one piece white laminated plastic top surface and the laminated plastic sides and front edge make an easily maintained, attractive work area. Made of particle board with laminated plastic sheet bonded to the top and edge surfaces. The mounting parts and lower front knee panel are painted to match cabinet colors and are shipped installed in the cabinet; the Laminated Plastic Shelves and Mounting Arms are shipped separately with all mounting hardware included.

LAMINATED PLASTIC SHELF



Triple-Width Laminated Plastic console shelf attached to three bay cabinet assembly

Can be assembled to all. Challenger cabinets shown on pages **C•1047 & C•1048**

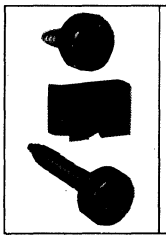
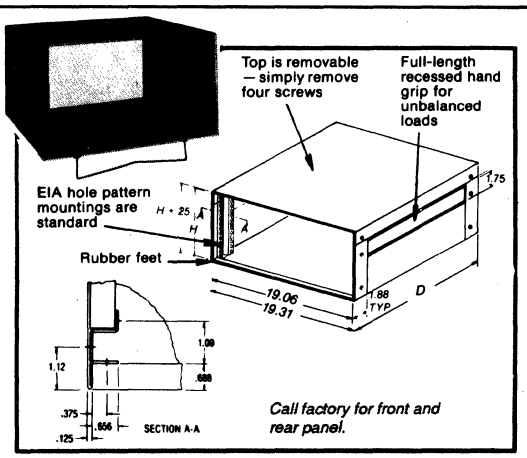
Instrument Cabinets

Instrument cabinets are constructed of 16 ga. steel and come with 4 panel mounting angles, zinc plated. Standard finish is textured baking enamel in a color of your choice from color chart on page **C•1045**



Mar-Proof Screws for mounting 1/8" flat or 5/8" formed instrument panels Phillips head, sheet metal screws, with recessed Mar-Proof black nylon washers, and Speed Nut® part 80-0414-03 are used to fasten instrument panels to punched panel mounting angles. Screw 80-0101-05 108 x 1⅛" is used with 5/8" formed panels; screw 80-0102-05 108 x 5/8" is used with 1/8" panels. Screws are nickel plated.



Call factory for front and rear panel.

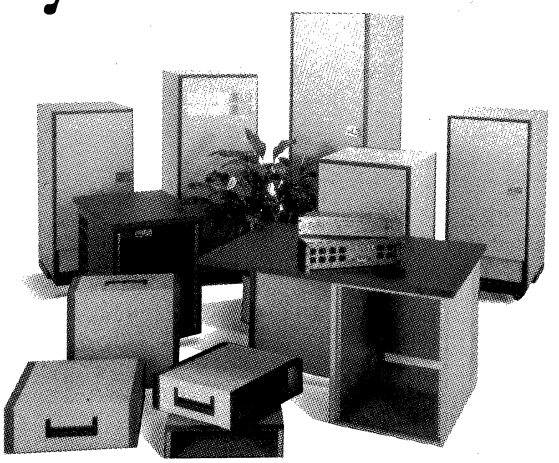
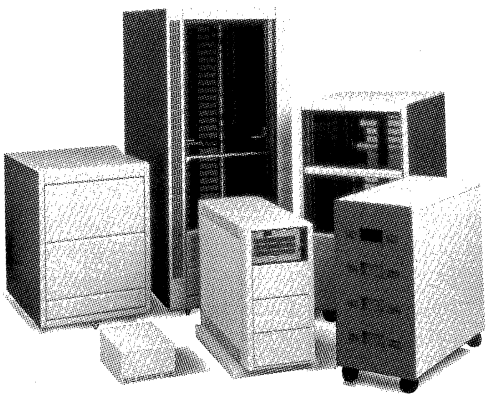
Explore The Benefits Of Engineering By Everest

For enclosure solutions that truly complement your equipment, and people who really understand your needs, look to Everest. Building on a history of field proven products and excellent service, we're constantly expanding our capabilities... and your options.

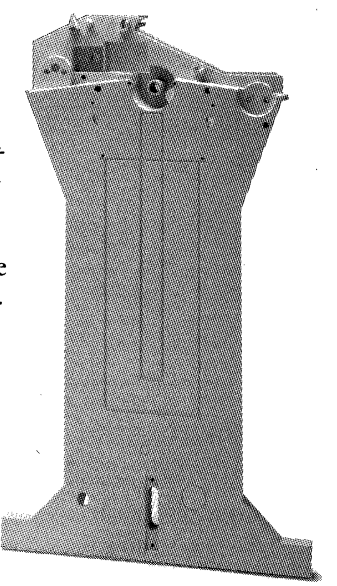




DEC* & Sun Compatibles... Nobody Does It Better**
From small, front load cabinets to peripheral storage boxes to VME compatible card cages, Everest has the largest selection of DEC & Sun compatible cabinets in the industry.

Standard Products... Our Beauty Is More Than Skin Deep
Our contemporary designs satisfy the performance, quality and style requirements of the most demanding designers. For ultimate economy and convenience, ask about our In Stock Program.

Structural Foam... Total Design Flexibility
For optimum strength to weight ratios and total design flexibility, look into structural foam. Ideal for an ever-increasing range of applications, this unique Everest specialty can really lend substance to your design ideas.



Custom Cabinets... The Possibilities Are Endless
Everest can manufacture from your drawings and assist you with engineering and budget solutions. Our custom products division operates under the World Class Just In Time Program.

ANGLE-TECH® by Flexible Furniture

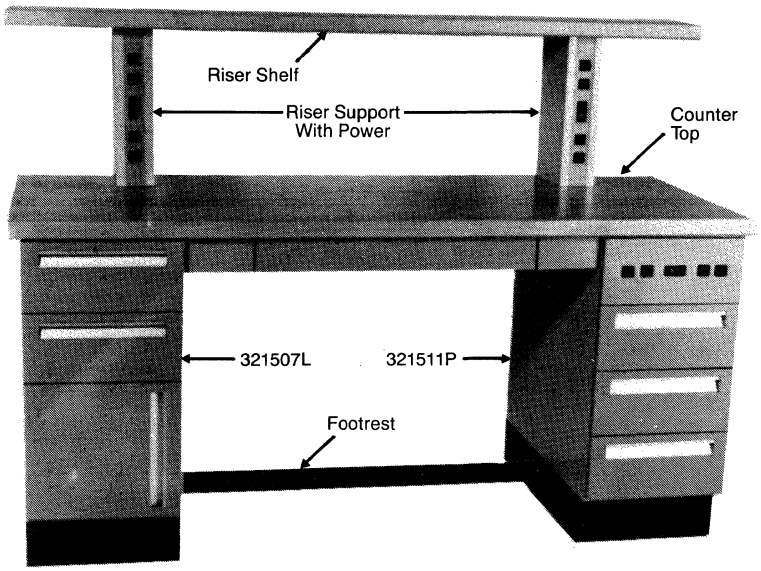
Manufacturers of Quality Angle Steel Furniture

Compare these Angle-Tech® features before you make your final decision:

1 All metal is high-quality furniture grade cold rolled steel, free of defects and in U.S. gauges.

2 All components are produced on precision tooling, jigs and fixtures to provide consistent high quality product with uniform dimensions and clearances.

3 Angle-Tech® Electronic Workbenches offer the quality, durability, beauty, and functional efficiency you desire to bring pride to the tech area.



The AT8AM
Angle-Tech Electronic Workbench

4 Angle-Tech® combines quality materials, creative engineering, experienced manufacturing personnel, and factory trained sales and design force for an unbeatable end result.

5 Drawer suspension is comprised of two-member ball bearing slides, allowing 80% clear access to the drawer body. File drawers project beyond the pedestal for maximum access to contents. All drawers and doors have bumpers for quiet operation. All pulls recessed for safety and convenience.

6 Fabricated steel parts and assemblies are pre-treated in a five-stage spray cleaner and bonderizing unit, heat dried, then fully immersed in an electrodeposition water-based epoxy resin paint and baked to obtain a uniform base coat. A finished coat of baked-on electro-static applied alkyd base enamel paint in standard Angle-Tech® colors or special colors is applied to exterior surfaces. Standard underbase color is black.

The AT8AM Angle-Tech Electronic Workbench - One of a Multitude of Configurations Available

Whether your need is for a single workstation or a complete multi-room facility, we are capable of meeting your needs. Our staff is unsurpassed in its ability to answer your questions and assist you with a layout and design to meet your specific needs. To find out more about our quality product and dedication to service, please call or write to receive our catalog and specifications.

Gemini's standard line of **HEAVY DUTY TRANSIT CASES** are constructed from high density polyethylene, and extremely tough and resilient material ideally suited to the abuses transit cases are subjected to. The heavy wall (.100" nominal) shells and heavy duty 1.838" wide #6063 T52 aluminum valance combine to form a container capable of transporting delicate portable instruments under the most adverse conditions. Available with recessed wheels and folding handle.

Gemini's standard line of **HEAVY DUTY CARRYING CASES** are constructed from rugged A.B.S. and feature a heavy wall aluminum valance to provide an extremely rugged case with contemporary lines for transporting delicate portable instruments under the most demanding conditions.

Standard Features include:

- .100" to .150" nominal wall black A.B.S. shells
- variable case depth
- heavy wall 1.838" wide #6063 T52 aluminum valance with dust seal
- choice of handle, latch, hinge and bumpers

Gemini specializes in custom designed cases for industry. We have the capability to design a case specifically for your product and follow through from prototypes to production. If you are currently purchasing a standard case from another manufacturer, we may be able to duplicate that case at a lower cost. We welcome the opportunity to quote your case requirements and to work with you on design.

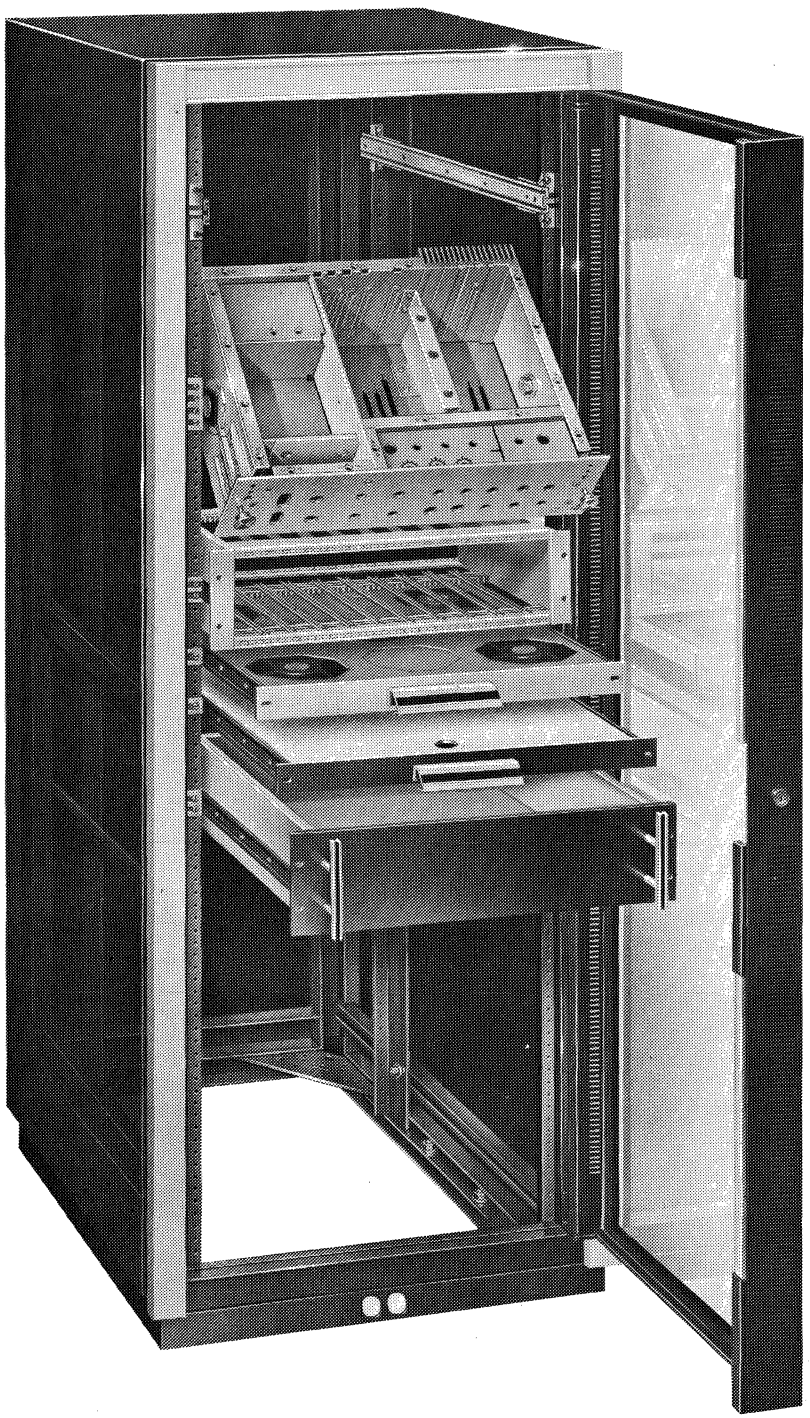
Full Selection of Top Quality Electronic Hardware



Custom or standard, General Devices offers the industry's widest selection of electronic hardware from one source.

CHASSIS TRAK® Telescoping Slides
- Solid Bearing Slides
- Roller Bearing Slides
- Ball Bearing Slides
- Bottom Mount Slides

VENT RAK® Cabinets & Enclosures
- Cabinets & Desks
- EMI/RFI Shielded Cabinets
- TEMPEST Enclosures
- Chassis, Drawers & Shelves
- Cooling Modules
- Cable Carriers & Guides
- VME/EURO Card Frames
- Handles, Pulls, Hardware

Call or write today for complete product descriptions. General Devices Company, Inc., P.O. Box 39100, Indianapolis, IN 46239 (317) 897-7000, FAX: 317-898-2917.

AURORA

Exciting new design from top to bottom!

- **2U, 4U, and 6U Height Options**
- **Table-Top, Rack-Mount, or Pedestal**
- **3 to 12 VME slots**
- **Monolithic J1/J2 Backplanes**
- **Front Card Loading**
- **Peripheral/Non-Peripheral Options**
- **Quality 4-Output Power Supplies**
- **Aluminum Construction—Modular Light, and Strong**
- **EMI/RFI Tight Metal-to-Metal Contact All Around**
- **Excellent Plenum-Controlled Direct-Flow Cooling**
- **Easily Customized**
- **Easy To Access**
- **Very Quiet Operation**

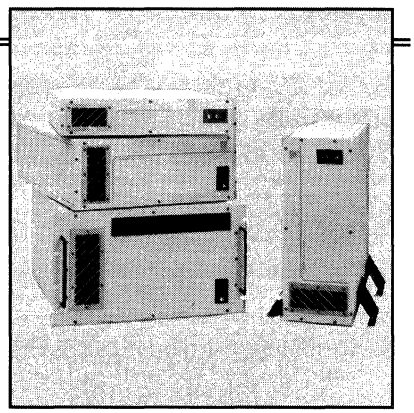
Enclosure Weights:

AV203	12 lbs	AV609	28 lbs
AV405	17 lbs	AV612	22 lbs
AV407	16 lbs		

Power Supply:
Aurora enclosures feature high-quality 4-output switching power supplies.

Backplanes:
Aurora backplanes are 10-layer, monolithic J1/J2.

Peripheral Options Include:
Peripheral Mounting
Front Panel Cutout
Power Harness



PHOENIX

Super for large systems

- **12, and 20 VME Slots**
- **Direct-flow Cooling**
- **Rack-Mount or Table-Top**
- **Peripheral Options**
- **Aluminum Construction**
- **500-, 750-, and 1000-Watt Power Supplies**
- **EMI/RFI Tight**

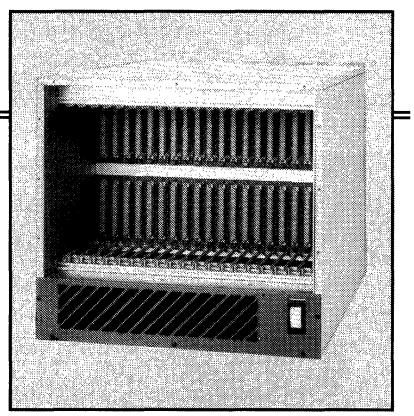
Enclosure Weights:

PV912	37 lbs
PV920	40 lbs

Power Supply:
Phoenix enclosures feature high-quality switching power supplies.

Backplanes:
Phoenix backplanes are monolithic J1/J2. Zero cross talk, high-performance

Peripheral Options Include:
Peripheral Mounting
Power Harness



PHAROS

Zero cross talk, full-featured, super high-performance, VME backplanes

- **Full VME Specification Compliance**
- **10-Layer, Stripline Construction**
- **Inboard Termination**
- **Optimized Power Distribution with Minimized Ground Shifts**
- **Noise Immunity in Low/High Frequency Domains**
- **Fully Balanced and Symmetrical Signal Line Design**
- **3 to 21 Slots, Monolithic J1/J2**

VMEBus Specifications Compatibility
VITA VMEbus specification, Rev. C
IEEE 1014
IEC 821
IEEE 1101

Technical Characteristics:

- Introducing a ten-layer stripline construction
- Two pads-only outer layers reduce cost and improve impedance control
- Three coaxial signal layers
- Five reference planes with 2 oz. of copper each
- One power/ground couplet with .0005" spacing for a better distributive capacitance effect
- Three ground planes for minimizing backplane inductance
- Heavy reference planes for ±12V
- Two extra ground planes on J2 section
- Inboard terminations permit maximum usage of backplane slots
- Options of power taps and fast-on terminal points
- Front and rear capability of jumpering daisy-chain signals
- Tightly controlled characteristic impedance of 75.0 ohms, optimized for each signal layer
- Tightly controlled effective impedance that exceeds minimum specifications for the board when fully loaded with connectors
- Special "trace buried into the ground" routing technique that zeros cross talk between each signal line
- Schottky clamping diodes on critical signal lines
- Optimized power distribution
- Reverse DIN shrouds for each slot of the J2 section on the backplane
- Two symmetrical pick-up positions for AC FAIL, SYSTEM RESET, SYSTEM FAIL, +5VSTBY, and GND
- Minimized voltage drop and ground shifts as part of the design process for a low noise margin
- Four rows of heavy current pickup contacts well distributed throughout the board
- Power supply attachments at the top, middle, and bottom edges of the backplane
- Noise immunity in low-, medium-, and high-frequency domains
- A fully balanced and symmetrical signal line design
- An optimized, specially controlled, high-technology manufacturing process
- J1/J2/J3 monolithic backplane option with custom routing

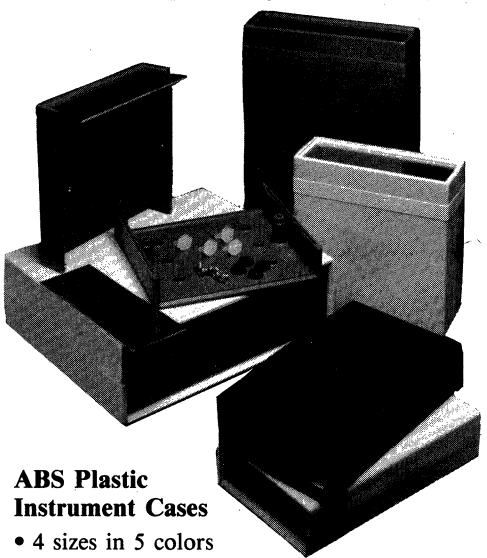
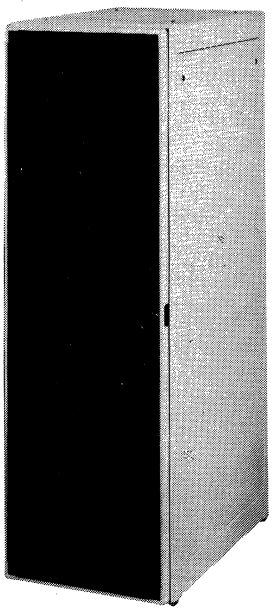
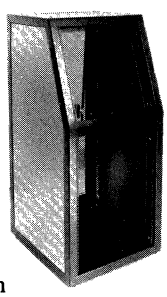
The Hammond Alternative For Small Cases and Rack Packaging



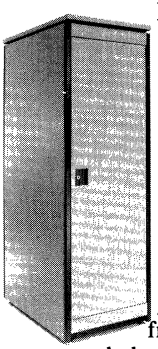
ABS Plastic Instrument Cases
- 4 sizes in 5 colors
- Flame retardant ABS plastic
- Integral P.C. mounting slots
- Two piece construction

Electronic Rack Systems
- Quick access side panels
- Standard leveling feet
- Heavy duty construction
- Adjustable bottom panels
- Built-in castor mount
- Attractive ID trim
- Plexiglass door



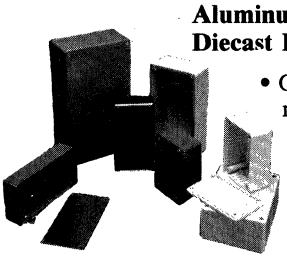


Console Racks
- 19″ or 24″ rack mount panel width
- 49″ overall height
- 24.5″ or 31.5″ deep
- Available in a wide range of colors
- Accessories include rack mount desks, front and rear doors and a wide range of universal accessories

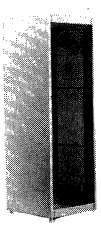


Modular System Racks
- 12 heights 21″ to 84″
- 19″ or 24″ panel widths
- 3 depths 17.5″, 24.5″ and 31.5″
- Available in a wide range of colors
- Accessories include ganging kits, wedge kits, front and rear doors, rack mount desks, tops, gang tops and a wide range of universal accessories

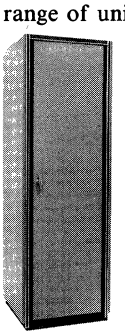
Plastic and Aluminum Diecast Boxes



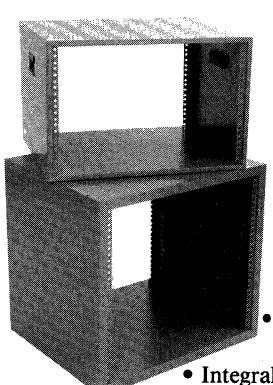
- Over 50 models to choose from
- ABS plastic cases
- Aluminum diecast cases
- ABS Plastic consoles
- EMI/RFI shielded plastic or metal cases
- Water tight metal cases
- Available in a wide variety of colors and finishes
- Custom punching and screening



Knockdown Economy Racks
- 4 piece construction
- 8 heights in two depths
- Accept most universal 19″ accessories
- Available in a wide range of colors

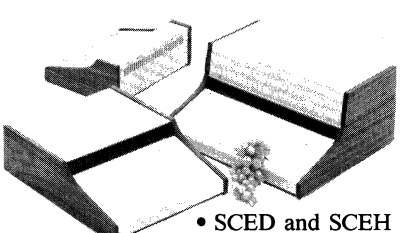


Heavy Duty Racks
- 19″ or 24″ panel widths
- 5 heights 49″ to 85″
- 3 depths 17.5″, 24.5″ or 31.5″
- Available in a wide range of colors
- Accessories include rack mount desks, ganging kits, variety of doors and side panels and a full range of universal accessories



19″ Panel Mount Rack Cases
- Panel heights 3.25″ to 28.0″
- Depths 13.5″ and 17.5″
- Available in a wide range of colors
- Many Universal 19″ Accessories
- Integral front and rear panel rails use 10-32 clipnuts for panel mounting

Desktop Cases and Consoles
- Hundreds of models in a wide range of colors and materials



- SCED and SCEH consoles shown here feature real walnut wood sides

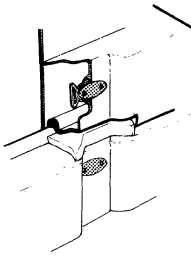
HARDIGG INDUSTRIES, INC.
PROTECTION BY DESIGN

Hardigg Industries: America's Largest Manufacturer Of Rugged Roto-Molded Shipping Containers

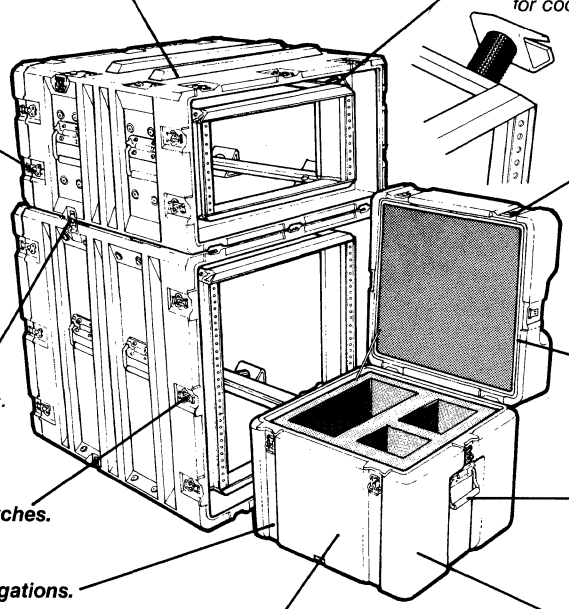
Molded-in metal insert for catch and hinge attachment points.
Hardware replacement will not penetrate container shell. Metal insert spreads load from hardware to container wall.



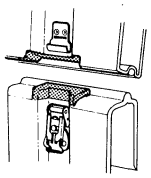
U.S. Patent No. 4,741,972

Molded-in male/female stacking ribs.
Secure stacking.

Elastomeric shock mounts.
Provide controlled shock and vibration levels. Sway space allows good air flow for cooling.



Positive anti-shear locks.
Prevents lid separation from base on impact. Minimizes stress on hardware. U.S. Patent No. 4,284,202



Optional coupling catches.
Positive interlock of stacked containers.

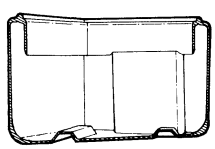
Molded-in tongue-in-groove gasketed parting line.
Resilient polyethylene shell returns to original configuration after impact.

Low-profile cam-action wing-turn catches.
High strength and lightweight.

Recessed hardware.
Fully protected from damage.

Molded-in corrugations.
High stacking strength and hardware protection.

Rotational molding.
Corners and edges are 10% to 20% thicker than flat walls, providing strength where you need it most. One piece stress-free molded lid and base.



Uniform color throughout wall.
Color unaffected by abrasions.

No matter what type of equipment you are shipping, Hardigg can protect it. With over 200 standard roto-molded container sizes, we can quickly create custom cushioned containers to meet your specs.

Hardigg Containers Have Delivered Over 2,000,000 Shipments Worldwide – Damage Free!

Your equipment will perform as accurately after shipment as it did before... if it's protected by a Hardigg container system.

We manufacture Hardigg containers from a resilient polyethylene resin using a rotational-molding process. This method naturally creates reinforced corners and edges (10% to 20% thicker) while eliminating excess weight from the flat surfaces. The result is an impact-absorbing container with maximum impact strength and minimum weight.

With 100+ Trips Per Container, We Outperform ATA Specs To Give You The Lowest Cost Per Trip.

Every Hardigg reusable container is built to last. Even our standard model is engineered with features that provide complete environmental protection. (Standard features listed above; optional features also available.)

Our containers:

- Shrug off 4 foot drops onto concrete.
- Seal out humidity, water, fungus, sand and dust.
- Perform at temperature extremes from −40°F to +140°F.

Over 200 Off-The-Shelf Roto-Molded Container Sizes. Over 10,000 Original Engineered Designs.

With 35 years experience, Hardigg has the equipment, facilities, and manufacturing expertise to create standard or custom cushioned container systems to protect your equipment. Our design and engineering team is ready to provide quick and cost-efficient transition from preliminary design to project completion.

For an easy solution to your toughest shipping problem, Call Hardigg.

Hardigg Containers have been procured and/or tested under the following specifications:

MIL-C-4150	MIL-STD-794
MIL-T-21200	MIL-STD-648
MIL-T-28800	MIL-D-42048
MIL-STD-810D	FTMS-101

Hardware Options

Relief Valve (±0.5 PSID)	View Ports
Humidity Indicator	Desiccant Holder (Internal)
Identification Plate	Hardigg Markings
Purge Valve	ATA Markings
Locking Feature	(Other options available)

DESIGN FEATURES: See Hardigg Multi-Purpose Reusable Containers brochure and your Hardigg Dealer for more details.

PRICING: See your Hardigg Dealer.

Ask for a Technical Service Engineer to help measure your equipment and determine the right container shell size and interior system.

SYMBOLS USED BY INTERNATIONAL REGULATORY AGENCIES

These symbols appear on many electrical/electronic components distributed in the world market. They indicate that a country's standard-setting agency has approved the design of the component and/or a testing agency has approved the performance of the component in meeting the standard. This page lists only those countries that have a *symbol* to represent their authority.

Premium Enclosures for Electronic Instruments

Careful engineering and quality construction give your product or prototype a solid, precision-manufactured look and feel.

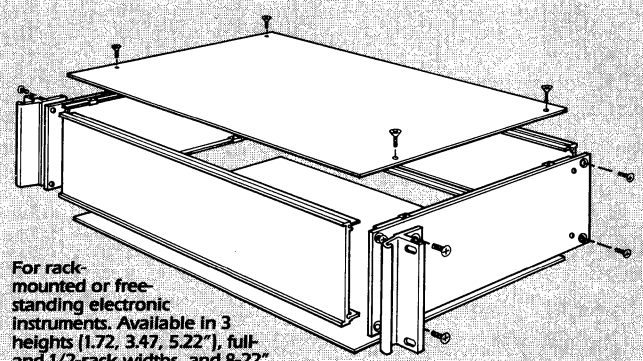
Yet the simple, understated designs are readily customized by you or us, so that your choice of configuration, panel fabrication, finish, color, and graphics determines your product's unique personality. For immediate delivery, a comprehensive range of standard, in-stock sizes (left) are available with blank panels.

Proven, practical designs with fewer parts ease prototyping and speed production assembly; economical prices reduce costs even more, whether you need one or 10,000. For literature and a no-risk sample offer — or for answers to your questions — call:

800-847-3535
Anywhere in the U.S. or Canada
FAX: 607-277-1953

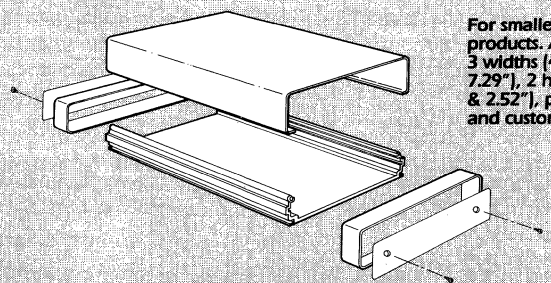
Lansing Instrument Corp.
P.O. Box 730
Ithaca, NY 14851-0730

GrayBox™ Enclosures



For rack-mounted or free-standing electronic instruments. Available in 3 heights (1.72, 3.47, 5.22"), full- and 1/2-rack widths, and 8-22" depths. Custom widths and depths are also available.

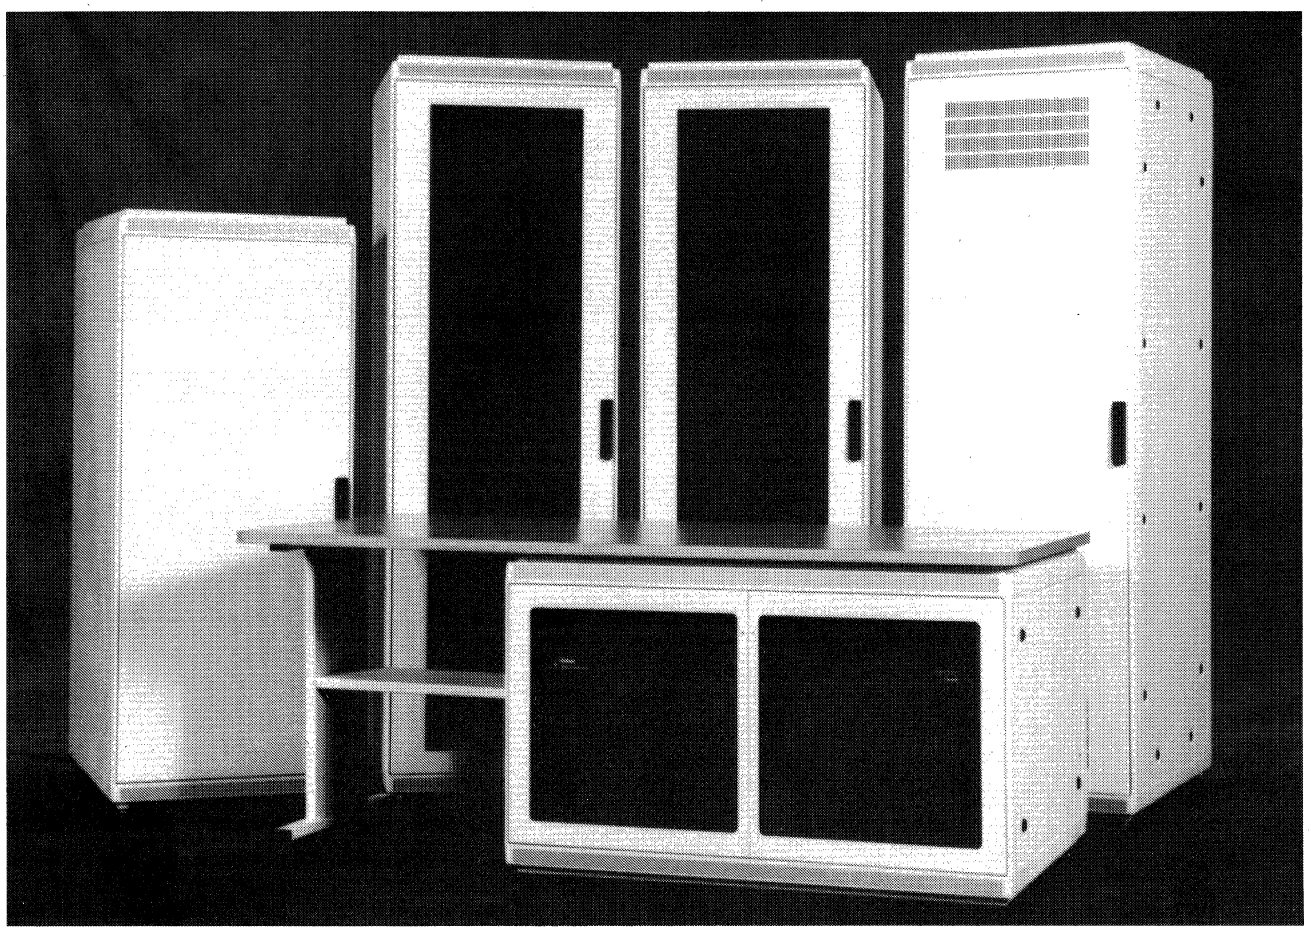
MicroPak™ Enclosures



For smaller electronic products. Available in 3 widths (4.17, 5.57, 7.29"), 2 heights (1.52 & 2.52"), plus stock and custom depths.

Optima® EPS **EMI/RFI Shielded Cabinets**

Your system should look as good as it performs.

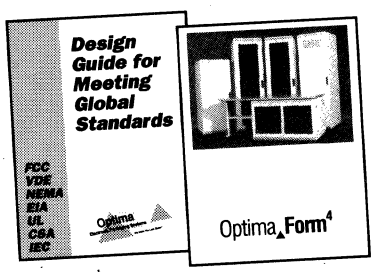


There is a new standard for style and performance: Optima Form⁴.

New Optima Form⁴ offers you a high performance, flexible packaging system to meet tough global EMC standards without sacrificing style.

Patented Form⁴ features custom-engineered, shielded interfaces and advanced door closure techniques to yield independent RFI test levels in excess of 100dB from 10KHz to 1MHz.

Form⁴ also meets UL 508-Type 12 spec, which makes it an effective barrier against dust and moisture. Its extruded aluminum frame is welded to provide a high strength-to-weight ratio.



Call now for your copy of this important Design Guide and Optima Form⁴ brochure.

Both 19" and 24" technology equipment are accommodated. Choose from a wide variety of accessories, sizes and colors.

For more about Form⁴ call Optima at (404) 496-4025 or Fax (404) 496-4041

Optima EPS, 2166 Mountain Industrial Blvd., Tucker, GA 30084-5088.

FCC VDE NEMA EIA UL CSA IEC

Form⁴ meets U.S. and international EMC, safety, environmental and dimensional standards.

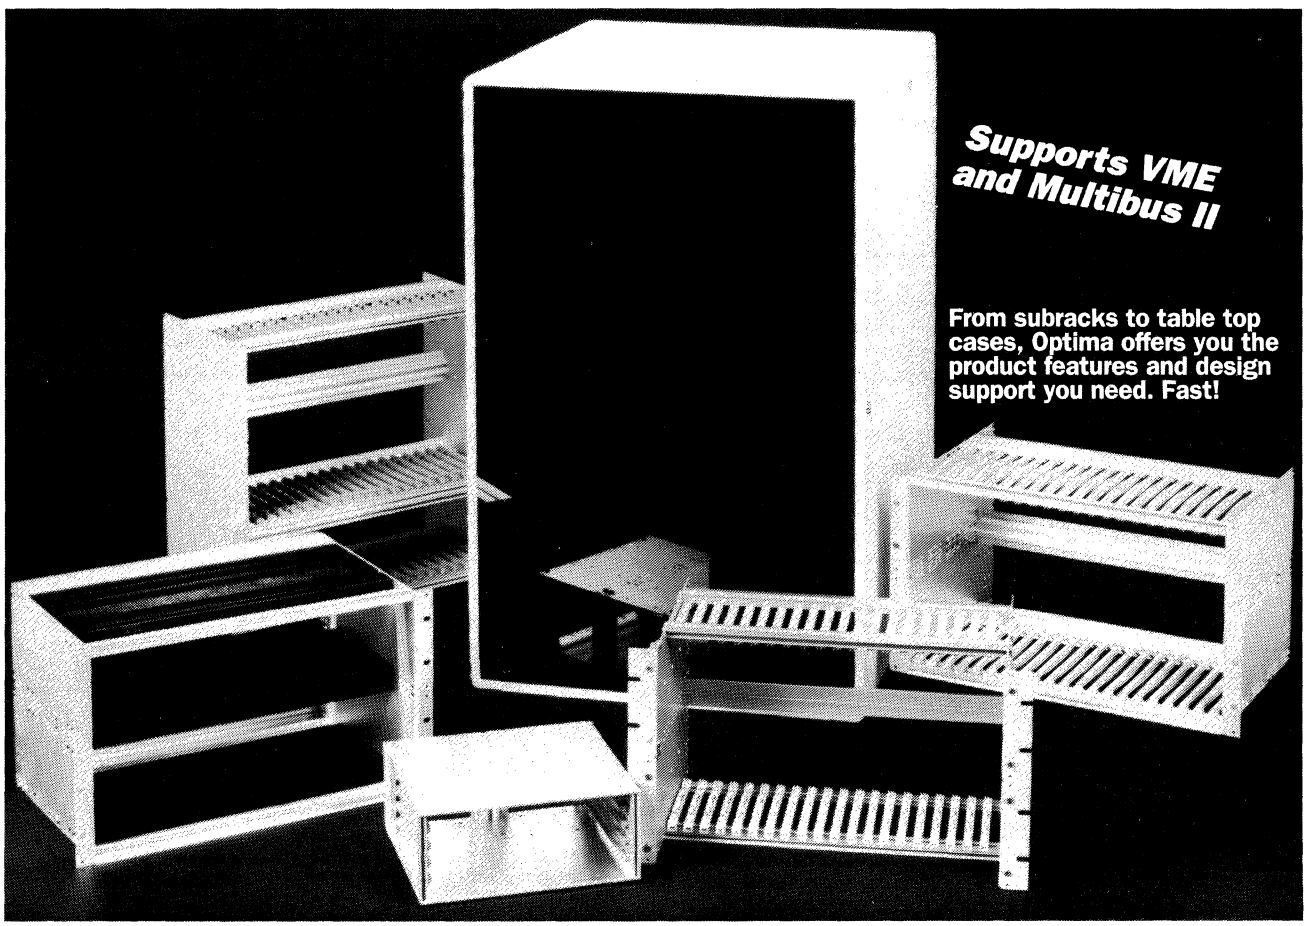
Eurocard Packaging Optima® EPS

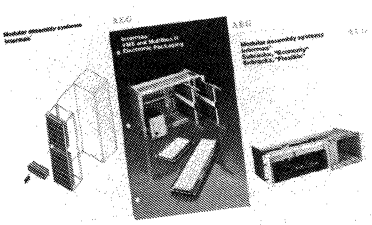
AEG Intermas® Eurocard packaging. Now from Optima.



You'll get quick delivery on a Eurocard packaging system tailored to your needs.

Optima has an off-the-shelf AEG Intermas packaging system for your application and budget. We can also modify any component to your specifications. Choose from five feature-packed Eurocard systems:

- **Heavy-duty Type S:** for industrial, transport or power plant applications; features extra-strength side walls and profiled rails.
- **Universal Type U:** a popular system for prototyping and special applications requiring unique accessories.
- **Economy Type E:** our "value system" – this low-cost, high-quality system can satisfy most application requirements.



Call now for your free catalogs or technical assistance.

- **Flexible Type F:** same design as Economy Type E, but with user-adaptable side plates for flexibility.
- **Vibration-proof Type V:** rugged design for the most demanding applications and for use in extreme environments.

Standard Widths: 19", 19/2"
Depths: 160, 220, 280"
Heights: 3U, 6U, 9U, 12U

For more about Eurocard Packaging Systems by AEG Intermas® call Optima at (404) 496-4025 or Fax (404) 496-4041

Optima EPS, 2166 Mountain Industrial Blvd., Tucker, GA 30084-5088.

Optima® EPS **Vertical Cabinets**

Get the options you want with the professional look you need.

You'll get a wide selection of design options, plus features you expect in a quality cabinet.

Optima Quality Design Features:

- Exclusive extruded aluminum (alloy 6063-T5) frame designs make your system look more professional
- Side panels are independent of framework for easy assembly and equipment service
- Superior strength-to-weight ratio: design rated at 2,200 lb. static load
- Front and rear panel/chassis mounting rails (14 ga. CRS) with standard EIA spacing; also available as adjustable-recessed or heavy-duty (11 ga. CRS)
- Top panels available solid, ventilated or with exhaust fan provision
- Doors feature multi-point locking system with keylock; in solid, ventilated and acrylic
- Steel bases with caster brackets and leveling provision, also available with cable exit provision
- Proven paint adhesion and corrosion resistance via phosphate pre-treating and durable acrylic coating based on thermo setting, cross-linking resins
- Choose contemporary standard colors in smooth or textured finishes. Custom color-matching available
- Free design consultation and assembly

Standard Sizes

Widths:	19", 24"	
Depths:	24", 30", 36"	
Heights:	21"	(12U)
	28"	(16U)
	35"	(20U)

	52.5"	(30U)
	61.25"	(35U)
	70"	(40U)
	77"	(44U)

Accessories

A broad line of universal options and accessories are available direct from Optima, including:

- Power distribution systems and outlet strips
- Cooling fans, fan packs, blowers, filters and grilles
- Doors, panels, drawers and shelves
- Hardware: handles, lifting eyes, slides, stabilizers, casters, multibay connector kits and more

For catalogs and more information call Optima at (404) 496-4025 or Fax (404) 496-4041

Optima EPS, 2166 Mountain Industrial Blvd., Tucker, GA 30084-5088.

Heavy-duty Welded Cabinets

For demanding applications and use in extreme environments we also offer the "Optima R Series" welded vertical cabinet. Please call for our catalog.

EMI/RFI Shielded Cabinets

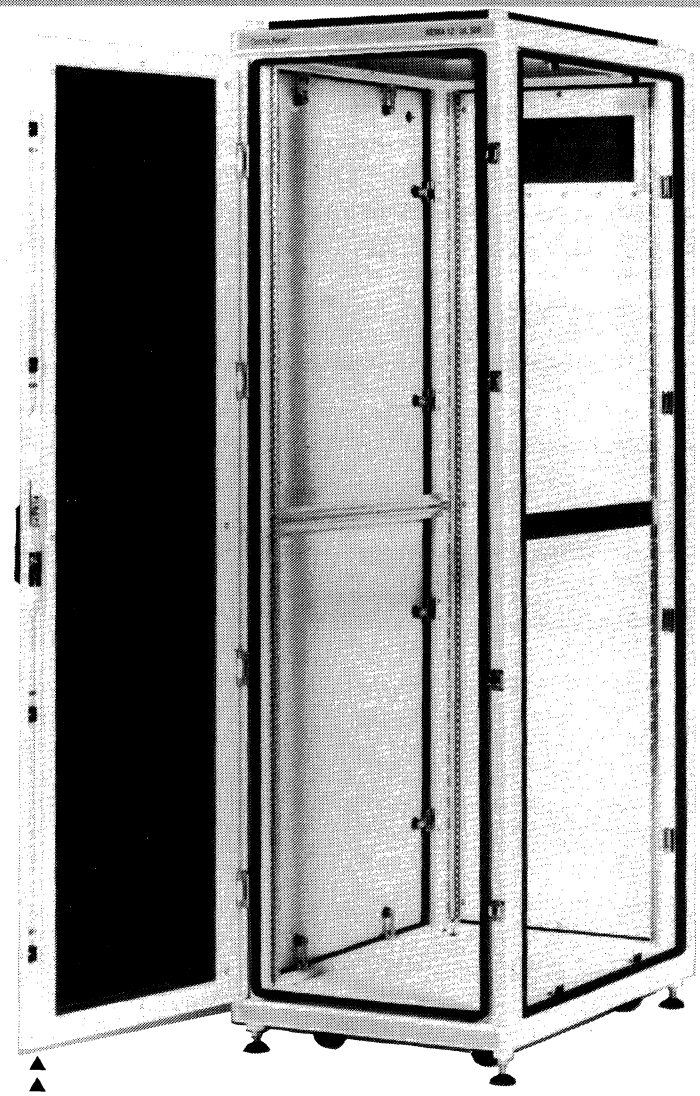
Optima® EPS

Exceed global EMC standards with Optima's advanced design.

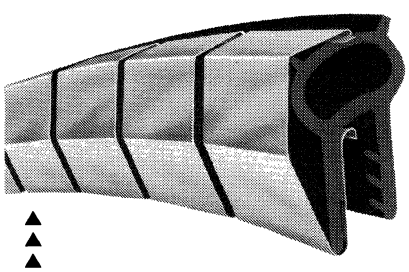
Get peak attenuation levels in excess of 100dB.

Optima EMC Performance Features:

- Welded interior corner joints provide strength and rigidity – eliminate RFI noise, dust, or moisture leaks.
- Even compression on all doors is assured with steel reinforcement and multi-point locking design
- Dual purpose EMC/UL 508 Type 12 gasketing protects sensitive electronics
- All hinges and locks are external to the continuous perimeter of gasketing
- Ventilated doors provide EMI/RFI protection at top, bottom or both
- Optional quick release sides feature multi-point fasteners distributed for even compression and quick access to cabinet interior

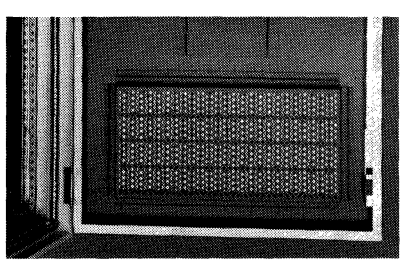


Demanding EMC applications require an enclosure design with the structural integrity to withstand harsh environments, plus the flexibility to meet custom design modifications.



Optima's custom-engineered EMC gasket features independent spring-fingers of Beryllium Copper formed and fitted to the contour of a NEMA spec rubber gasket. Installation or on-site replacement is easy.

Proven BeCu gasketing is specifically ▶▶▶ design for each panel-frame interface to insure a continuous conductive path. Note: all Optima doors are designed to conceal gasketing when viewed from front.



RFI cabinet attenuation levels for Optima Form[4] model #701930RF measured in accordance with the F.C.C. Docket Part 15, Subpart j for Class A equipment and VDE 0871 for Class B equipment.

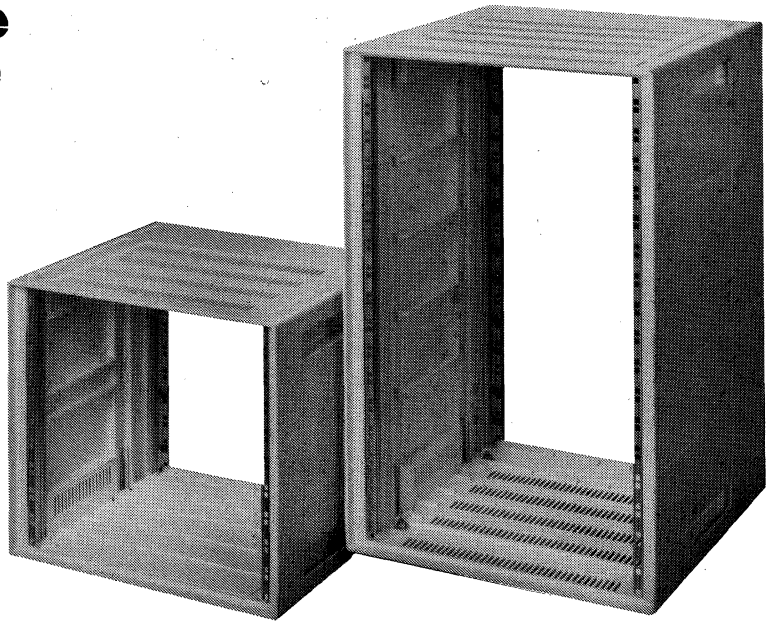
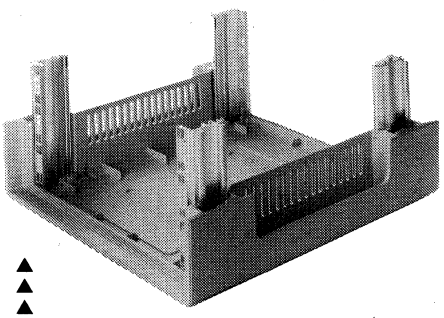
Light, expandable Optima cases are tough yet smart looking.



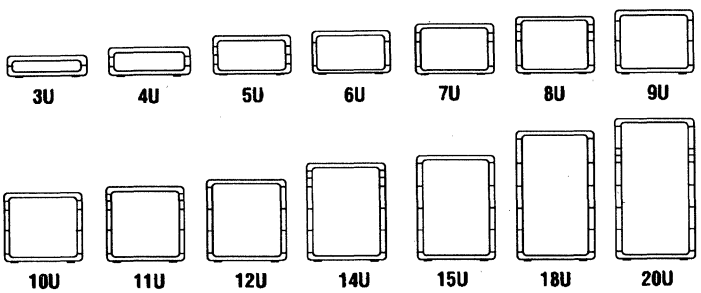
Optima Form[14] Cases

- accept 19" and 19"/2 subracks according to DIN 41 494
- accept AEG subracks (see Optima Eurocard packaging page in EEM)
- optional top and bottom vents; side vents are standard
- available with doors, vents, sliding tracks, and rubber feet with tilt legs
- built-in recessed handles
- available in gray (custom colors avaialble); unassembled, in kit form



▲
▲
▲

Lightweight and strong: You can load up these sturdy Form[14] cases. Each features extruded aluminum equipment supports and your choice of tough Polystyrol (standard) or Noryl (optional) case shells.



Expandable Form[14] is available in 14 heights and DEPTHS OF 350, 450 and 550mm. Increase case height easily by adding pairs of side spacer strips in 1U and 3U increments, along with vertical supports.

For free catalogs or more information call Optima at (404) 496-4025 or Fax (404) 496-4041

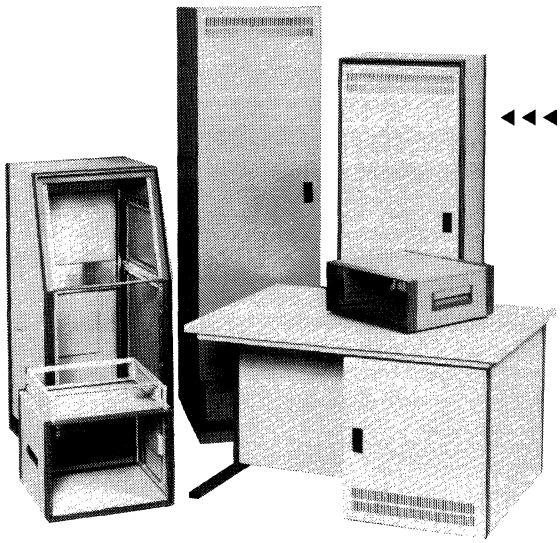
Optima® EPS

Why wait? Why inventory? Instant Optima ships in 3 days.

Standard or EMI/RFI shielded

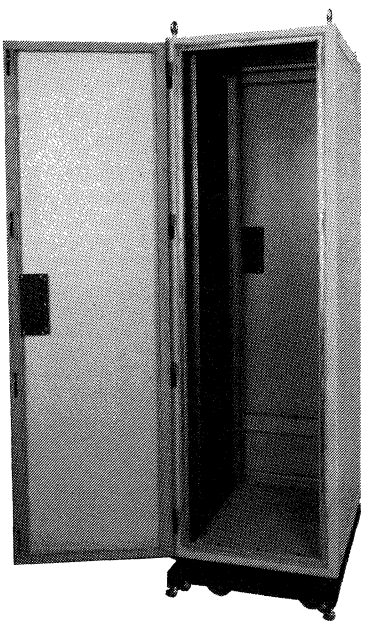
Get the configuration you want for prototyping or short-run needs:

- pre-assembled and boxed, ready for your electronics
- in popular sizes and colors in-stock
- with accessories for power, cooling and customizing your system



◀◀◀ **Vertical cabinets, instrument cases, desks, subrack assemblies and accessories shipped from Instant Optima in 3 days.**

MIL-SPEC ★★★★



Optima's modular construction adapts to your application and equipment mounting requirements. Custom designs also available. ▶▶▶

For Tempest level and EMC applications.

Optima Mil-Spec Cabinet System

The performance to meet tough government standards and the flexibility to meet your custom requirements for:

- EMI/RFI shielding
- shock and vibration
- chassis mounting and input/output
- shielded cooling systems
- structural strength and mobility

Call Optima for expert defense industry engineering support.

A custom look without the custom cost.

Stackable Optima MPS – design flexibility with a unique look

MPS performance features:

- sleek, modular construction with flexible component mounting options
- complete accessories for power, cooling and customizing your system
- EMI/RFI shielding available
- module heights: 13U, 19U, 25U; depths: 20, 24, 30"; widths: 19, 24"

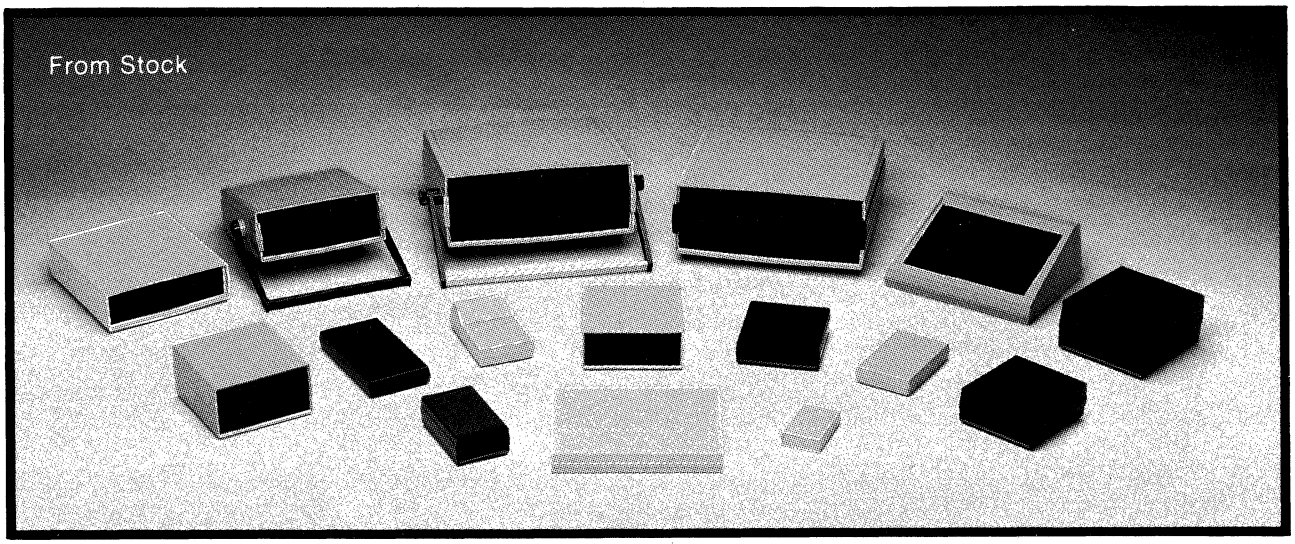
Electronic Enclosures...
designed to work for you.



Stock Enclosures • Modifications • Design Engineering Assistance • Custom Panels • Options and Accessories

- Easy to design into and easy to assemble
- Molded-through color means no chipping or scratching—and no need for refurbishing and painting during or after assembly
- Constructed of impact-resistant ABS—(flame-retardant grade to meet UL94V-0 standards, optional)
- Shielding against EMI/RFI available
- Standard colors: tan, gray, black, PC bone
- No tooling costs or set-up charges
- Molded-in mounting bosses, card guides, and panel grooves reduce assembly time and production costs
- Low-cost options and accessories available to meet end-user needs
- Available in kits and production quantities

Pac-Tec enclosures from stock, or modified "Your Way" by Pac-Tec's unique method of tool modification are available from your local stocking Distributors. For the name of your local distributor or additional information call:

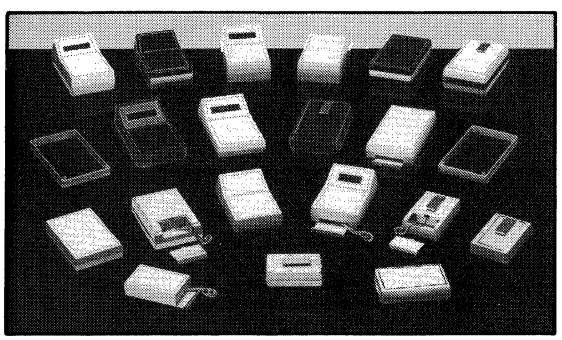
*CM69 and CF-Series may be ordered with mixed top and bottom colors.

NOTE All models are available as Prototype Kits or Production Units. Prototype Kits are individually packaged and include all parts and hardware necessary for assembly. Production Units include all parts and hardware necessary for assembly packaged in bulk with the exception of removable panels which are ordered separately.

H-Series



- The smallest enclosures in the PacTec line, "H" Series is ideal for keypads, programmable controllers, pocket pagers, computer interfaces and more.
- All models are available as prototype Kits or in Production units. Prototyping Kits are individually packaged and include all parts and hardware necessary for assembly. Production units include top and bottom covers and appropriate hardware, packaged in bulk. Removable panels for HM, HPS and HPLS production units may be ordered separately.
- Model HP is the base model, HPL is an elongated version, HM is a mini size. HPS and HPLS models have a sloped display area. The suffix "9VB" denotes an internal 9-volt battery compartment, suffix "XH" denotes the incorporation of an expander to increase overall height; the expander can be retrofitted to existing, corresponding models.

CM-Series

- CM Series is available in nine models and is especially suited for test instruments, computer peripherals and medical electronics packaging.
- All models are available as prototype Kits or Production units. Prototyping Kits are individually packaged and include all parts and hardware necessary for assembly. Production units include top and bottom covers and appropriate hardware, packaged in bulk. Removable front and rear panels may be ordered separately.
- CM69-120, CM69-180 and CM69-240 are available in the Designer Series. Top and bottom covers are interchangeable and may be ordered from stock in mixed, standard colors.

CF-Series

- CF Designer Series is available in five models and is especially suited for test instruments, computer peripherals, medical electronics packaging and more.
- All models are available as prototype Kits or Production units. Prototyping Kits are individually packaged and include all parts and hardware necessary for assembly. Production units include top and bottom covers and appropriate hardware, packaged in bulk. Removable front and rear panels may be ordered separately.
- CF Designer Series top and bottom covers are interchangeable and may be ordered from stock in mixed, standard colors.

CL-Series

- All "CL" Series models are available as prototyping Kits or Production units.
- Kit K-CLLP-34 can be assembled into one of four, pre-selected heights ranging from 2.50" through 3.25" (nominal inside dim.) in increments of .250". Kit K-CL-45 can be assembled into one of six, pre-selected heights ranging from 3.50" through 4.75" (nominal inside dim.) in increments of .250". Kits K-CLS-625, K-CLS-725 and K-CLS-825 are fixed height units.

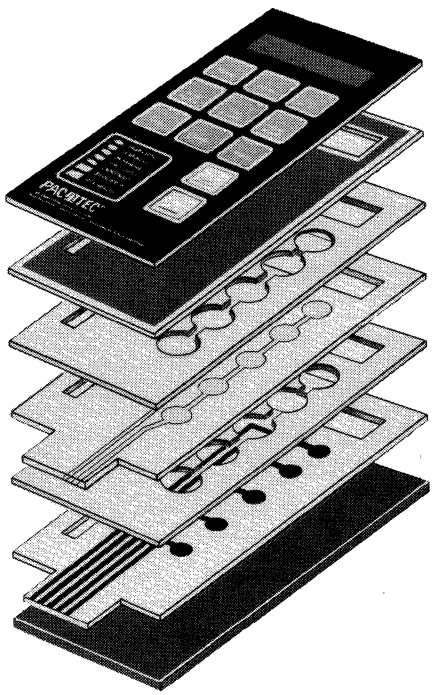
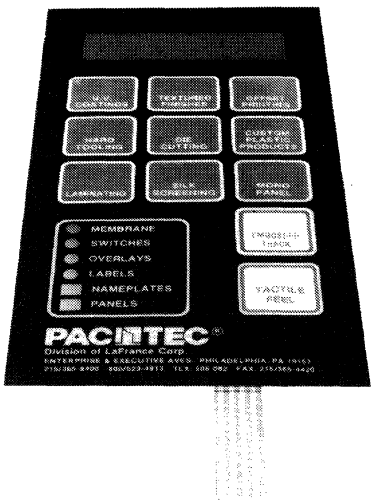
Custom and Standard Membrane Switches

- Prototypes in four weeks
- UV cured hard coat
- Composite construction
- Dead-front windows with adjusted density and/or color
- Single, double or triple pole
- Tactile feel
- Audible feedback
- Choice of interconnect: independant w/common or matrix
- Color matching to PMS, Federal Specification 595, Munsell or to color chip
- EMI/RFI shielding optional
- 100% testing



- **Graphics Panel**
- **EMI/RFI Shielding (Optional)**
- **Spacer**
- **Upper Switch Circuit**
- **Spacer**
- **Lower Switch Circuit**
- **Subpanel/Assembly Mounting**



The PacTec membrane switch assembly is completely sealed from the environment and highly impervious to chemical and solvent intrusion. Keypads may have embossed or debossed borders. Graphic panels may incorporate selective surface finishing. Final assembled thickness of the switch usually ranges from .022" to .026", including laminating adhesive layers.

SPECIFICATIONS

- **Contact Rating:** 20 milliamps at 30 VDC
- **Maximum Rating:** 100 milliamps with maximum power of 1.5 amps (50 VDC maximum)
- **Circuit Resistance:** less than 100 ohms (ON), 10 megohms (OFF)
- **Contact Resistance:**
  silver, less than 8 milliohms per square inch
  silver and graphite hybrid, less than 7 ohms per square inch
  graphite, less than 10 ohms per square inch
  stabilized nickel, less than 10 ohms per square inch
- **Open Circuit:** greater than 20 megohms
- **Life Expectancy:** 10+ million actuations
- **Activation Force:** 2-12 oz. nominal
- **Travel:** .009" to .014"
- **Bounce:** 1 to 10 milliseconds nominal
- **Operating Temperature:** -40° to +85° C
- **Moisture Transmission Rate:** 0
- **Electrostatic Interference Resistance:** optional, shielding may be incorporated
- **Tolerances:**
  hole diameter, + .01"
  steel rule die tooling, + .01"
  hard tooling, + .002"
- **Total Assembled Thickness:** .022" to .026"
- **Screen Printing Capability:** up to 365 mesh (steel)

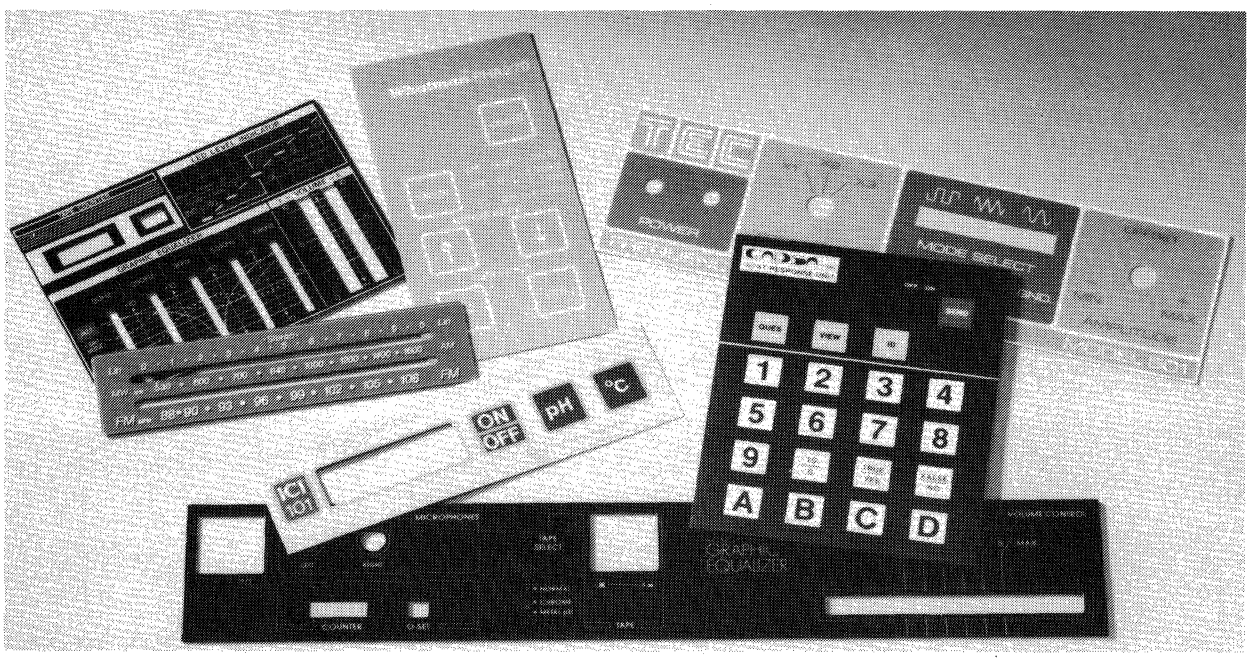
CUSTOM PRINTED OVERLAYS



Specialists in Control Panels, Nameplates, Overlays, Faceplates, Templates and Instruction Plates.

Design Assistance
The LaFrance design and engineering staffs bring together years of accumulated experience in mechanical, electronic and graphics design. Combined with totally in-house cost estimating, manufacturing and quality control a specialized team will help bring your project to a successful conclusion. Write or phone for details.

Materials of Manufacture

Polycarbonate	Polyvinylchloride
Polyester	Polystyrene

Color Matching

Standard PMS Colors	Munsell
Federal Specification 595	Custom Colors

Printing and Imprinting Methods
- SCREEN PRINTING up to 25"x30"x.003" to .060" thick.
- OFFSET PRINTING up to 25"x38"x.005" to .030" thick.
- TRANSFER PAD PRINTING with the ability to print on raised or depressed pads and curved surfaces.
- HOT STAMPING with a rainbow of brilliant colors including metallics.

Laminating Methods
- ROLLER LAMINATING to infinite length x 24"w x .003" and greater thicknesses.
- HIGH PRESSURE LAMINATING up to 25"x38"x .007" to .250" thick.

Finishing Options
- Press polishing by high pressure laminating, producing mirror, matte and satin finishes.
- Screen printed finishes include velvet, gloss, semi-gloss and matte, plus various selective textures.
- Embossing

Die Cutting
- Steel rule, up to 25"x38".
- Hard die punching.

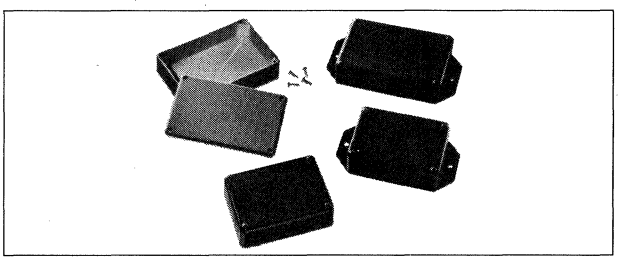
PLASTIC ELECTRONIC ENCLOSURES

A practical, low-cost package for small to medium sized electronic devices or circuitry.

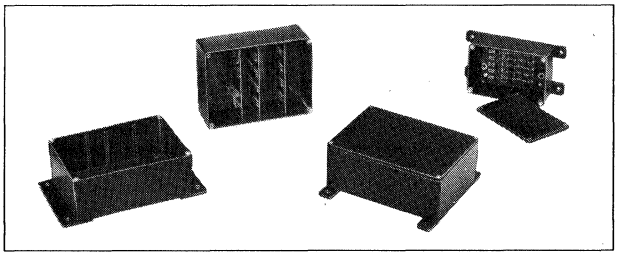
LOW PROFILE ENCLOSURES

- 5 sizes/2 styles-plain or mounting feet
- Sizes from 3.25×2.375×1 inches to 5.5×3.75×1.25 inches (L×W×H)
- Screw-on covers included
- Textured finish
- Flame retardant ABS (U/L 94V-0)



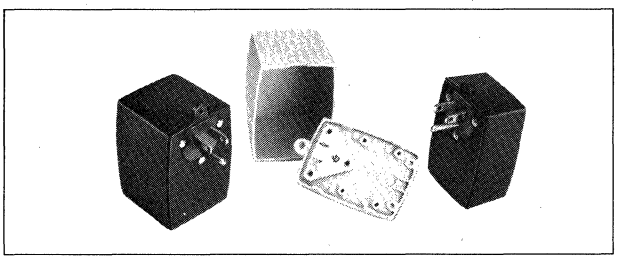
GENERAL PURPOSE

- 4 sizes/2 styles-plain or mounting feet
- Sizes from 4.5×3.0×1.75 inches to 7.5×4.5×2.25 inches (L×W×H)
- Screw-on covers included
- Flame retardant ABS (U/L 94V-0)



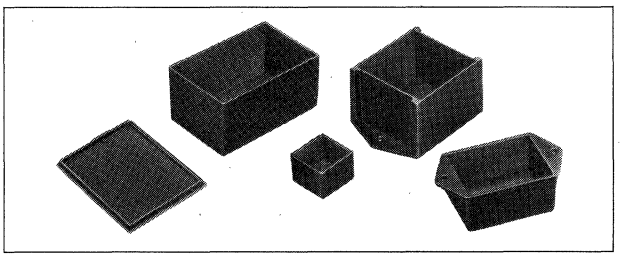
PLUG-IN MODULES

- U/L recognized component
- 2 or 3 pole grounded base
- 4 sizes
- Sizes from 2.0×2.0×1.75 inches to 2.0×3.0×2.25 inches (L×W×H)
- Flame retardant ABS (U/L 94V-0)



ENCAPSULATION BOXES & COVERS

- 5 sizes/3 styles-plain, top or bottom mounting feet
- Sizes from 1.0×1.0×.75 inches to 3.0×3.0×1.5 inches (L×W×H)
- Covers in all sizes
- Flame retardant ABS (U/L 94V-0)



TYPE 15 & 23

- Flame retardant NYLON or POLYPROPYLENE (U/L 94V-2)
- 6 standard bases
- Internal slots for PC boards
- Sizes from 1.625×1.625×2.0 inches to 2.125×2.625×3.5 inches (L×W×H)

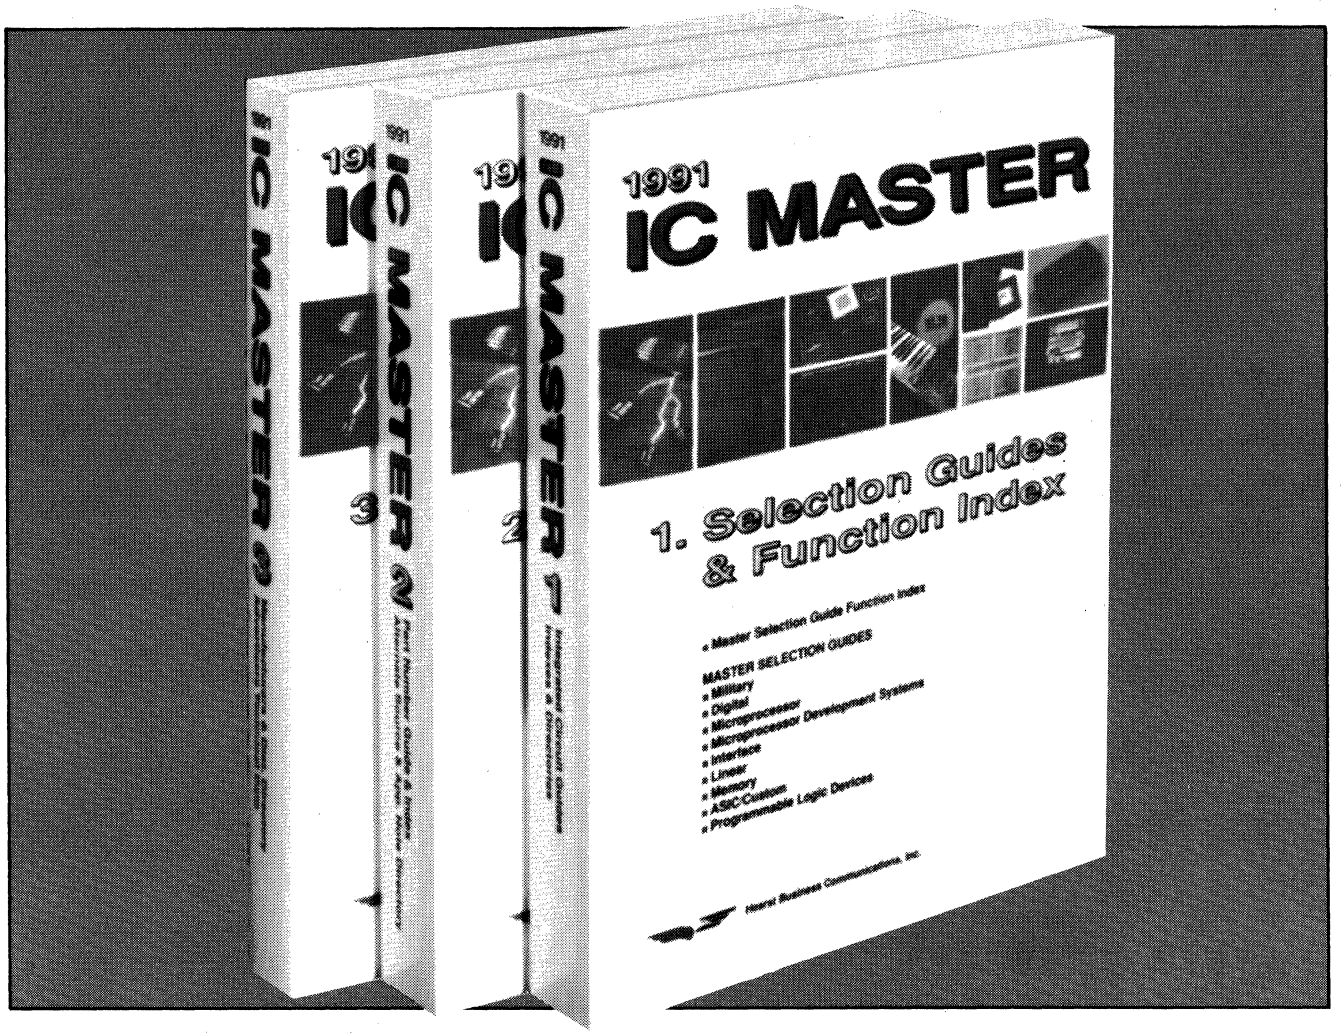
SUPER TIME SAVER!



Do you work with ICs? Do you have trouble finding the IC you need? Are you sick and tired of sifting through dozens of manufacturers' data books? Do you have trouble comparing one set of specs to another? Are you sick and tired of wasting time?

Do we have good news for you! Get your hands on the latest annual copy of the IC Master. The Master will save you both time and money. Here's how.

The Master lists every single IC you can buy. Better yet, the Master lists ICs by function. You know what you want to do. The Master tells you who makes what for what you want to do.

There's more! The Master lists every known alternate source to every integrated circuit. If somebody makes a substitute for an IC, the Master tells you. And fast!

Want to find a custom or semicustom IC? The Master tells you who the manufacturers are, what their capabilities are, and what design tools you need.

Looking for a distributor or a local sales office? The Master tells you where they are. Got a technical problem? The Master tells you who to call. Can't figure out a part number? The Master tells you how the part number systems work.

There's more! The Master has a section on microprocessor development tools with complete performance parameters. There's another section on programmable logic devices giving you everything from output configuration to PLD development systems.

Want to know if there's an application note available on a given part? The Master tells you!

If your question has anything to do with integrated circuits, you need the IC Master. Subscribe now by calling (516) 227-1314. Ask for Marie Botta. Tell Marie you need the Master now.

If you prefer, write to Marie, Hearst Business Communications, 645 Stewart Ave., Garden City, NY 11530. She'll mail you the IC Master subscription form right away.

And, if you tell her you saw it in the 1991/92 EEM, she'll take $10 off the subscription price!

IC MASTER

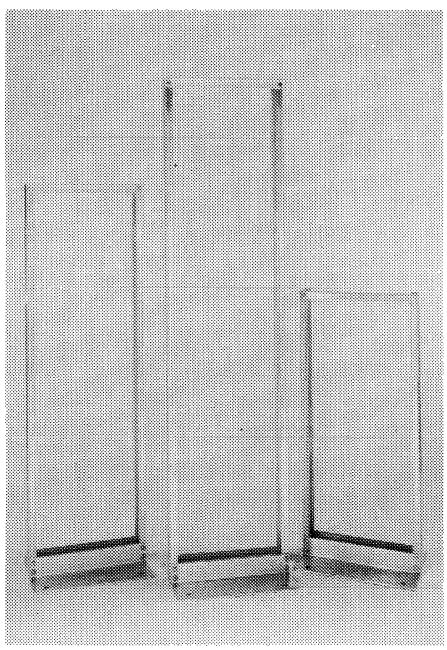
PFT MODULAR NETWORKING FRAMES

Now available from PFT - Modular Networking Frames that are UPS shippable! These all aluminum open frame racks are available in 19" and 24" rack mount widths with standard heights of 78", 70", 61" and 42". Each unit is drilled and tapped with universal EIA hole spacing. Refer to dimensional chart for detailed specifications.

PFT Modular Networking Frames are ideal for mounting electronic and test equipment, patch panels, shelves, data communication and telecommunication products as well as other cabling and rack mount products.

PFT Modular Networking Frames offer an economical alternative to your rack mount needs at a fraction of the cost of a fully enclosed vertical enclosure. These frames are ideal when a fully enclosed cabinet is not required.

All PFT Modular Networking Frames are shipped knocked down for a significant freight savings. Assembly is easily accomplished in a matter of minutes using standard socket or adjustable wrenches. Frames are designed to bolt to the floor for extra stability.



NEW

PFT Special Features:

- Heavy duty aluminum extrusion construction utilizing 6105-T6 aluminum alloy
- 10—32 dia. tapped holes on front and rear flanges
- EIA hole spacing full height of vertical uprights
- Available in smooth black oven baked or standard mil finish
- Designed for multi-bay configurations
- UPS shippable for economical freight costs
- Designed to accommodate a variety of PFT accessories
- Pre-threaded holes allow for quick and easy assembly

Each PFT Modular Networking Frame Consists of:

- 2 fully tapped vertical uprights
- 2 mounting bases (front and rear)
- top angle
- assembly hardware

IN STOCK FOR IMMEDIATE DELIVERY

For current pricing and availability, call your local PFT Distributor or call PFT toll free at 1-800-558-7297.

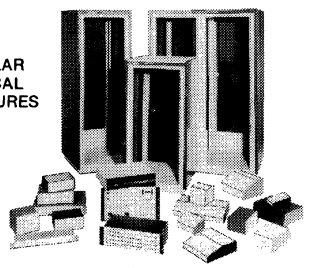
PFT MODULAR ENCLOSURES

MODULAR VERTICAL ENCLOSURES



Mod-u-line Modified Mod-u-box

PFT MODULAR ENCLOSURES

A complete and compatible family of value engineered cabinets and vertical rack enclosures which meet the highest standards of quality, versatility and ease of use at a surprisingly modest price.

All four lines: Mod-u-desk, Modular Vertical Enclosures, Mod-u-line and Mod-u-box are specifically designed to complement each other and other standard electronics industry products.

Material - All PFT enclosures are manufactured from heavy gauge aluminum or cold rolled steel.

Finish - Beautiful oven-baked smooth and textured paints available in a selection of colors.

Design - Ease of assembly and replaceability of all parts are built-in features.

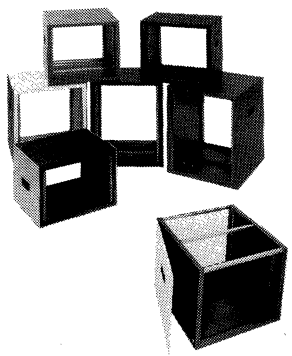
Price - Value engineering means top performance for bottom dollar.

Mod-u-desk®

Designed to provide optimum flexibility and adaptability, **PFT Modular Desk Rack Enclosures** are premium quality knock down cabinet racks in the EIA standard 19" rack mount width. PFT's knock down enclosures allow shipment at reduced cost **without sacrificing structural integrity.** A **Mod-u-desk** rack enclosure can be assembled in minutes.

FEATURES

- **Construction** - Mod-u-desk cabinets are all aluminum constructed except for internal crossbars and mounting rails which are constructed from 16 gauge steel finished in a zinc plate with a gold chromate coating. Top, bottom and interior side panels are fabricated from .060" aluminum with exterior dress sides .125" aluminum. All panels have exterior surfaces textured to enhance durability while optimizing the units' cosmetic appearance.
- **Equipment mounting** is easily accomplished by utilizing clip nuts, standard with each unit, enabling quick, economical installation of equipment. All mounting rails have two sets of .281" diameter holes in the EIA pattern.
- **Adjustable** mounting rails can be located throughout the depth of the cabinet in 1 inch increments to allow you to match the internal mounting dimension to fit your needs.
- **Finish color** is textured polyurethane or water base to harmonize with standard electronics industry equipment. Select from the wide variety of standard PFT colors.
- **Accessories for Modular Desk Rack Cabinets** compatible with competitors' racks are available. Filler panels, fans and many other accessories are available.
- **Shipping costs** and warehouse space requirements are significantly reduced as a result of the knock down construction.



HOW TO ORDER

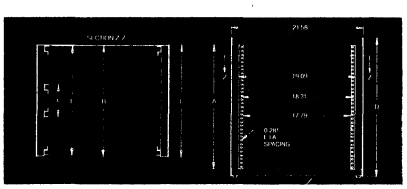
Mod-u-desk rack cabinets are simple to order. All Mod-u-desk cabinet part numbers begin with MDR to identify the part as a Mod-u-desk Rack and will consist of a total of 12 characters.

The letters MDR are followed by six digits representing the size of the cabinet. The first two digits represent the standard EIA width of 19". The next two digits identify the height, where you have a choice of 12", 15", 19" or 22". The next two digits identify the depth where you have a choice of either a 17" or 23" depth. At this point, you should have a 9 digit part number which looks similar to this example: MDR191523. This represents a Mod-u-desk Rack cabinet for 19" rack mount equipment, 15" in height and 23" deep.

The tenth character identifies what type of venting you desire. You have four choices. Place **P** if you desire your unit **P**lain (units with no venting). Place a **T** in this position if you desire venting in the **T**op panel, a **B** if you desire venting in the **B**ottom and a **V** if you want your unit **V**ented both top and bottom.

The last two characters represent the color scheme you desire (refer to the color chart below). The eleventh digit represents the color you desire the top, bottom and interior side panels. The last digit, the twelfth, represents the color you desire the exterior side panels (it is common for customers to desire their entire unit one color in which case you put the same color code in the last two characters).

Once you have selected your options, you will end up with a twelve character part number similar to this example: MDR191523VGC. This represents a Mod-u-desk rack cabinet for 19" rack equipment, 15" high, 23" deep with both the top and bottom panels vented. The top, bottom and interior side panels will be light grey and the exterior side panels charcoal.



V = The Designation for Venting
Use "P" to receive plain units (no venting)
Use "T" to receive top panel only vented
Use "B" to receive bottom panel only vented
Use "V" to receive top and bottom panels vented

PFT Standard venting consists of 2 - 3.375" strips of .125"x .375" obround holes on .250" centers.

COLOR CHART

CODE	DESCRIPTION	FED STD #
R	Royal Blue	595A-25045
H	Ash White	595A-26622
W	Off White	595A-27722
B	Sky Blue	595A-25109
A	Black	595A-27038
C	Charcoal	595A-26081
G	Light Grey	595A-26493
T	Tan	595A-23448

Use the color chart to designate the color of your unit. Select the color desired for the top, bottom and interior side panels and place its code in the "Y" location. Select the color desired for the exterior side panels and place its code in the "Z" location.

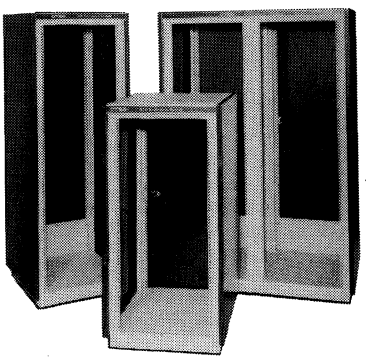
For current pricing and availability, call your local PFT Distributor or call PFT toll free at 1-800-558-7297.

PFT MODULAR ENCLOSURES

MODULAR VERTICAL ENCLOSURES

"Tough as welded" with the cost savings and versatility of knock down enclosures.

FEATURES:



- **Construction** - Heavy duty steel construction ensures durability. Corner Posts - 13 gauge C.R.S. Top and bottom assemblies - 14 gauge C.R.S. All other components - 18 gauge C.R.S. All metal forming, welding and painting is done in PFT manufacturing facilities.
- **Ease of Assembly** - PFT's self-registration design enables quick and routine assembly. One person can assemble these vertical enclosures in minutes. Unique tab and slot engineering ensures all parts accurately self-align.
- **Knock Down Units Reduce Shipping Costs** - PFT Modular Enclosures save up to 66% in shipping costs - savings which are passed on to you.
- **Modular Construction Reduces Parts Replacement Costs** - Never replace an entire enclosure again. All PFT cabinet parts, including frame components, are removable, interchangeable and replaceable.
- **Colors and Finish** - Enclosures are finished with oven-baked, EPA - approved paint. Rear door and side panels have a textured Royal Blue finish. All other components are textured in Ash White. This color combination harmonizes with standard electronics industry products. Other colors are available as modifications.
- **Multi-Bay Add-Ons** - Modular enclosures are designed to bolt together easily and securely to form multi-bay configurations in any quantity. A variety of special multi-bay accessories is available. Turn two pages under **VERTICAL ENCLOSURE ACCESSORIES** for a complete list.
- **Full Line of Accessories** - A full line of accessories to add versatility and to enhance the performance of your vertical enclosures are available. The line includes: plexiglass doors, casters, blower unit, door locks, drawers and more. Turn two pages under the **VERTICAL ENCLOSURE ACCESSORIES** heading for a complete list. Note: 17" wide Mod-u-line with rack side panels fits 19" vertical enclosures.
- **Modifications** - PFT will make in-plant modifications to your specifications.

To use the chart below, identify the size of the cabinet you wish to order with the 6 digits in the left hand column. The first 4 digits are from the top and bottom pack you wish to order and the last 2 digits are from the corner post pack you wish to order.

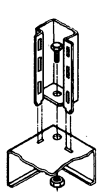
UNIQUE CORNER POST DESIGN



CORNER FRAME DETAIL

PFT combines two unique design features to provide strength and rigidity previously associated only with more expensive welded units. Interlocking tab and slot construction in the corner joints eliminates torsional movement of the corner posts. Secondly, a heavy gauge mounting plate is welded, slightly recessed, into the top and bottom of each corner post. Thus, when the corner bolt is tightened, the cabinet base (or top) flexes slightly, ensuring that the joint is always preloaded in tension, providing additional rigidity.

For current pricing and availability, call your local PFT Distributor or call PFT toll free at 1-800-558-7297.

PFT MODULAR ENCLOSURES

HOW TO ORDER MODULAR VERTICAL ENCLOSURES

Modular Vertical Enclosures are simple to order. When ordering, you have 3 considerations to make: what size and style of frame you desire, what size and style side panels and doors and what accessories are needed for your unit.

STEP 1

SELECTING AND ORDERING A FRAME

Every frame will be ordered in two segments; the first will be a top and bottom pack which determines the rack mounting width and depth, the second a corner post pack which determines the vertical opening of your cabinet.

Top and Bottom Packs - Each top and bottom pack will consist of a 12 character part number. The first five characters are always MVETB which designates that you are ordering a **M**odular **V**ertical **E**nclosure **T**op and **B**ottom Pack.

The next 4 characters will designate the width and depth of the cabinet you will be ordering. PFT offers 19" or 24" EIA standard widths and 25" or 30" depths. Select the width and depth you desire. You will now have a part number which should resemble this example: MVETB1930. In this example you would be ordering a top and bottom that meets EIA standards for 19" wide cabinets and will be 30" deep. (See dimensional charts for more detailed information).

The next character identifies the style of cabinet top you desire. You may select a louvered, open or solid top. If you require a louvered top, place an "L" in the next character, use an "O" for open or an "S" for solid.

In the next character you can select a solid or open bottom. Use an "S" to designate a solid bottom or an "O" to designate a bottom with an opening (a cutout for cabling, filtering, air access, etc.).

Note - Cutouts have an opening dimension of 14"x14" for all open bottom bases regardless of base size.

The last character is to designate the color. Use the color chart on previos page. When you are finished you will end up with a 12 character part number which resembles this example: MVETB1925LSH. In this example, you would be selecting a top and bottom for a 19" wide by 25" deep cabinet with a louvered top and a solid bottom in PFT's ash white.

Corner post packs - Each corner post pack will consist of a 9 character part number. The first five characters are always MVECP which designates that you are ordering a **M**odular **V**ertical **E**nclosure **C**orner **P**ost Pack.

The next 2 characters will designate the height of the cabinet you will be ordering. PFT offers 42", 61", 70" and 77" heights. Select the height you desire. You will now have a part number which should resemble this example: MVECP61. In this example you would be ordering corner posts for a 61" tall cabinet. (See the dimensional chart for detailed information).

In the next character you should place a "P" which will designate our standard corner post configuration. (Other designations are for modified or special order corner posts).

The last character is to designate the color.

Note - The color you select for the corner post should be the same as the one you selected for the top and bottom pack. When you are finished you will end up with a 9 character part number which resembles this example: MVECP61PH. This example would provide you with corner posts to make a 61" tall cabinet in PFT's ash white.

STEP 2

SELECTING SIDE PANELS AND DOORS

To dress your frame into an enclosed cabinet you will need to select the side panels and/or doors you desire. You have 3 considerations in enclosing your cabinet: side panels, front door and rear door.

Side Panel Packs - Each side panel will consist of an 11 character part number. The first 5 characters are always MVESP which designates that you are ordering a **M**odular **V**ertical **E**nclosure **S**ide **P**anel Pack (2 side panels per pack).

The next 4 characters will designate the height and depth of the cabinet on which the side panels fit. For example, if you are ordering side panels for a 42" tall and 25" deep cabinet, your part number will consist of MVESP4225. PFT offers cabinets in heights of 42", 61", 70" and 77" and depths of 25" and 30".

Next designate whether you desire a plain (P) or louvered (L) side panel. The last character will designate the color using the color chart provided.

When you are finished you will end up with a part number like this example: MVESP7030PR. This part number identifies side panels for a 70" tall and 30" deep cabinet, plain in nature and royal blue in color.

Rear and Front Door Packs - Doors for Modular Vertical Cabinets are designed to mount on either the front or rear. You have three basic choices in door packs: 1) Long Steel Door 2) A Short Door package or 3) Plexiglass Door. Decide what type of door you desire on the front and rear of the cabinet then follow the instructions below to assure you order the door that meets your particular needs.

Note - All Steel Doors mount on the left hand side of the frame only. PlexiGlass Doors mount on either the left hand or right hand side of the frame.

Long Steel Door - The long steel door will consist of an 11 character part number. The first five characters are always MVELD which designates that you are ordering a **M**odular **V**ertical **E**nclosure **L**ong **D**oor Pack.

The next 4 characters designate the width and height of the cabinet for which the door you are ordering will fit. For example, if you desire to order a door for a 19" wide, 61" tall cabinet, your part number would consist of MVELD1961. PFT offers cabinets in standard 19" or 24" widths and heights of 42", 61", 70" and 77".

The next character designates whether you want your door to be plain (P) or louvered (L) and the last character the color. Use the color chart provided.

You should end up with an 11 character part number which looks like this: MVELD1942LR. This part number represents a long door for a 19" wide, 42" tall cabinet, louvered in PFT's royal blue color.

Note - Generally you will want your rear door and your side panels the same color. If you are ordering both, be sure to check that you are using the same color code.

Short Door Packs - The short steel door is typically used as a rear door and will consist of a 12 character part number. The first five characters are always MVESD which designates that you are ordering a **M**odular **V**ertical **E**nclosure **S**hort **D**oor Pack.

The next 4 characters will designate the width and height of the cabinet for which the door you are ordering will fit. For example, if you desire to order a door for a 24" wide, 61" tall cabinet, your part number would consist of MVESD2461. PFT offers cabinets in standard 19" or 24" widths and heights of 42", 61", 70" and 77".

The next character designates whether you want your door to be plain (P) or louvered (L).

Every short door package comes with an access panel which fits the bottom portion of the cabinet (approximately 8.72"). This panel can be removed or modified to allow for a fan assembly or cable access below the door mounting. The next character (the 11th) specifies the color you desire the door.

NOTE - The last character represents the color of the access panel. Typically, the access panel is the same color as the frame you order. Use the color chart provided.

You should end up with a 12 character part number which looks like this: MVESD1942PRH. This part number represents a short door for a 19" wide, 42" tall cabinet, plain in PFT's royal blue with an access panel in PFT's ash white.

Plexiglass Door Packs - Plexiglass door packs consist of an 8 character part number. The first two characters are always PD which designates a **P**lexiglass **D**oor Pack.

The next 4 characters designate the width and height of the frame you need the door to fit. For example, if you need a Plexiglass door for a 24" wide and 61" tall cabinet, then you would designate your need by specifying the part number PD2461. PFT offers Plexiglass doors which fit either 19" or 24" wide frames in heights of 42", 61", 70" or 77".

The next character designates whether you want a **L**ocking (use a **L**) or **N**on-Locking (use a **N**) feature.

The last character designates whether you want your Plexiglass door with **S**moked Plexiglass Panel (use a **S**) or **C**lear Plexiglass Panel (use a **C**).

You should end up with an 8 character part number which looks like this: PD2470LC. This part number represents a Plexiglass Door for a 24" wide and 70" tall cabinet with a locking feature using Clear Plexiglass.

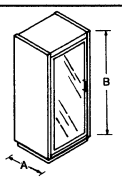
STEP 3

PFT offers a wide variety of accessories to enhance your modular vertical enclosure. See accessory pages for more details.

For current pricing and availability, call your local PFT Distributor or call PFT toll free at 1-800-558-7297.

PFT MODULAR ENCLOSURES

MODULAR VERTICAL ENCLOSURE ACCESSORIES



PLEXIDOORS

- Lift-off hinge design
- 3/16" thick acrylic plexiglass
- Full length magnetic strip
- Clear (C) or smoked (S) plexiglass
- Locking (L) or non-locking (N) styles
- Mounts on either side of frame
- Panel clearance of .88" is provided; VMR rail series should be used if a bezel or knob exceeding .88" exists on the rack mount equipment

PART NUMBER	"A" WIDTH	"B" HEIGHT
PD1942 Series	20.12"	43.63"

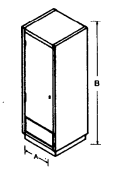
PD2470 Series	25.12"	71.63"
PD2477 Series	25.12"	78.63"



SHORT DOOR PACKS

SOLID SHORT DOORS

- 18 gauge cold rolled steel
- Lift-off hinge design
- Panel clearance 1.38" provided
- Solid door packs are short doors and include 8.72" access panel
- Door mounts to left corner post only
- Latch, adhesive-backed gasketing, 5/32 allen wrench, and all hardware provided in pack
- Textured royal blue finish in stock

PART NUMBER	"A" WIDTH	"B" HEIGHT
MVESD1942 Series	20.12"	34.88"
MVESD1961 Series	20.12"	54.13"

315 CFM FAN ASSEMBLY

- Draws air into the equipment rack
- Consists of 3-105 CFM muffin fans
- Fans mounted into a painted housing
- Utilizes washable air filter
- 5.22"x19.00" stainless steel grill
- 6' long 115V power cord
- Rack mountable on front or rear of any 19" or 24" standard EIA rack. To mount in 24" rack use AB315 adapter bracket

PART NUMBER
FN315

For current pricing and availability, call your local PFT Distributor or call PFT toll free at 1-800-558-7297.

PFT MODULAR ENCLOSURES

MODULAR VERTICAL ENCLOSURE ACCESSORIES

ELECTRICAL OUTLET STRIPS

- Components all UL approved
- 15A, 125V receptacles
- 6' power cord
- Attach to MVE corner posts
- OS2408 has on/off switch

PART NUMBER	LENGTH	NUMBER OF OUTLETS
OS2408	24"	8

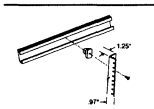
HORIZONTAL MOUNTING RAIL KIT

- 16 gauge cold rolled steel channels
- Used in conjunction with 90° tapped mounting rails, multi-formed rails, and vertical conversion rail kits
- Zinc plated with gold chromate finish
- Sold in pairs

PART NUMBER	RAIL LENGTH	CABINET DEPTH
HMR25	20.25"	25"
HMR30	26.25"	30"



90° TAPPED MOUNTING RAIL KIT

- 12 gauge cold rolled steel
- Must be used in conjunction with horizontal mounting rail kits
- $^{10}/_{32}$ tapped holes
- Zinc plated with gold chromate finish
- Fully adjustable from front to rear of cabinet
- Sold in pairs

PART NUMBER	RAIL LENGTH	CABINET HEIGHT

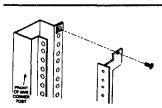
BALL BEARING SLIDES

- Sold in pairs; hardware included in kit
- Front and rear mounting brackets included
- Slide length is 18"; slide travel is 19"

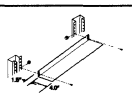
PART NUMBER
BBS01



VERTICAL CORNER TAPPED MOUNTING RAIL KIT

- 12 gauge cold rolled steel
- Zinc plated with gold chromate finish
- Rails attach to inside of MVE corner post
- Vertical tapped rails permit use of cup head screws without clipnuts or cage nuts
- 10/32 tapped holes
- Sold in pairs

PART NUMBER	RAIL LENGTH	CABINET HEIGHT
CTR42	42.06"	42"
CTR61	61.31"	61"
CTR70	70.06"	70"
CTR77	77.06"	77"



EQUIPMENT MOUNTING ANGLE KIT

- 11 gauge cold rolled steel
- Zinc plated with gold chromate finish
- Rated for 400 lb. load capacity
- Attach directly to MVE corner posts
- Sold in pairs

PART NUMBER	RAIL LENGTH	CABINET DEPTH
EMA25	20.25"	25"
EMA30	26.31"	30"

CASTERS

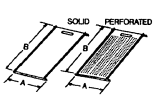
- 3.5" diameter
- Hard rubber wheels
- Each caster rated for 200 lbs. capacity
- Sold in sets of four

PART NUMBER
CA200

LEG LEVELERS

- Threaded, steel construction
- Nickel plated
- 3" tall

PART NUMBER
LL03S



EQUIPMENT SHELVES

- 16 gauge cold rolled steel
- Smooth ash white finish in stock
- Rated at 200 lbs. capacity
- Mounts to MVE cabinet corner posts
- Hardware included in pack
- Perforated shelves have three 5" wide bands of .250" diamond shaped perforations on .50" centers
- 1"x6" obround cable opening in rear

PART NUMBER	"A" WIDTH	"B" DEPTH

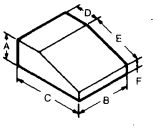
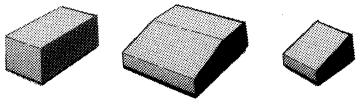
HOW TO ORDER

Select appropriate PFT model number and specify color combination by adding color suffix, the wrapper color first followed by the insert color. For example, an **MBS-3-4-6** with a **BLACK** wrap-around base and an **OFF-WHITE** insert is ordered as follows: **"MBS 3-4-6 BLACK/OFF-WHITE".**



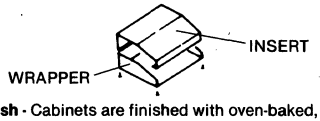
RECTANGLE KEYBOARD SLOPE FRONT



MBL MBK MBS

FEATURES:

- **Construction** - Made from aluminum for lightweight strength and ease of handling. Wrap around base is .090" aluminum; sloped or flat front insert is .062" aluminum.
- **Ease of Assembly** - Simple two piece design assembles or disassembles in minutes with just four screws. Allows easy access to your enclosed components. Individual replacement parts also may be ordered.



- **Colors & Finish** - Cabinets are finished with oven-baked, EPA-approved paint. Wrap-around base has a textured finish while front insert is smooth. Standard colors are:

Wrap-Around Base	Front Insert
*Blue	*Off-White
Charcoal	Light Grey
Black	Black
Tan	Tan

***Note - Blue** and **Off-White** cabinets in stock for immediate delivery. Call for current availability of other standard color combinations.

- **Modifications** - PFT will make in-plant modifications to your specifications. Popular modifications include: silkscreening, venting, cut-outs, etc. Steel cabinets are also available through a special order.

For current pricing and availability, call your local PFT Distributor or call PFT toll free at 1-800-558-7297.

***Note** - This size Mod-u-line with rack side panels is a perfect fit for 19" wide Modular Vertical Enclosures.

HOW TO ORDER

A complete cabinet is ordered in three segments. 1) **Mod-u-line Cabinet Less Sides (MCLS)** includes: front, back, top and bottom panels plus interior rails. 2) Side Panels are ordered by style. **Side Panel Plain (SPP) Side Panel Rack (SPR), Side Panel Handle (SPH);** by size and color. Side panels are symmetrical - there are no righthand or lefthand panels. 3) Optional **Chassis Plate (CP)** is ordered individually according to table below. For example, a 3 9/16" x 16 5/8" x 11 7/8" cabinet with a **BLUE** exterior and **OFF-WHITE** front panel which has **BLUE RACK** side panels and a **16 5/8" x 11 7/8"** chassis plate is ordered as: **MCLS 3-17-12 BLUE/OFF-WHITE**, plus **SPR 3-12 BLUE, CP 17-12.**

STANDARD VENTED TOP AND BOTTOM PANELS ORDERING INSTRUCTION - A 1" wide ventilation strip comprised of 1/8" holes on 1/4" centers may be ordered on either top **(VT)** or bottom **(VB)** panels or on both **(VTB)**, if desired. Example: An **MCLS 3-17-12-VTB TAN/WHITE** would be vented on both top and bottom panels.

FEATURES:

- **Construction** - Made from aluminum for lightweight strength and ease of handling. Side panels are .125" aluminum. All other components are .062" aluminum. Side panels and chassis plates are ordered separately.
- **Ease of Assembly** - Mod-u-line cabinets are designed to assemble in minutes. The top cover is easily removed for complete and immediate access to the inside.
- **Replacement Parts** - All components of Mod-u-line may be replaced in seconds with stock panels. This feature reduces damage or redesign costs by eliminating need to repaint or replace the entire unit.
- **Colors & Finish** - Cabinets are finished with oven-baked, EPA-approved paint. All exterior parts have a textured finish, except the front panel, which has a smooth finish. Standard colors are:

Top, Bottom & Rear Panels	Front Panel	Side Panels
*Blue	*Off-White	*Blue
Charcoal	Light Grey	Charcoal
Black	Black	Black
Tan	Tan	Tan

***Note** - **BLUE** and **OFF-WHITE** components in stock for immediate delivery. Call for current availability of other standard color combinations. Chassis plate and interior rails are gold alodined.

UNIBOX SERIES 100 STANDARD ENCLOSURE

Unibox Standard enclosures are the heart of the Unibox Packaging System. Designed to stand alone or to be complimented by a variety of Unibox *Series 200* accessory items, the Unibox enclosure offers the professional approach to electronic packaging. Enclosures are molded of high impact ABS, and feature an attractive scratch resistant texture. Unlike their metal counterparts, Unibox plastic enclosures can be easily modified to simplify project construction. Unibox enclosures also feature vertical card guides and horizontal mounting bosses to accommodate Unibox *Series 300* circuit boards. Each unit is provided complete with assembly hardware.

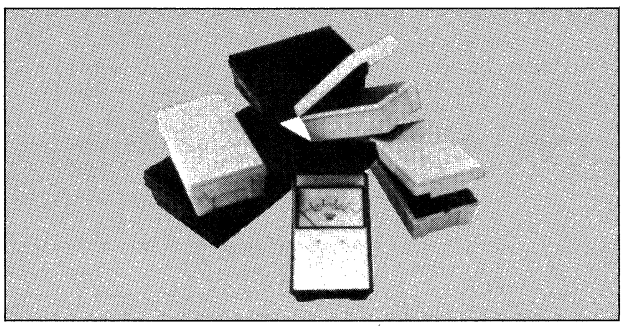
PORTABLE INSTRUMENT ENCLOSURES

"TESTAR" SERIES



Recognizing the need for off-the-shelf, low cost, portable instrument enclosures, S&S Associates carries a family of superior quality cases. Eliminating expensive engineering and tooling costs, Testar Enclosures are ideally suited for In-House Test Equipment, Field Service instrumentation and Old/New Product Packaging. Testars are all molded in one-piece construction and have a hinged lid which snaps closed to provide protection for any panel mounted items. Testars are also available without a hinge lid for other applications. Standard options such as built-in-meters, aluminum panels, labeling, silk screening, and machining are available.

The Ultimate in Product Protection

Whether you're transporting by Air, Land or Sea, STAR CASES protect everything exposed to shock, vibration and mis-handling. Experience first-hand why no other case protects as well or lasts as long as a STAR CASE.

To find out how a Reusable, tested and proven, ATA* STAR CASE can cost less than a cardboard box, Call for your FREE Factual ATA Case Report.

**ATA (Air Transport Association of America) establishes criteria, Specification 300 Category I, II or III, for rating the air worthiness of different types of cases and containers. ATA Specification 300 Category I test procedures simulate 100 airline trips. When put to the test, STAR CASES performance surpass the criteria established by the ATA.*

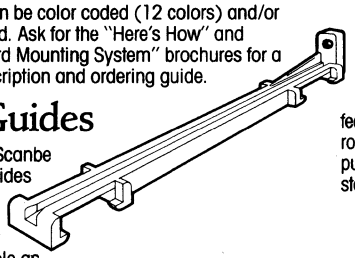
Card Cages...Components..

CARD CAGE COMPONENTS

Build your own card cage from these *five basic parts*—card guides, mounting bars, spacers, mounting feet and end plates. Thousands of possible combinations can be assembled.

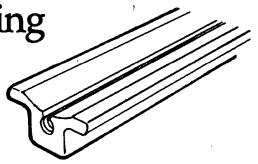
All items can be color coded (12 colors) and/or hot ID stamped. Ask for the "Here's How" and "Snap File Card Mounting System" brochures for a complete description and ordering guide.

Card Guides



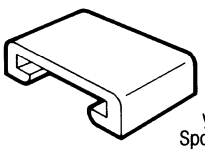
The patented Scanbe "T" series guides have integral connector mounting feet or are available as Thru-Guides for separate connector mounting components. Lengths 2.750" to 12.815". Also Snap-In Guides 2.500" to 12.000".

Mounting Bars



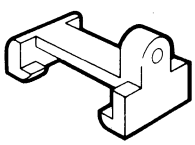
For "T" Series Guides and "A" Series mounting feet, up to 24" length, for single and multiple card rows. For Snap-In guides mounting bars are prepunched with .5, .6, .7 or .75" centers. 17" length standard, but can be cut to length.

Spacers



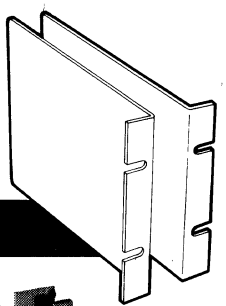
Adjust the nominal .500" width of "T" Series card guides to your card spacing. Spacers 0.031" to 1.000" for card spacing 0.531" to 1.500".

Connector Mounting



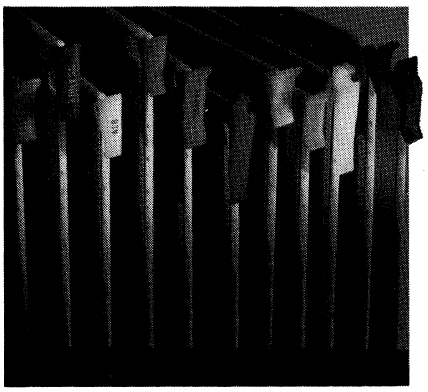
Thru-hole or with 4-40 threaded brass or stainless steel inserts. Available as "A" Series nylon mounting feet that slide on mounting bars, or as a connector mounting bar for high insertion force connectors.

End Plates



Mate with mounting bars and provide ears for rack or panel mounting. Heights 5.22" to 17.47", depths 8.25" to 11.25".

Injectors/Ejectors



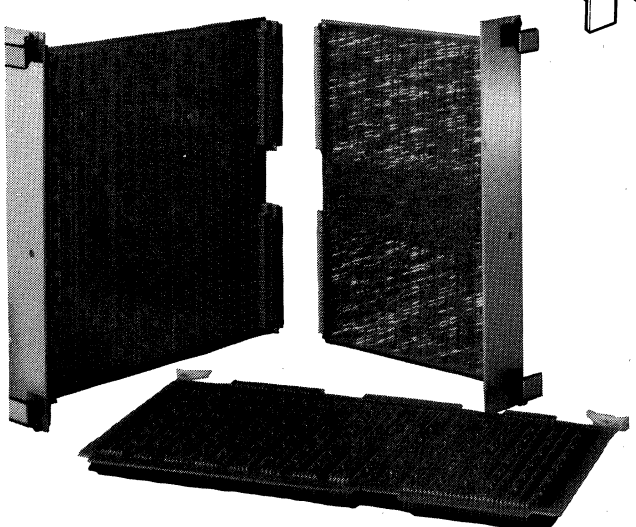
Scanbe circuit card ejectors fit virtually all card support systems. They easily attach by means of roll pins to cards either 0.062" or 0.093" thickness, and operate by lever action against the card guide or mounting bar.

Styles:

S-200	Single action, .375" wide
S-202	Slim line single action, .250" wide
S-203	Low profile (.125") single action
S-205	Single action, offset
S-206	Locking ejector for "T" series guides
S-208	Low profile tabbed
S-209	Double action injector/ejector
S-211	Single action, medium length
S-212	Single action, for larger cards
S-213	Ultra long for maximum leverage
S-214	Double action for sheet metal cage
S-216	E-Z-Ject VME panel ejector
S-217	Eurocard injector/ejector

WIRE WRAP BUS BOARDS

Scanbe wire wrap bus boards have high-density patterns that accommodate DIL pin spacing from 0.3" up, plus extensive power & ground planes with easy power connection. All pin sockets are gold plated quad contact. VME and Multibus II boards have on-board decoupling capacitors, and come with a front panel with E-Z-Ject injector/ejectors. Custom panels are available.



Bus, Size	W/W Pattern	Part No.
VME, 3U	Universal	VME-1101-01
VME, 6U	20-pin DIL + Univ	VME-2100-01
VME, 6U	Universal	VME-2101-01
VME, 6U	Universal + PGA	VME-2102-01
Multibus I	Universal, 2-level	12330-02
Multibus I	Universal, 3-level	12330-03
Multibus II	Universal	MBII-2201-01
Multibus II	Universal + PGA	MBII-2202-01

WIRE WRAP SERVICES

Scanbe has full wire wrap capability from initial design through NC wire and assembly, packaging, test and documentation. Find out how complete Scanbe service can save time and cut cost in your application.

Wire wrap boards are available for Multibus, VME, the 3D series of 6.25x5.56" boards, and in the 2D series socket boards and panels (pictured).

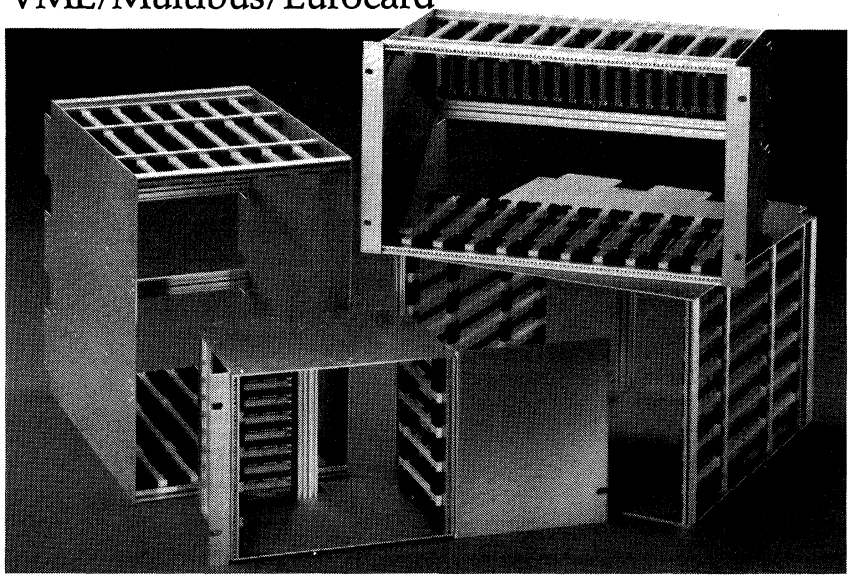
CARD CAGES

VME/Multibus/Eurocard



All Scanbe Card Cages are fully assembled and tested.

Scanbe's Eurocard cages come in hundreds of combinations from 3U to 9U heights, 100mm to 400mm depths, and from 3 to 21 slots. Universal mount, vertical rack mount and horizontal rack mount are available.

For VMEbus or Multibus II, high quality J1 backplanes are installed and tested — J2 backplanes are optional.

Universal Mount

For use inside enclosures, equipment drawers, towers and subsystems. End plates have captive fasteners for easy installation.

VME
3Ux160mm: 9,12,16,20 slots
6Ux160mm: 3,5,7,9,12,16,20,21 slots
9Ux400mm: 12,16,20 slots
Multibus II
6Ux220mm: 3,5,7,9,12,16,20 slots

Vertical Rack Mount

Standard 19" rack mounting unit with cards vertically oriented.

VME
3Ux160mm: 9,12,16,20 slots
6Ux160mm: 9,12,16,20,21 slots
9Ux400mm: 12,16,20 slots
Multibus II
6Ux220mm: 9,12,16,20 slots

Horizontal Rack Mount

Save rack space on cages with 9 slots or less.

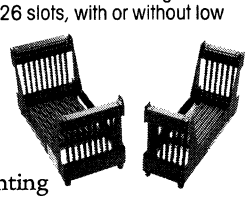
VME
6Ux160mm: 3,5,7,9 slots
Multibus II
6Ux220mm: 3,5,7,9 slots

Accessories:

Center adapter 60475-01 divides a 6Ux160 slot into two 3U slots. Fans, covers, J2 and J1/J2 monolithic backplanes are all available.

Multibus I

The MICRO-FILE™ line of Multibus cages is available with 4 to 26 slots, with or without low noise backplanes, and in universal mount, vertical rack mount or horizontal rack mount.



Standard Mounting

Slots	Part No.	Slots	Part No.
4	30660-04	12	30660-12
4*	30665-04	14	30660-14
6	30660-06	16	30660-16
8	30660-08	20	30660-20
	or 30660-108	26	30660-26
9	30660-09		

* 30665-04 has female bus extension on connector.

Horizontal Rack Mount

Slots	Part No.	Slots	Part No.
4	30960-04	9	30960-09
5	30960-05	12	30960-12
6	30960-06		
8	30960-08		
	30960-108		

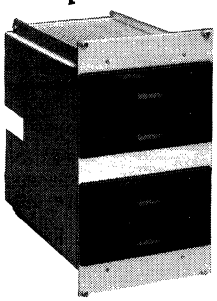
Rack heights: 4 slots: 2U; 5,6 slots: 3U; 8,9 slots: 4U; 12 slots: 5U.

Vertical Rack Mount

Slots	Part No.	Slots	Part No.
12	30860-12	20	30860-20
14	30860-14	26	30860-26
16	30860-16		

Rack height 14" (8U) on all vertical rack mount cages.

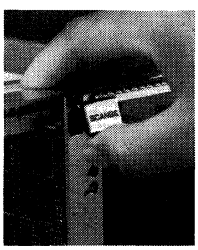
Peripheral Modules



Here is a convenient and cost-effective way to add disk/tape drives or other 5¼" peripherals to your Eurocard system. The peripheral modules mount directly in 6U 12-slot Vertical Rack Mount VME or Multibus II card cages.

Disk drive slots	Part No.
4 half-height (or 2 full height)	32013-1
3 half-height (or 1 full & 1 half height)	32013-2
2 half-height	32013-3

E-Z-JECT VME Ejectors and Panels



The Scanbe E-Z-Ject™ has become the industry standard ejector for VMEbus boards, providing a quick and easy method of removal from Eurocard format card cages. The standard E-Z-Ject front panel assembly includes the front panel, the handle(s), and the corresponding hardware. Custom panel labeling as well as custom ID panels for E-Z-Ject handles are readily available.

Size	Part No. Unassembled	Assembled
3U x 4HP	32025	32005
6U x 4HP (lower bracket)	32030	32010
6U x 4HP (upper bracket)	32028	32027
6U x 8HP (std.)	32094	32091
6U x 8HP (wire wrap)	32152	32011
9U x 4HP	32035	32014
9U x 8HP (wire wrap)	32153	32128
9U x 8HP (deep comp.)	32226	32186

Component Kits — without front panel

Includes handle(s), I.D. plates, bracket(s), and corresponding hardware:

Size	Part No.
3U x 4HP	S216-311
6U x 4HP	S216-611
9U x 4HP	S216-911

Eurocard (VME) Filler Panels

Filler panels are prepunched, anodized, vertical grained, .090" thick aluminum covers that fasten to card cage extrusions to cover openings in the front of a card cage. Mounting hardware is included, but not handles.

Include both main part no. for height, dash no. for width

Height/Part no.		Width/dash no.			
3U	32145-	2HP	-01	6HP	-14
6U	32146	3HP	-02	8HP	-11
9U	32251-	4HP	-03
